THE RACE.

Brilliant Contest Between the Harvards and Oxonians.

A Fine Show of Muscle and Mettle by the Rival Crews.

The "Blue" Victorious by a Few Seconds.

Gallant and Desperate Struggle of the "Magenta."

Unequaled Time of Victor and Vanquished.

The Match—The Men—The Boats—The Course—The Start and the Finish.

Reception of the News on this Side of the Water.

The Result—The Crews and its Appearance—Display of the "Magenta" and the "Blue"—The Intense Excitement—The Preparations—The Start—The Race—The End.

LONDON, Aug. 27.—The excitement to-day over the great international boat race has been intense. The banks of the Thames have been lined with spectators since an early hour this morning. The city has been almost deserted and business quite neglected. Vehicles of all descriptions, bearing the Harvard and Oxford colors and heavily laden with people, crowded all the roads leading to the course; and during the entire day the roads in the vicinity of Putney, Hammersmith, Chiswick, Barnes, Mortlake, &c., were thronged with pedestrians. The railway companies found themselves almost unable to provide cars sufficient to carry the vast numbers in waiting at the depots. It is no exaggeration to state that probably a million of people witnessed the race.

THE RACE.

The Harvard crew "won the toss" for position, and chose the Middlesex side, (the outside of the semicircle.) Both boats started at 5 o'clock, 14 minutes, 6½ seconds. The tide at the start was sluggish, and a light southwest breeze prevailed, with smooth water.

The Harvards were first to catch the water, and took the lead, gaining rapidly upon their opponents, and making forty-five strokes per minute, against the Oxford's forty. At Bishop's Creek, three furlongs from the start, the Harvards led half a length. Gaining headway they increased their lead as they passed the Willows. Their pace was subsequently slackened, and the Oxfords pulled up, but the Harvards were still three-quarters of a length ahead at Craven Point, three-quarters of a mile from the start. Oxford now went on with a steady drag, but the Americans rapidly increased their lead, and at the Crab Tree, a mile and an eighth from the aqueduct, were a couple of lengths ahead.

Beyond this point the Harvards were "taken aback," and the Oxfords quickening their speed reduced the gap at the Soap Works, a mile and a half from the start, to half a length.

The Harvards now pulled up with a magnificent burst to Hammersmith Bridge, (a mile and three quarters) but in shooting the bridge lost the distance they had gained.

Opposite the middle mall the Oxfords spurted, and came up gradually to the Harvards; but, when opposite "the Doves," the boats were found to be too close together, and the Harvards gave way and at "Chiswick Ait," (two and a half miles,) the boats were "level." After proceeding fifty yards further the Oxfords began to gain, though temporarily, and the Harvards again got even with them. Oxford gained rapidly at Chiswick, where it became clear that the pace apparently told on the Harvards, who were rather wild at this part of the race.

From this point the Oxfords rapidly drew ahead, and in a few strokes obtained a lead of two lengths. The Harvards rowing pluckily held them there for half a mile, when they fell astern, and Oxford at thirty-eight strokes per minute, shot Barnes' Bridge (4¾ miles) three lengths ahead.

Along Barnes' Reach the Harvards refreshed their stroke (Mr. LORING) with river water, thereby retarding their boat.

The Americans then tried to spurt, but found the effort ineffectual, and Oxford getting more of a lead, eventually won the race by four lengths, easing up in the last few strokes, and pulling up fresh.

The Oxfords arrived at the ship at 5 o'clock, 23 minutes, 47 seconds, making the 4¼ miles in 18 minutes, 40½ seconds.

The Americans were well received at the finish, and returning, landed at Barnes.

The race was a good one, and excited a degree of enthusiasm along the banks of the river utterly unknown in former races.

The Last Words of the London Morning Papers—Their Predictions.

LONDON, Aug. 27.—The newspapers to-day publish their closing comments on the boat race, which occurs this afternoon at 5 o'clock.

The *Telegraph* eulogizes the Elliott boat as light, fast and graceful. It travels well and suits the crew. "We do not expect," the *Telegraph* says, "that the Harvards can win the race, but the changes made by them bring the crews more on a level. On the whole, we think it will be a capital race. The Oxfords will defeat their gallant adversaries without difficulty. If otherwise, the Harvards must have an overtaxed, to show that we are not ashamed to be beaten by our excellent cousins."

The *Star* says: "The Americans are individually more powerful than the Oxfords, but it is thought their training is not according to the English notion of strictness."

The *Daily News* says: "Above all things we are anxious that the contest shall be sharp from the first to the last; that the victory, whether on one side or the other, shall be so hard to win as to cover the winners and losers alike with glory. To prejudice the issue would be impertinent in the last degree."

The writer then takes the opportunity to demonstrate to the full extent the obvious and inevitable disadvantage the Harvards have contended against: "The rivers and everything were strange and unfamiliar, and masters as they were of the science of rowing, they had to study it almost like the alphabet of a foreign language. The Oxfords on the Charles River would labor under similar disadvantages. All that can be said is they add grace to victory and dignity to defeat."

The general impression is that it will be a great race to Hammersmith, (two miles.) The bridge at Putney has been completely barred, and no boats, except those of the empire and the Press, will be allowed to pass.

The betting is two to one and seven to four on Oxford.

It is reported that several American gentlemen now here stacked $1,000 on the success of the Harvards, last evening.

THE STORY OF THE RACE.

HOW THE RACE WAS MADE.

The oarsmen of Harvard, "mother of American colleges," have for many years maintained an acknowledged supremacy in American waters. They have repeatedly defeated such amateur crews as have contended with them; and have overcome in six and three mile races such professionals as the once famous "Fort Hill," and "Beasley" crews, and the "Biglins." Defeated last year by the great Ward crew, they have since twice conquered the "Boston" crew of professionals, who meanwhile had themselves beaten the Wards, and laid claim to the professional championship. In college racing they have easily held the emblem of championship from 1852 to the present time, losing it to Yale College but two years in the seventeen. For the last four years they have uniformly won at the Worcester regatta. Naturally they "sighed for new worlds to conquer," and last year sent a challenge to Oxford to row a six-oared or eight-oared race in England. The challenge was declined for reasons we need not now rehearse, except to note that Oxford declined to row unless the Harvards would carry a coxswain. This year the challenge was renewed for a four-oared race, with everything yielded to the English practice, and was accepted by Oxford, but declined by Cambridge.

It is a curious fact, worth remembering, that the majority of the Harvard men were at first opposed to this challenge, which was sent by Mr. SIMMONS solely on his own responsibility. Their ground was, first, that Harvard had lost several of her best oarsmen since the previous challenge, and secondly, that it was impossible to do anything with Oxford, rowing on such a course, being compelled to concede carrying a coxswain, and, in fact yielding every advantage to Oxford, and receiving not one from her. After a hard canvass, however, the feeling that the college was already committed prevailed, and, in due time, enthusiasm and support took the place of the first judgment, which has proved to be well-founded.

The challenge was sent early in April, and it proposed the Putney to Mortlake course, each boat carrying coxswains. Oxford's letter of acceptance arrived on the 9th of May. Cambridge asked for a delay, which matured to a declining of the contest.

In due time the Harvard four were called from seven or eight candidates. The veteran LORING and SIMMONS who had so often won victories for the Magenta, at last chose for the other two BASS and RICE, two strapping oarsmen from the West, with FAY and LYMAN as substitutes. The two latter were left behind to measure oars with Yale, with such four other oarsmen as they could manage to get together, while the "International Four" went to England, leaving New-York on the 10th of July, after winning three close races with first-class crews, by way of practice.

Arrived in England, the crew were greeted handsomely, and were made the guests of the London Rowing Club. But, declining the many invitations to all sorts of pleasure parties, public and private, they at once quietly settled down to their work. Meanwhile, on the 2d of July, the race between Harvard and Yale came off at Worcester, and was easily won by the former, by their superiority of skill, as it was a "made-up crew," containing but three first-class men, LYMAN, FAY and RICE, against the most powerful six that Yale had ever produced. The prestige acquired by LYMAN and FAY in this race procured their substitution for RICE and BASS on their arrival in England early in August.

Meanwhile the Oxford four had "shown" on the Thames, and were universally pronounced to be the finest four ever turned out in England. With the beginning of August, both crews were hard at work for the struggle. Let us now, therefore, take a look at the statistics of

THE RIVAL CREWS.

The names and weights of the two crews as they stood at the race are as follows:

Harvard.

No. 1.	Mr. Loring (stroke)	154 pounds.
No. 2.	Mr. Simmons	171 pounds.
No. 3.	Mr. Lyman	186 pounds.
No. 4.	Mr. Fay (bow)	159 pounds.
	Total	670 pounds.

Oxford.

No. 1.	Mr. Darbishire (stroke)	169½ pounds.
No. 2.	Mr. Tand	169½ pounds.
No. 3.	Mr. Yarborough	169½ pounds.
No. 4.	Mr. Willan (bow)	154 pounds.
	Total	662½ pounds.

The Oxford crew thus surpassed the Harvard in weight by no less than 6½ pounds—that is to say, by the remarkable difference of 12 pounds per man. As both crews were trained very fine, the difference was one of sheer strength and available physique. On the other hand, the coxwains were

Mr. Burnham (Harvard)	114 pounds.
Mr. Hall (Oxford)	101 pounds.
Difference	13 pounds.

This latter difference was, unlike the other, one of pure dead weight. There were lighter men than Mr. BURNHAM at Harvard, but, as the boats there are not steered by coxwains, he was the only one really available for the purpose. In average ages the crews were just about equal.

OUR HARVARD FOUR.

The four that struggled so gamely for America yesterday, are not only the best four that ever wore the magenta, which is only another name for the best amateur four in the country, but, in the opinion of good judges, are as skillful a crew as ever pulled an oar. They are all of New-England parentage, making the race one of New-England against Old. LORING, the Captain, coach, and stroke of the crew, and the ideal Harvard oarsman, has long been regarded by boating men as one of the most thorough and accomplished amateurs in America. He is compactly built, being five feet eleven and one-half inches high, and weighing, trained, 155 pounds. He rowed as a Freshman in the University crew of 1864 which conquered Yale, and rowed stroke in the victorious crews of 1867 and 1868. SIMMONS, who weighs 171 pounds, trained, is the strongest man that ever handled a Harvard oar. Unhappily, as it appears, he has been indisposed for some days, and the last news that came before the race brought the ominous tidings that the indisposition, caused by the unacclimated climate, had not been shaken off. He has rowed almost daily during good weather ever since he entered college, pulling number three in the Freshmen crew, which beat all the other class boats in 1866 that were willing to try them, number two in the University six in 1867, winning both the Boston City Regatta on July 4 of that year, and the College race at Worcester; and number three in the University six in 1868, which was defeated twice by the champion professionals of the country, the WARD brothers, but easily beat a strong St. John party, all the best New-England crews, and the Yale men of that year.

FAY is an amateur oarsman of large experience, especially with the sculls, resembling YARBOROUGH in that respect. He rowed in the waist at Worcester, a month ago. LYMAN, the Worcester stroke, has had less experience than the other four in shell rowing, but is an oarsman of great skill, pluck, and staying power. He, with BASS and RICE, will win many laurels for Harvard yet, we may trust, in the two years to come—haply may win back the Putney laurels from Oxford in a return match on the Charles.

THE OXFORD FOUR.

The victorious four of Oxford are, as we have said, not only the best four ever turned out at Oxford, but the finest ever seen in English waters. Indeed, it is an exceptionally superb and formidable combination. As the Harvard men were all of Massachusetts parentage, so these were all Etonians. DARBISHIRE, of Balliol, the stroke, has won two successive years against Cambridge, and rowed stroke for the dark blue last March. YARBOROUGH, of Lincoln, has also rowed in two University races against Cambridge, and has won the Oxford sculls. TAND, of University, is not only the heaviest, but is probably the most formidable man ever in an Oxford boat, being as expert as he is powerful. He has rowed three successive years in the University race. WILLAN, also a magnificent oarsman of fine physique, has rowed four years in the University boat, comparing in this respect with LORING.

THE COURSE.

The track was the traditional one from Putney to Mortlake, and the river, at the start and up as far as Hammersmith Bridge, is about 700 feet wide. There are two spans in this bridge, one about 200 feet long, the other about 120. The old wooden bridge at Putney, with its narrow arches and enormous projecting pile-buttresses, the Bishop of London's palace-garden running down to the river on the north or Middlesex shore, the quaint old town of Putney on the Surrey side, with a square stone church tower of the true English type dominating the red-tiled roofs of the narrow water-street, fronting the Thames—all are on the style made familiar to us in WASHINGTON IRVING'S delineations of English country scenery. There are no rows of genteel brick boxes, with stucco pilasters, no cockney villa residences—all is solid, antique, and quaint on ordinary occasions.

The start was taken from the Aqueduct Bridge, which is about thirty yards above the wooden one, and is a mere pipe, supported on slender pillars imbedded in the soft of the river at wide distances. There is a gentle turn at the first quarter of a mile on the course up the river, where the stream sweeps round Crab Tree Point, on which one of the loveliest suburban cottages in the environs of London lies in flowering gardens. It is called Craven Cottage, and was a favorite spot for the picnics of the gay world of May Fair. Opposite to this, at the western end of the village of Putney, lies the farm of Barnes Elms, the residence of the late Vice-Chancellor SHADWELL, himself one of the greatest supporters of aquatics during his long life, and the progenitor of a race of athletes in those sports. The river sweeps in a long curve till near the second mile, where a handsome iron suspension bridge spans the stream from Hammersmith, on the Middlesex shore, to the Surrey side. There are no houses on that southern side, the path or towing road being elevated a few feet above the surrounding marshes or withy grounds.

Immediately on clearing the Hammersmith Bridge the current runs rapidly round the bend of the land, which trends sharply eastward and south. This apparently was the turning point of the race; for there is a great bight, in which lies Chiswick, the western suburb of Hammersmith, with one or two low sedgy islands in front, contracting the main stream. Oxford seems to have here gained by a foremost position the choice of water, and so obtained an advantage that decided the contest. From this corner to the railway bridge of the Southwestern Branch to Kew and Hounslow, the course is almost straight water, where the two villages of Barnes and Mortlake fringe the Surrey shore, the Middlesex side being wholly covered by sedges and withy beds. Oxford pulled its last, victorious stroke at a boat moored opposite the Ship Inn at Mortlake, where the course ends.

It measures four miles and a quarter, and it has been a favorite one for this purpose during the past fourteen years, in preference to the old course from Westminster to Putney, which measured six miles. It is shorter than the old one, and is less trying to the slight racing boats by reason of its containing less of the lumpy water that is often, indeed usually, found in the open reaches of Battersea below. Besides, the river traffic, being so enormous and constant, an uninterruptedly clear course had become impossible below Putney Bridge. On this track Oxford has for nine consecutive years won what is called the blue ribbon of aquatics from her sister University of Cambridge, and now has plucked laurels from the crown of our own Harvard.

THE RIVAL STROKES.

From what has been said already of the course, and from the closeness of the race, rowed under a great many disadvantages, it is clear that the style and skill of our Harvard oarsmen will become no less famous than ever on the results of the contest. Our correspondent who was with the crew, addressed, yesterday morning, this note to the London *Times*:

BAR: After it has been asserted for the last three weeks that the Harvard four are endeavoring to conform their style of rowing to that of the gentlemen they hope to meet on the river to-day, will you permit me to say, in advance of the contest, that the assertion is groundless? We believe our style to be exactly that adopted by us in each of our last three annual races against Yale. Our stroke can be aware of no change; the men who follow the stroke are aware of none, nor has there been any variation in our method of training or instruction.

We have so often described the Harvard stroke in these columns, that we need now only reproduce from the columns of a contemporary a letter written by a member of the Harvard crews of 1867 and 1868, in answer to a previous letter in these columns ceremoniously confronting it with the "quick arm-stroke at 45 a minute." He says:

"The stroke is a long one, with a quick recover. The rule at Harvard, (as, I believe, at Oxford,) is to reach forward as far as possible, cover the backs of the oars in feathering it in the water on right sweep, take hold hard at the beginning by kicking with the legs and by throwing the weight of the body on the beginning of the stroke.

"The main work is done with the legs and back, the arms not being used until the body reaches the perpendicular, when they are gently forced to lengthen the oar and finish the stroke. The arms are kept straight until the body reaches the perpendicular, the hardest of the pulling being at the beginning of the stroke by the legs and back."

So described, it will be seen that the stroke pulled by Harvard did not differ nearly as much from that of Oxford as it does from the various strokes they have hitherto been wont to contend with on this side of the water. Oxford, taught by past experience of defeat, changed the brilliant style peculiar to Eton, and suited to the rapid running stream at that classic spot, and adopted the long, steady, sweeping stroke brought into notice by the COOMBES, the best and most scientific artists in rowing that ever won silver sculls on the Thames. In three several races during the last seven years they were passed and headed by Cambridge, who rowed the rapid, flashing stroke, the oars feathering high, and the blade sinking deep with a plunge more effective to the eye than progressive, as the bow is apt to plunge and dip at each repeated stroke, instead of swimming steadily over the opposing water. The Oxonians in each of these cases collared their rivals at the bend of the river at Hammersmith, passed them in their turn and won.

The Oxford theory is, if we apprehend aright, that the rower supposes himself in the position of a man pulling a weight beneath his feet on a board placed at right angles to his body. This exactly represents the action of the kick of the legs against the footboard, and the steady pull upward of the body and arms in managing the oar in the act of displacing the water, by which action the boat, the non-resisting body, or body at rest, is propelled forward. This necessitates a backward motion, as the oar is not released from the water till exactly parallel or in a straight line across the boat. Of course, the rower's body is behind the oar, and, therefore, inclined backward. The rebound of the body in the forward movement for the next stroke is made by the quick feather, which ought to be simultaneous; and the rapidity of this movement in an oarsman and its grace, which is synonymous with its ease, is narrowly watched in selecting men for rowing. This action implies the use of nearly all the muscles of the body—the feet, which press or kick against the footboard; the calf and thigh, which draw the body up; the arms, which pull and steady the oar; the back and throat, which keep the head and loins straight and even, so as to keep the balance and play of the frame.

As we have said, considering the circumstances of the race, it seems probable that Harvard will now cultivate its own style more assiduously than ever, being well satisfied that it has vindicated itself.

THE BOATS.

It was a misfortune for Harvard that it neglected, apparently, actual presence on the river to determine what boat to use. The boat they confidently took over proved impracticable. The boats in which they practiced almost entirely were English, and, at last, these were rejected for the one made by ELLIOTT in England, after his arrival there. This boat is forty-four feet long, twenty-one inches wide at the widest part, and eight inches deep; depth over all, eleven and a half inches; depth forward, seven inches, and depth aft, six and a half inches. She was built on a draft and model brought from New-York. The oars were made by ATKINS. The Oxford crew rowed, as usual, in a boat built by SALTER, and of the familiar model.

THE STRAIN OF ROWING.

The partial exhaustion of LORING, the Harvard stroke, during the progress of the race, will undoubtedly start the old question again as to the perils of rapid rowing. It has been said by high authority that such severe muscular exertion is very injurious to the young frame, and more especially to the pulmonary organs, which naturally have to endure an extraordinary strain on the breathing powers. Such violent exertion as rowing six miles in 18 minutes and 40 seconds does make a man puff and blow, and the greatest point made in training men for such contests has always been to give them wind. Practice by running steadily two or three miles with the mouth shut tight, warm but light clothing, avoidance of stimulants or other substances likely to make fat or unnecessary flesh, are the means adopted universally for this purpose. No doubt medical reasons by the bushel, both for and against this theory of the danger of rowing, may be and have been adduced; but a correspondent writes us that he has for thirty years been used to these great contests—has twice himself rowed in the Oxford and Cambridge race, and in some twenty-five others, at Henley for the National Regatta Cup, and in London. He has known all the the partakers of those contests and never knew one who was in any appearance the worse for the struggle, unless unprepared by reason of want of training or by disease.

PUBLIC FEELING IN NEW-YORK.

In this City the excitement on the receipt of the tidings was intense. The general comment was, "Well, the Harvard boys have done honor to America, and we are proud of them. They hung without flinching to a losing race. Oxford pulled with every advantage in her favor, and Harvard with none. Let Oxford pull in a return match in American waters, and we will beat Harvard to win." A grave business dispatch from a down-town merchant came to the TIMES Office in the afternoon with the envelope superscribed: "Though they are beaten, the Harvards forever!" Never did a gallant conquered party meet more enthusiastic and universal favor from their countrymen and friends.

SUMMING UP.

In fine, while specific causes may be easily assigned for the result of yesterday evening's match, it is clear that, after all, the real reasons of the defeat of our Harvard crew are those which existed before it left our shores. They rowed under every conceivable disadvantage; and as it so chanced, this year, their opponents were the finest four that ever rowed in England, they had no advantages to spare. They not only made the long voyage, and risked the total change of climate, but they yielded their own habit of rowing without a coxswain, and consented to row on a river where one was necessary. Thus on an unknown course, with the strange excitement of a great contest for the first time presented to him, the coxswain should steer worse than the English coxswain, was to be expected. Their opponents, on the other hand, knew every inch of the course by heart, were familiar with the extraordinary excitements, customs and devices of the day of the race, were perfectly at rest regarding all the details of the race, time of appearance, character of the start, where to struggle for the lead, and so on. They had tired too many crews on the same course not to know how to reserve themselves for exactly the right place.

But it was a splendid contest, with the "fairest of fair play," and the victors deserve all the honors they have won. As for the vanquished the most generous thing that could be said regarding them has already been said by the English paper, the London *News*, which, reviewing the long preparations yesterday morning, declared: "The rivers and everything were strange and unfamiliar; and masters as they were of the science of rowing, they had to study it almost like the alphabet of a foreign language. The Oxfords on the Charles River would labor under similar disadvantages. All that can be said is, that these disadvantages add grace to victory and dignity to defeat."

RECEPTION OF THE NEWS.

How the Result is Regarded in this City—Talk at the English Club-Houses—What the Bookmen Say.

The news of the race, which was received here about 1 o'clock, occasioned considerable excitement among all classes, but more particularly, of course, among those who had put money on the event. At the Astor House during the morning Dr. UNDERWOOD sold a large number of "pools," none, however, for very heavy amounts, the betting being $60 to $35, $100 to $60, $15 to $10, $20 to $13, $25 to $21, and so on. A large number of these pools were taken by Englishmen, who seemed to think the Yankees precious green for betting their money on so poor a chance. Advices were received during the morning that two of the Harvard crew were indisposed, and this served still further to damp the betting ardor, though on 'Change and in the street, bets by well-known brokers of $700 to $1,000, and $5,500 to $6,000 were offered and taken up almost to the hour of receiving the news of the result of the contest.

At some of the clubs in Houston-street, where Englishmen do most resort, arrangements were made for receiving early intelligence of the great race. Here might be seen portly Bulls with pewters and pipes before them, awaiting with such patience as they might, and not without a lurking fear that the Harvards might after all come in first, the result of the contest. The merits of the two crews were warmly debated, and one man, who had attended a University race, and had shaken hands with DARBISHIRE, became the lion of the party, and was appealed to as an authority whose dictum was final.

About 1:30 o'clock the result of the race was announced, and was received with a cheer, but with less exultation than might have been expected. The Englishmen felt, in fact, or at least they professed to feel, that the result of the contest was a foregone conclusion, and that the Oxfords must win. But little money changed hands here, for opinions were all one way. The conversation soon turned on the result of the race. "Why," said an Englishman who was just sitting down to a beef steak and pot of ale, "how could men expect to win that have been living on mush, and rice, and such things? There's nothing like beef and ale; and I consider this race as showing the superiority of the roast beef of old England over Yankee food as well as men. When I heard the Harvards were training on soft food, I knew it was all up with 'em. There's no muscle in it." "Still, I must say as they did pretty well," said another, "all things considered. It's a mighty hard thing to beat a man on his own ground, but they gave 'em a pretty hard pull for it."

Among the betting men, chiefly Americans, the result of the contest was very quietly received. Most of them had been of the opinion that the Harvards would make a good fight, but would be beaten. A few bets only had been made on the result.

As in many cases of this kind, numbers of persons would not believe that the Harvards were beaten, even after the Press dispatches had been published, but clung to the fond anticipation that the dispatches were premature, and that the real account of the race would show the Harvards to have been victorious.

The flags were hoisted on the City Hall, and preparations made to fire 100 guns in the Park, should the Harvards have won. The guns were not fired.

A report was circulated in Wall-street, soon after the announcement of the result, to the effect that Oxford had been ruled out and the victory awarded to the Harvards. It was reported in the Gold Room that the dispatch containing this announcement bore the signature of Mr. J. W. SIMONTON, Agent of the Associated Press. Mr. SIMONTON denied the truth of this in the following note:

To Editors:

I have just heard that there is a "dispatch" in Wall-street, purporting to be signed by me, announcing that the Harvard crew won the race to-day, the Oxfords having been ruled out on technicality. I need not tell you that this is a forgery. J. W. SIMONTON.

KNIGHTS OF ST. CRISPIN.

Their Founder, their Patron, and their Objects—Where, Where and How the Order Originated—Their Policy to Discourage the Apprenticeship System.

Among the various trades organizations that were represented in the late National Labor Congress, was that known as the Knights of the Order of St. Crispin, an Order of whom a few facts may be of interest.

This organization is made up of shoemakers, and has its branches in every section of the Union. It numbers about 50,000 members, and has grown into strength and prominence during the past two years and a half. In New-York City alone the aggregate number of members connected with the lodges is over 7,000. Their display in the procession on Monday last will doubtless be the means of still further swelling the rolls of membership. Shoemakers' Unions were organized years ago, in most of the towns and cities of the United States; but it was thought that these purely local organizations were of little practical value in advancing the interests of the craft in general, and they have now been merged into one grand Order. On the 1st day of September, 1867, there was organized in the City of Milwaukee, the first lodge of the Knights of St. Crispin. NEWELL DANIELS, a journeyman shoemaker of that city, was the founder of this Order, and his name is held in respectful remembrance by its members. For years previous to that time he had under consideration the formation of such an organization, but could not find any one to second his efforts until 1867, when he was joined by Samuel Wilson, Wm. C. Haines, F. W. Wallace, Henry Palmer, Albert Jenkins and Thomas Houren. These seven associated themselves together for the purpose above indicated, and became Lodge No. 1, K. O. S. C. For the name given to the organization the Order is indebted to Mr. WALLACE, one of the seven originators. A reference to the Roman Martyrology shows that CRISPIN and CRISPINUS were brothers, born at Rome in the reign of the Emperor DOCLETIAN, in the year 303. They became converts from Paganism on arriving at man's estate, and traveled from their native land to Soissons, in France, for the purpose of propagating the Christian religion. Not wishing to be a burden on the Christian flock, they earned their living by following the trade of shoemaking. The Governor of the town, a Pagan, of course, on discovering them to be Christians demanded of them a recantation of Christianity, and, on their refusing to give it, they were ordered to be beheaded, which order was carried into effect. Their martyrdom is celebrated annually in the Catholic Church, on the 25th day of October.

The Order of Knights has for its motto "Justice, Truth and Love"—meaning, according to the version given by its adherents, justice not only to the employer but to the employes and the consumer; never to deviate from the truth under any circumstances; and love for all mankind, the highest proof of true love for God.

The K. O. S. C. allege that the cause of the heretofore bad condition of their trade was the surplus of workmen over and above what was required to supply the demand for boots and shoes. To remedy this it was found necessary either to induce the public to use double the usual quantity of goods, or to reduce the number of workmen. The first plan is impracticable; the other they conceive to be feasible, and their efforts are now to dissuade young men from learning the business, and they are pledged to take no new hand to work at any branch of the trade. On account of this latter determination they are not regarded with a favorable eye by the manufacturers. Party politics is eschewed by the Order; but it holds itself in readiness to aid in filling Government offices with men whose principles approximate most nearly to what they believe to be the interest of the laboring classes. They look with favor also on the cooperative principle of manufacture, and urge its adoption in all cases where it can be carried out. The Order is daily increasing in numbers and in influence over the whole country.

IMPORTANT POLICE ORDER.

Uniforms to be Always Worn—Detailed Men to Report Daily.

The following general order was promulgated yesterday by Superintendent KENNEDY:

OFFICE OF THE SUPERINTENDENT OF METROPOLITAN POLICE, NEW-YORK, Aug. 25, 1869.

GENERAL ORDER No. 874.—At a meeting of the Board of Metropolitan Police Commissioners, held on the 26th inst., the following amendments were made to the rules and regulations of the Metropolitan Police Force, and which, on the receipt of this order, are in full operation:

Rule 45 is amended so as to read as follows:

RULE 45.—Captains, Sergeants, Roundsmen and Patrolmen, while on duty, or when not on duty, or assigned to detective duty, shall wear the prescribed uniform, whether on or off duty. Members of the force will be relieved from wearing the prescribed uniform only while attending divine worship, at their houses, and while attending, going to and returning from public worship, or while absent from their Precincts on their regular days of rest. Officers are allowed from this rule, by the Board, in special cases. Members of the force while off duty will not wear their shields. The cap, gloves, shields, badges, uniforms, belts and clubs, shall be accounted with the sample deposited in the cloth room at the Central Department. The coat will be buttoned at all times when members of the force are on duty.

A new rule is adopted as No. 281, as follows:

RULE 281.—Every patrolman detailed to special duty in the City of New-York, under and pursuant to section 12 of chapter 48 of the laws of 1866, and every regular or special patrolman detailed to special duty in the City of New-York in any bank, banking office, banker's or broker's office, hotel, theatre or office of any officer of the General Government, or of the City or County of New-York, shall report daily in person at the Detective Office, No. 300 Mulberry-street, to the officer in command, at such time as may be prescribed by such officer, subject to regulations by the Board, and not to interfere with the proper performance of duty. All such patrolmen, if duty be found or attempted to be in, knowingly, will report duty like manner at the office of the Inspector in Brooklyn.

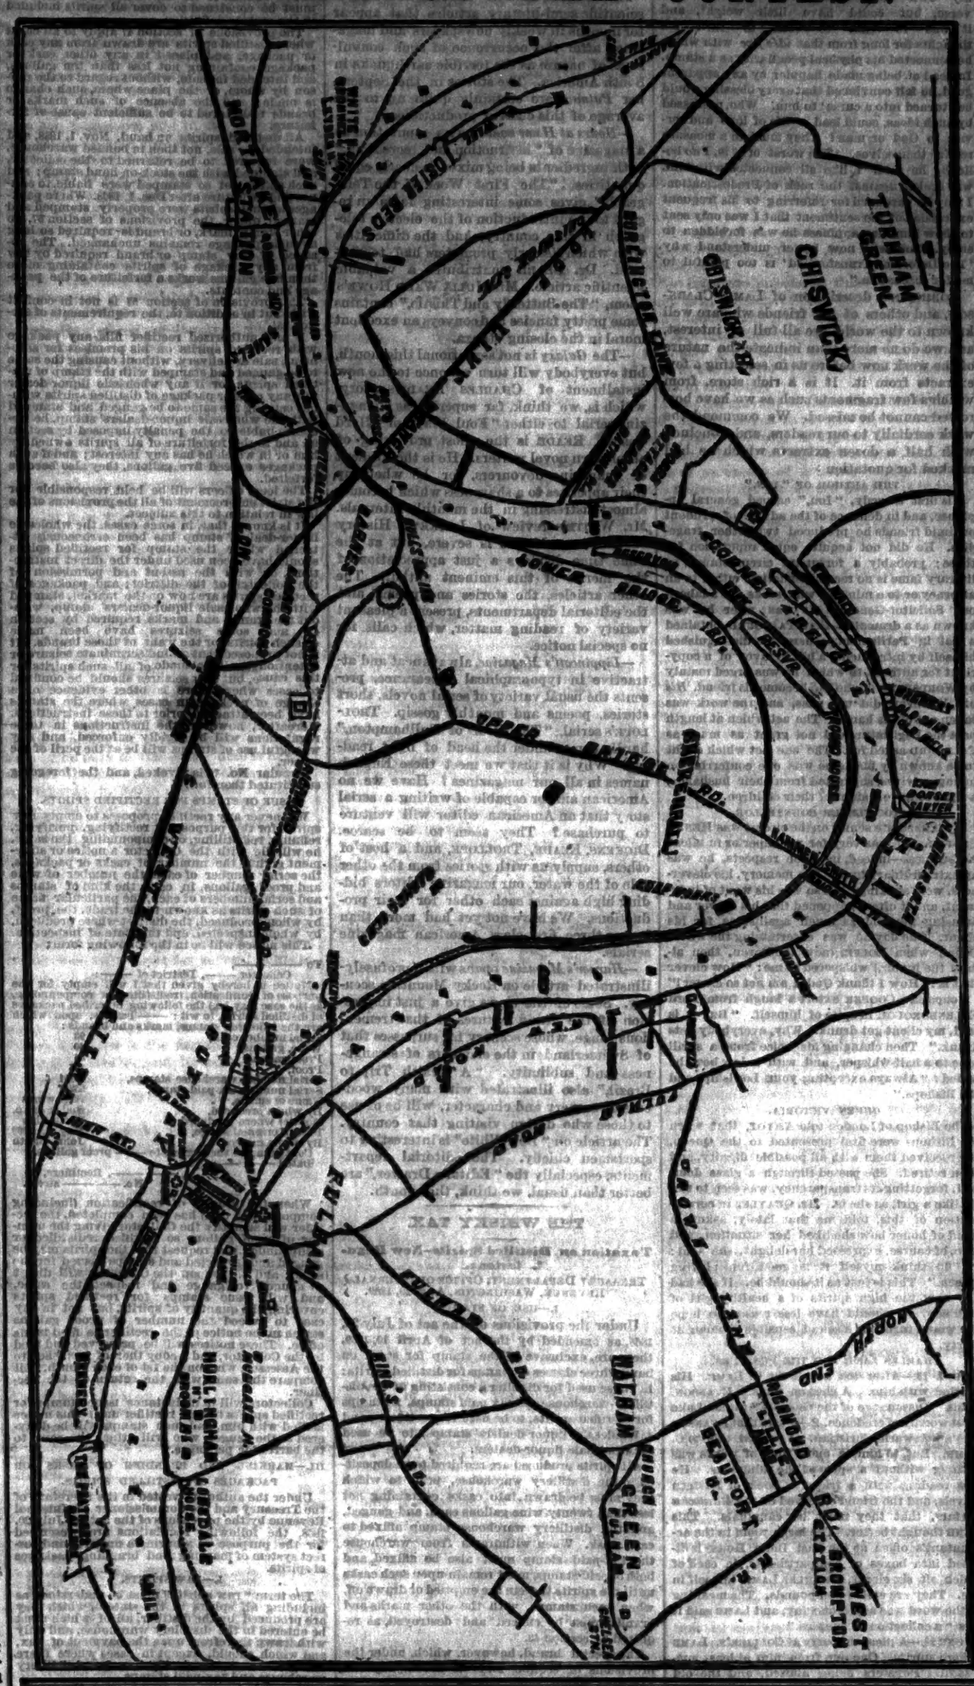
The foregoing rule applies to all special patrolmen, except those under the Central Park Commissioners, the Commissioners of Emigration, and the Atlantic Dock Company.

The officer in command of the Detective Force will keep a book in his office, with the names of all regular and special patrolmen detailed for the special duties enumerated in Rule 281, so arranged as to specify the particular duty each one is engaged at, and his daily compliance or failure to report as required. And in case of failure to report, to have charges made against any such delinquent for neglect of duty.

JOHN A. KENNEDY, Superintendent.
GEO. W. DILKS, Inspector.

The amendment to Rule 45, requiring the uniforms to be always worn, has created intense feeling throughout the entire Police Force, and all the Captains have been notified to meet at the Central Police Office this morning for the purpose of protesting against its enforcement. It is alleged that the order must result in the most serious inconvenience to members of the force, who, under its provisions, cannot enjoy social life or perform any ordinary functions office except in full uniform. The Commissioners assert, in support of the new rule, that many policemen, when off duty and in citizen's dress, have participated disreputable haunts and conducted themselves in the most disorderly and dishonorable manner, and, when redress was demanded, have sought and found immunity by displaying their official shields, which they had hitherto concealed. The Commissioners, being determined to extirpate this evil, have hit upon the expedient of requiring all members of the force to appear at all times in full uniform.

THE SCENE OF THE CONTEST.



MEMOIRS OF HENRY CRABB ROBINSON.

Diary, Reminiscences and Correspondence of Henry Crabb Robinson. Selected and Edited by Thomas Sadler, Ph. D. Two Volumes. Boston: Fields, Osgood & Co. 1869.

A few years ago no man was much more frequently seen in the literary circles of London than "Old CRABB" ROBINSON. He was known everywhere, and was always sure of a cordial welcome wherever he appeared. Latterly, indeed, increasing infirmities kept him much confined to his own house, and he lost his hold of the generation to which he had survived. He keenly felt the most melancholy drawback in the lot of old age—the disappearance of all his early friends, and the insuperable difficulty of forming new ties. Mr. ROBINSON was very fond of the society of the young, but toward the close of his life the young could not possibly have much in common with him. Tastes, habits, pursuits, mode of life—all were different. We doubt, moreover, whether the quality which won for Mr. ROBINSON his former popularity—namely, the art of telling anecdotes of men or events, is so much in vogue with the present generation as with the last. Young men nowadays are apt to think the story-teller rather a bore. There are half a dozen elderly men still in London who still have a sort of reputation for relating anecdotes, but it is only their fellow-patriarchs who court their society. A very well-known dinner-out, whose table was once loaded with invitations, now thinks himself very fortunate if he can secure three a week in the midst of the season. His stories have ruined him. Young men, and still less young ladies, cannot endure the recounter who is perpetually bursting out on the slightest provocation with, "That reminds me of poor TOM SMITH, who thirty years ago," &c. Such men open their budget with the soup, and never close it until the first carriage is heard rolling away from the door.

CRABB ROBINSON was very far superior to story-tellers of the common kind; he was never coarse, and no one ever heard him tell an indecent anecdote, which is more than can be said for some of his rivals whom we could name. Those who remember him in his prime declare that conversation with him was at once charming and instructive, and when we remember that he was a great favorite with GOETHE, WIELAND, WORDSWORTH, and other eminent men, it must be evident that he possessed merits which did not always shine out in his later years. He found himself growing more and more solitary as the end drew near. He wrote in his diary in 1805: "Conscious that I am gradually growing poorer in friends, I have done my best to preserve what I have left." A month before he died he made the following touching entry: "This was a day of calls, and at my age these are of a melancholy kind. I am sensible of being no longer a desirable companion. But I do not complain of this as a wrong. It is in the nature of things, and of course." It is, in fact, the penalty of old age. When Mr. ROBINSON wrote these passages he was in his 91st year. It was with difficulty he could hear what was said to him. He very often forgot where he was, and was liable to sudden attacks of faintness. If he went to a theatre he could not distinguish the faces of the performers. Thus, persons who knew him only toward the close of his life could not form a proper appreciation of him, except from hearsay. He repeated his stories over and over again. Mr. WALTER BAGEHOT gives a characteristic instance, and an excellent explanation of this, in his very interesting sketch of CRABB ROBINSON, contributed to the *Fortnightly Review*:

"It is the excellence of a reminiscent to have a few good stories, and his misfortune that people will remember what he says. In Mr. ROBINSON's case an unskilled person could often see the anecdote somewhere impending, and there was often much interest in trying whether you could ward it off or not. There was one great misfortune which had happened to his guests, though he used to tell it as one of the best things that had ever happened to himself. He had picked up a certain bust of WIELAND by SCHADOW, which it appears had been lost, and in the finding of which GOETHE, even GOETHE, rejoiced. After a very long interval I still shudder to think how often I have heard that story; it was one which no skill or care could long avert, for the thing stood opposite our host's chair, and the sight of it was sure to recall him. Among the ungrateful students to whom he was so kind, the first question always asked of any one who had breakfasted at his house was, 'Did you undergo the bust?'"

Mr. ROBINSON was a barrister, but his practice was never worth quite so much as £600 a year. He *played* with law, and a man who so treats that "stern mistress" is not likely to enjoy great rewards. He had a great distrust of his own powers, and threw up a position which almost came begging to him solely in consequence of this diffidence. He ought to have been a journalist all his life, only that the hard work would not have suited him. He began, before this century was "in its teens," as a foreign correspondent of the London *Times*, and wrote letters "from the banks of the Elbe," which pleased the conductors so well that they offered him a position as foreign editor. "It was my office," he says,

"to cut out odd articles and paragraphs from other papers, decide on the admission of correspondence, &c.; but there was always a higher power behind. While I was in my room, Mr. WALTER was in his, and there the great leader, the article that was talked about, was written. Nor did I ever write an article on party politics during my continuance in that post. I may, however, add, that in February I inserted a letter with my initials, which was, I believe, of real use to the Government. It is to be found in the paper printed on Feb. 12. It is a justification of the English Government for the seizure of the Danish ships."

The JOHN WALTER thus referred to died at an advanced age in 1847—the grandfather of the present proprietor of the *Times*. He was a man of wonderful vigor and force of character, and was probably in all respects one of the best newspaper managers that ever lived. Nothing escaped his attention, and he deemed no expense too great for any substantial improvement of his paper. He was always casting out nets for new contributions. Among the writers who volunteered their services was S. T. COLERIDGE!—perhaps the most incompetent man of the age for the quick, ready, compressed work required on newspapers. Imagine an "editorial" by COLERIDGE! There is no topic known under the sun upon which it would not have treated. He would have transported the perplexed reader far into the most unsearchable regions of metaphysics, and left him wondering what on earth it was the writer wished to say. COLERIDGE was at home in editing his own paper, the *Friend*, but those who honor his genius the most cannot hear without a kind of shock that he once proposed to write articles for a daily paper at five minutes' notice. In one of his most familiar letters to CRABB ROBINSON, we may find an example of what his editorials would have been like:

"Is there not a sax in souls? We have all eyes, cheeks, lips—but in a lovely woman are not the eyes womanly—yes, every form, in every motion of her whole frame, *womanly*? Were there not an identity in the substance, man and woman might join, but they could never unify; were there not throughout, in body and in soul, a corresponding and adapted difference, there might be addition, but there could be no combination. 1 and 1=2; but 1 cannot be multiplied into 1: 1 x 1=1. At best, it would be an idle echo, the same thing needlessly repeated, as the idiot told the clock—one, one, one, one, &c."

We doubt whether this sort of thing would have added to the influence or prestige of our contemporary.

Early in life CRABB ROBINSON formed a friendship with MME. DE STAËL, which he preserved till her death. He tried to make her admire GOETHE, but could not succeed. The anecdote which ROBINSON tells of her will surprise many of her admirers:

"Her conceit in spelling a fine thing was strikingly shown in connection with a noble saying of KANT, which I repeated to her: 'There are two things which, the more I contemplate them, the more they fill my mind with admiration,—the starry heavens above me, and the moral law within me.' She sarcastically exclaiming, 'Ah, que cela est beau! Il faut que je l'écrive,'—and years after, in her *Allemagne*, I found it Frenchified thus: 'Que comme un philosophe célèbre a bien dit, Deux choses remplissent mon âme d'un respect sensible, il y a deux choses.' The grave philosopher of Königsberg turned into a 'poor sensible!'"

The following little incident is more curious still:

"HUMBOLDT, the great traveler, on his return from America, was presented to the Emperor NAPOLEON. Now, HUMBOLDT himself is a sort of BONAPARTE among travelers, and expected to be distinguished. 'Vous avez fait beaucoup,' said the Emperor to him, 'et ma femme aussi,' and passed on. Is it not admirable? There are many occurrences of great and little moment in life which can only be understood from their relation to the character of the actor. Was this address of BONAPARTE humor, or satire, or insolence, or impertinence? Did he believe a word of it? Did he look for his bow in waiting?"

In 1806 Mr. ROBINSON had several interviews with FULTON, whose connection with steamboats he does not seem to have heard—at least we can find no allusion to the subject in these reminiscences. He was interested in FULTON for another reason. The machinist was just then intent upon the invention of a new instrument in warfare. Let Mr. ROBINSON tell the story in his own way:

"He offered to BONAPARTE to destroy the whole English fleet by means of explosives. Dining with him one day, I spoke of the 'Perpetual Peace' of KANT. FULTON said, 'I believe in the Perpetual Peace;' and on my expressing surprise, he added, 'I have no doubt war will be put an end to by being rendered so murderous that by common consent it will be abandoned. I could myself make a machine by means of which I could in a few minutes destroy a hundred thousand men.'"

A few years later (1814) ROBINSON met General LA FAYETTE, and formed a high opinion of his character. "Of all the revolutionary leaders, he is the one of whom I think most favorably." He describes LA FAYETTE as a hale man with a florid complexion, and no signs of age about him. The following recollections will interest our readers:

"In fact, he is 57 years old, his reddish complexion clear, his body inclining to be stout. His tone of conversation is staid, and he has not the vivacity commonly ascribed to Frenchmen. There is apparently nothing enthusiastic about him.

"Of the future, LA FAYETTE spoke with a hope which it gratified me to hear, and he spoke respectfully of the royal family then restored. On general subjects I have a few notes worth abridging. He asserted that the manners of the French, especially the lower classes, had been improved by the Revolution; that the mob of France were less violent than an English mob; and the common people he thought more honest. This he ascribed to the revolution.

"LA FAYETTE is a strong partisan of America, as opposed to England. He is strongly opposed to our maritime claims, and thinks we might concede these in return for the renunciation of the slave-trade by other Powers.

"On my relating that, at the distribution of the colors, I heard some exclamations of 'Vive l'Empereur,' LA FAYETTE said: 'You are not to suppose that this proceeded from love to BONAPARTE. It was only a mode of showing dissatisfaction with the present state of things, and because it would not do to cry 'A bas le roi,' or 'A bas les Ministres.'

"Of Spanish America he said that JEFFERSON was of opinion that those States would ultimately become independent, but that this would rather retard than advance civilization."

In 1820 ROBINSON met another man whose name is a "household word" in this country:

"JUNE 11.—A most interesting party at KEAN'S. The lion of the party was DANIEL WEBSTER, the American lawyer and orator. He has a strongly marked expression of countenance. So far from being a republican in the modern sense, he had as air of imperial strength, such as CÆSAR might have had. His wife, too, had a dignified appearance. Mr. and Mrs. TICKNOR alone resembled them in this particular. There were present also at KEATON'S, MONTALEMBERT, the distinguished Roman Catholic author, DICKENS, Professor WHEATSTONE, the Miss WESTONS, Lady MARY SHEPHERD, &c., &c."

While thus referring to Mr. ROBINSON's reminiscences of men whose deeds are written in American history, we may mention that he was a fervent admirer of President LINCOLN, and was deeply shocked at the news of his death.

Mr. ROBINSON never met Lord BYRON, but he knew Lady BYRON very well, and kept up a friendly correspondence with her. He tells us that GOETHE was never tired of praising BYRON—he "compared the brilliancy and clearness of his style to a metal wire drawn through a steel plate." Here is another interesting passage:

"It was a satisfaction to me to find that GOETHE preferred to all the other serious poems of BYRON the 'Heaven and Earth,' though it seemed almost satire when he exclaimed, 'A Bishop might have written it!' He added: 'BYRON should have lived to execute his vocation.'—'And that was?' I asked. 'To dramatize the Old Testament. What a subject under his hands would the Tower of Babel have been!' He continued: 'You must not take it ill; but BYRON was indebted for the profound views he took of the Bible to the *ennui* he suffered from it at school.' GOETHE, it will be remembered, in one of his ironical epigrams, derives his poetry from *spaun (Langeweile)*; he greets her as the Mother of the Muses. It was with reference to the poems of the Old Testament that GOETHE praised the views which BYRON took of Nature; they were equally profound and poetical. 'He had not,' GOETHE said, 'like me, devoted a long life to the study of Nature, and yet in all his works I found but two or three passages I could have wished to alter.'

GOETHE was enthusiastic over the "Vision of Judgment," and pronounced the twenty-fourth stanza "sublime:"

"But hinging up the rear of this bright host,
A spirit of a different aspect waved
His wings, like thunder clouds above some coast
Whose barren beach, with frequent wrecks is paved;
His brow was like the deep when tempest-tossed;
Fierce and unfathomable thoughts engraved
Eternal wrath on his immortal face,
And where he gazed a gloom pervaded space."

We may here bring together another of ROBINSON's recollections connected with BYRON, and a part of a letter from Lady BYRON:

"BURNEY told WORDSWORTH that Lord BYRON had an impression he was the offspring of a demon. In a morbid moment such a thought may have seized him."

(Lady BYRON to ROBINSON, 1855:)

"Not merely from casual expressions, but from the whole tenor of Lord BYRON's feelings, I could not but conclude he was a believer in the inspiration of the Bible, and had the gloomiest Calvinistic tenets. To that unhappy view of the relation of the creature to the Creator I have always ascribed the misery of his life. . . . It is enough for me to remember that he who thinks his transgressions beyond forgiveness (and such was his stern, despairing feelings,) has righteousness beyond that of the self-satisfied sinner; or, perhaps, of the half awakened. It was impossible for me to doubt that, could he have been at once assured of pardon, his living faith in a moral duty and love of virtue, ('I love the virtues which I cannot value,') would have conquered every temptation. Judge, then, how I must hate the Creed which made him see God as an Avenger not a Father. My own impressions were just the reverse, but could have little weight, and it was in vain to seek to turn his thoughts for long from that idea with which he connected his physical peculiarities as a stamp. Instead of being made happier by any apparent good, he felt convinced that every blessing would be turned into a curse' to him. Who, possessed by such ideas, could lead a life of love and service to God or man? They must in a measure realize themselves. The worst of it is, I do believe, he said, I, like all connected with him, was broken against the rock of Predestination. I may be pardoned for referring to his frequent expression of the sentiment that I was only sent to show him the happiness he was forbidden to enjoy. 'You will now better understand why 'The Deformed Transformed' is too painful to me for dissection.'"

ROBINSON's description of LAMB, CLARKSON, and others of his friends who are well known to the world, are all full of interest, and we do no more than indicate the nature of the work now before us in selecting a few extracts from it. It is a rich store, from which a few fragments such as we have borrowed cannot be missed. We commend the work cordially to our readers, and conclude with half a dozen extracts which we had marked for quotation:

THE AUTHOR OF "ION."

His first tragedy, "Ion," earned general applause, and in defiance of the advice of prudent or timid friends he produced two other tragedies. He did not acquire equal reputation for these; probably a fortunate circumstance, as literary fame is no recommendation either to an attorney or to a minister who seeks for a laborious Solicitor-General. It was after he was known as a dramatist that TALFOURD obtained a seat in Parliament, where he distinguished himself by introducing a bill in favor of a copyright for authors, to which he was urged mainly by WORDSWORTH, who had become his friend. *His* bill, however, did not pass, and the work was taken out of his hands. The act which at length past the Legislature did not grant as much as TALFOURD asked for. The one act which ought to be known by his name was one conferring on unhappy wives, separated from their husbands, a right to have a share of their children.

A GOOD-NATURED COUNSELLOR.

My immediate senior on the circuit was HENRY COOPER. He was very far my superior in talent for business—indeed, in some respects, he was an extraordinary man. His memory, his cleverness, were striking; but so was his want of judgment, and it often happened that his clever and amusing bits told so much against as for his client. One day he was entertaining the whole Court, when ROLFE, (now the Baron, then almost the junior,) whispered to me: "How clever that is! How I thank God I am not so clever!"

I once saw COOPER extort a laugh from Lord ELLENBOROUGH in spite of himself. "But it is said, my client got drunk. Why, everybody gets drunk." Then changing his voice from a shrill tone to a half-whisper, and with a low bow, he added: "Always excepting your Lordships and the Bishops."

QUEEN VICTORIA.

The Bishop of London told ARNOT, that when the Bishops were first presented to the Queen, she received them with all possible dignity, and then retired. She passed through a glass door, and, forgetting its transparency, was seen to run off like a girl, as she is. Mr. QUAYLE, in correction of this, told me that lately, asking a maid of honor how she liked her situation, and who, of course, expressed her delight, she said: "I do think myself it is good fun playing Queen." This is just as it should be. If she had not now the high spirits of a healthy girl of eighteen, we should have less reason to hope she would turn out a sound sensible woman at thirty.

CHARLES LAMB AND THE PUNSTERS.

JUNE 13.—After tea a call on C. LAMB. His brother with him. A chat on Mrs. EVANSON, in his "Dissonance of the Gospels," thinks Luke most worthy of credence. P——said that EVANSON was a lukewarm Christian. I related this to C. LAMB. But, to him, a mere play of words was nothing without a spice of the ridiculous. He was reading with a friend a book of Eastern travels, and the friend observed of the *Mantichas* Tartars, that they must be cannibals. This LAMB thought better. The large room in the accountant's office at the East India House is divided into boxes or compartments, to each of which sit six clerks. CHARLES LAMB himself in one. They are called Compounds. The meaning of the word was asked one day, and LAMB said it was "a collection of simples."

JUNE 21.—A pleasant party at COLLIER'S. LAMB in high spirits. One pun from him at least successful. Punsters being abused, and the old joke repeated that he who puns will pick a pocket; some one said "Punsters themselves have no pockets." "No," said LAMB, "they carry only a *ridicule*."

A GOOD-TEMPERED MAN.

APRIL 28.—ANTHONY ROBINSON relates an anecdote of HORNE TOOKE, showing the good humor and composure of which he was capable. HOLCROFT was with him at a third person's table. They had a violent quarrel. At length HOLCROFT said, as he rose to leave the room, "Mr. TOOKE, I tell you, you are a ——scoundrel, and I always thought you so." TOOKE detained him and said, "Mr. HOLCROFT, some time ago you asked me to come and dine with you; do tell me what day it shall be." HOLCROFT stayed.

A BAD PRECEDENT.

FEB. 9—Dined with WALTER; COMBE and FRASER were there. [Two of the chief writers on the *Times* of that day.] COMBE related an anecdote of Sergeant DAVY. The Sergeant was no lawyer, but an excellent *nisi prius* advocate, having great shrewdness and promptitude. On one occasion Lord MANSFIELD said he should sit on Good Friday, there being a great press of business. It was said no barrister would attend, and in fact no one did; but the Chief Justice tried the causes with the attorneys alone. When the proposal was made to the bar, Sergeant DAVY said to Lord MANSFIELD, "there has been no precedent since the time of Pontius Pilate."

THE RAFFLED SCHOOLMASTER.

LAMB had written to COLERIDGE about one of their old Christ's Hospital masters, who had been a severe disciplinarian, intimating that he hoped COLERIDGE had forgiven all injuries. COLERIDGE replied that he certainly had; he hoped his soul was in heaven, and that when he went there he was borne by a host of cherubs, all fair and wing, and without anything to excite his whipping propensities!

MAGAZINES.

A gentle dullness, well suited to these hot August days, pervades the magazines for September, and few readers will be inclined to quarrel with it. The *Atlantic* alone furnishes a sensational article,—the extraordinary version of the Byron tragedy, which the TIMES has already noticed at length. There is little else in its pages that demands remark, the stories being of the usual character, and the critical articles unmarked by striking or novel views. In the fragmentary study on the "Genius of Doré," Mr. J. J. JARVIS expresses some very true and some very extravagant opinions. His assertion that DORÉ, the greatest master of light and shade this age has seen, is by "instinct a profound colorist, because his nature is profound," is a new and we believe wholly erroneous view of the artist's mind. In the article entitled "A Festival Lot," Mr. HOWELLS uncharitably flashes the light of his witch wit on a group of sorry gossipers who were quietly sinking back into the natural obscurity from which they had briefly emerged.

—Primarily *Appleton's Journal* for the present month is enriched with another newly-discovered manuscript of CHARLES DICKENS CYPHER. Besides the writer's personal recollections of the great eclipse of 1806, New-Yorkers will take an interest in the article on the destruction of the old City Hospital, which revives some elegant and some touching memories of the fine old building, which has just been sacrificed to the demand of business. It is by far the most interesting article in the number. "The Earth in Trouble" is one of those semi-scientific semi-literary articles that appear for months in weekly newspapers and magazines after the occurrence of such convulsions of nature as the terrible earthquake in South America. The stories in the September *Putnam* are certainly quite up to the average of this class of productions.

—*Hours at Home* sustains its reputation as a magazine of "instruction and recreation," with ingredients being mixed in nearly equal quantities. "The First Week of the Telegraph" gives some interesting facts in regard to the introduction of the electric telegraph in this country, and the difficulties with which its early promoters had to contend. Dr. BEARD contributes a valuable scientific article. Miss JULIA WARD HOWE's poem, "The Butterfly and Thistle," contains some pretty fancies and conveys an excellent moral in the closing stanza.

—The *Galaxy* is not sensational this month, but everybody will turn at once to the new installment of CHARLES READE'S story, which is, we think, far superior as a magazine serial to either "Foul Play" or "Hard Cash." READE is the most provoking of all modern novel writers. He is the despair of magazine devourers, for he whets up their appetites to a sharpness which becomes almost distressing in the monthly intervals. Mr. WHITE'S review of LECKY'S History of European Morals is severe, but at the same time displays a just appreciation of the merits of this eminent author. The other articles, the stories and poems, and the editorial departments, present a pleasant variety of reading matter, which calls for no special notice.

—*Lippincott's Magazine*, always neat and attractive in typographical appearance, presents the usual variety of serial novels, short stories, poems and monthly gossip. TROLLOPE'S serial, "The Vicar of Bullhampton," hardly comes under the head of light reading. Why is it that we meet these English names in all our magazines? Have we no American author capable of writing a serial story that an American editor will venture to purchase? They seem to be scarce. DICKENS, READE, TROLLOPE, and a host of others, supply us with stories from the other side of the water, our magazine editors bidding high against each other for their productions. We have not yet had more than two or three first-class American magazine serials.

—*Harper's Magazine* opens with a profusely-illustrated article on Rocky Mountain scenery. Some of the views give a just impression of the grand features of that tremendous range, whose scenery far surpasses that of Switzerland in the elements of strangeness and sublimity. "A Health Trip to Brazil," also illustrated with many woodcuts of scenery and character, will be of use to those who design visiting that country. The article on "Bob White" is interesting to sportsmen chiefly. The editorial departments, especially the "Editor's Drawer," are better than usual, we think, this month.

THE WHISKY TAX.

Taxation on Distilled Spirits—New Regulations.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE, WASHINGTON, Aug. 20, 1869.

I.—USE OF STAMPS.

Under the provisions of the act of July 20, 1868, as amended by the act of April 10, 1869, there are, exclusive of the stamp for stock on hand, three classes of stamps for distilled spirits: 1. Those used for distillers, consisting of the distillery-warehouse and tax paid stamps, 2. Stamps for rectified spirits, to be used for rectifiers; and 3. Wholesale liquor-dealers' stamps, to be used for wholesale liquor-dealers.

All spirits produced are required to be deposited in the distillery warehouse, prior to which they must be drawn into casks containing not less than twenty wine gallons each, and gauged, and the distillery warehouse stamp affixed to each cask. When withdrawn from warehouse the tax-paid stamp must also be affixed, and both of said stamps must remain upon such casks until the spirits therein are emptied or drawn off, when such stamps, with the other marks and brands, must be effaced and destroyed, as required by section 43.

The special brand, however, which, under the provisions of section 39, is to accompany the tax-paid stamp, must not be removed and destroyed, but, when the cask is emptied, is to be canceled by cutting or burning; canceling line across the letters and figures composing such brand in such manner as not to destroy their legibility.

The original packages of a distiller, after removal from warehouse, must, therefore, bear the distillery warehouse and tax paid stamps.

The absence of these stamps from any cask of raw spirits, highwines, or spirits withdrawn from a distillery warehouse, is evidence that there has been a change of package, and the cask in such case must bear the marks and brands required by section 47, which furnish the means for identifying the spirits after such change of package. So long as the original package remains unchanged, and bears the distillery warehouse and tax-paid stamps, no other stamp is required.

Under the provisions of section 29, every package of rectified spirits filled for shipment, sale or delivery on the premises of any authorized rectifier, must be gauged, inspected, marked and branded as hereinafter provided, and have affixed thereto the stamp for rectified spirits. It must be understood, however, that the term rectified spirits as here used in its legal, and not in the ordinary commercial signification, of the term. Any person who purchases tax-paid spirits and redistill or compound, or who produces or refines such spirits by any process, is a rectifier as defined by law; and the spirits so redistilled, compounded, refined, or purified, are rectified spirits, and must bear the stamps for rectified spirits. The term rectifier, as used in these regulations, includes every person who treats distilled spirits by any of the processes the using of which would constitute him a rectifier as defined by section 29 of the act of July 20, 1868, as amended by the act of April 10, 1869.

When a rectifier purchases spirits, and proposes to subject them to any of the processes which would constitute them rectified, he must file with the Collector the notice hereinafter provided for; and, upon emptying the casks, he must erase and destroy the stamps, marks and brands upon such cask, with the exception of the special brand accompanying the tax-paid stamp, which must be canceled as hereinbefore provided. And when he put spirits into casks, after completing his process, such casks must have affixed the stamp for rectified spirits, and this stamp must not be removed until the cask is emptied. The absence of this stamp from a cask of rectified spirits is evidence of a change of package, and will justify a seizure if the package is not marked and branded as required by section 47 but so long as the original cask remains unchanged, no other stamp is required.

A wholesale liquor-dealer is defined to be any person who sells on offers for sale spirits in packages of five gallons and upward; and every cask or package filled for shipment, sale, or delivery, on the premises of any wholesale liquor-dealer, must be gauged and, inspected, and have affixed thereto the wholesale liquor-dealers' stamp.

When a wholesale liquor-dealer receives purchases spirits in the original packages as put up by a distiller or rectifier, properly marked and stamped as such, no regauging or restamping is required. Where, however, he draws spirits from such original packages, and fills other packages for sale, or delivery, the spirits must be regauged, and the stamp for rectified spirits or a wholesale liquor-dealers' stamp affixed, as the case may be; and if such package contains ten gallons or more, it must also be branded and marked as required by section 47. Where a wholesale liquor-dealer purchases packages of rectified spirits, bearing the proper stamps, and, after filling, affixes a wholesale liquor-dealer's stamp, and fulfills all the other conditions of the same section, no other stamp or mark is required.

A neglect or failure to comply with the requirements of section 29, on the part of a wholesale liquor-dealer, rendered him liable to the forfeiture of all spirits owned by him, or in which he has any interest, and to a penalty of $1,000.

The attention of all officers of internal revenue is specially called to these instructions, as much confusion has arisen in consequence of the indiscriminate use of the stamp for rectified spirits and the "wholesale liquor-dealers' stamp. The use of the wholesale liquor-dealers' stamp upon the original packages of rectified spirits put up by a rectifier is improper, and must not be allowed. The term rectified spirits must not be limited to its old commercial sense, but must be construed to cover all spirits included in the definition of section 29.

The provisions of section 47 apply to all cases where distilled spirits are drawn from any cask or package, and placed in any other cask or package containing not less than ten gallons, and intended for sale, without regard to the person by whom, or the place where, such change is made; and the absence of such marks or brands is declared to be sufficient cause of forfeiture.

All distilled spirits on hand, Nov. 1, 1868, and intended for sale, not then in bonded warehouse, were required to be returned to the collector, and stamped with the stock-on-hand stamp; and such spirits so stamped were liable to seizure and forfeiture after Dec. 1, 1868. Where packages of such spirits were properly stamped and marked under the provisions of section 29, no other stamp, mark, or brand is required so long as such package remains unchanged. The absence of this stamp or brand required by law from any package of spirits containing more than five gallons works a forfeiture of the package and contents.

The provision of section 29 is not in conflict with, but in addition to, the requirements of section 47.

If any authorized rectifier fills any package with rectified spirits on his premises for shipment, sale or delivery, without causing the same to be gauged and stamped with the stamp of rectified spirits, or if any wholesale liquor-dealer fills any cask or package of distilled spirits without causing the same to be gauged and stamped with the wholesale liquor-dealers' stamp, he becomes liable to the penalty imposed by section 29, and to the forfeiture of all spirits owned by him or in which he has any interest; and if such packages exceed five gallons, they also become forfeited.

The local officers will be held responsible for the strict enforcement of all the provisions of the law in relation to this subject.

It is known that, in some cases, the wholesale liquor-dealers' stamp has been erroneously attached where the stamp for rectified spirits should have been used under the direct instructions, or with the assent and permission of the Collector of the district; and packages of rectified spirits are now put up in the market with the wholesale liquor-dealers' stamp, without the brands and marks required by section 47, and some seizures have been made of such spirits for the want of those brands. It is not supposed that such indiscriminate seizure or forfeiture will be the rule of all such spirits in this case, but the seizures should be confined to cases where there is other evidence of a change of package, or in cases where the stamps have been attached prior to these instructions. Hereafter, however, the instructions in these regulations will be strictly enforced, and any improperful use of stamps will be at the peril of the owner.

Circular No. 78 is revoked, and the foregoing substituted therefor.

ISSUE OF STAMPS FOR RECTIFIED SPIRITS.

Whenever any rectifier proposes to empty any spirits for the purpose of rectifying, purifying, refining, redistilling, or compounding the same, he will file with the Collector a notice or statement giving the number of casks or packages, the serial number of each, the number of wine and proof gallons in each, the kind of stamps and serial numbers of each, the particular name of such spirits as known to the trade, the proof, by whom produced, the district where produced, by whom inspected, and the date of inspection. This notice will be in the following form:

To ——
Collector ——, District of ——:

SIR—Notice is hereby given that I will empty for the purpose of rectification, (redistilling or compounding, as the case may be,) the following described packages of distilled spirits, to wit: —— barrels, upon which are affixed the stamps, marks and brands:

Serial number cask,	40
Wine gallons,	40
Proof gallons,	84
Serial number warehouse stamps,	125
Serial number tax-paid stamp,	2101
Name of spirits,	Highwines
By whom produced,	Smith & Co.
District where produced,	Sixth Ohio
Date of original gauge,	May 1, 1869
Brand,	Sixth

Destilling in the aggregate —— proof gallons.
Dated ——, 18——.
——, Rectifiers.
No. —— street.

When the process of rectification (including compounding, &c.) has been completed, the rectifier will so notify the Collector, giving the number of proof gallons so rectified, redistilled or compounded, and request that the spirits may be gauged and inspected and stamps issued for the same; and thereupon the Collector will direct a gauger to gauge and inspect the same, and will issue stamps for rectified spirits equivalent to the quantity of spirits, but not in any case to exceed the number of proof gallons stated in the notice of the rectifier as filed in his office. These notices will be preserved and filed by the Collector, and a copy thereof furnished to the Assessor, who, on the 1st of each month, will compare the same with the return of the rectifier.

Collectors will in no instance issue stamps for rectified spirits to any rectifier until this notice is filed with him, and such stamps will be delivered to the gauger, who will attach the same to the barrels or packages.

III.—MARKING AND BRANDING OF CASKS OR PACKAGES OF RECTIFIED SPIRITS.

Under the authority vested in the Secretary of the Treasury and the Commissioner of Internal Revenue by the provisions of the act of July 20, 1868, the following regulations are prescribed for the purpose of securing a uniform and correct system of marking and branding packages of spirits.

I.—RAW SPIRITS.

The term "raw spirits" must be understood as including all spirits in the state in which they are produced by the distiller, all of which must be drawn into the distillery warehouse, and duly withdrawn therefrom upon the payment of tax, and which should, except in cases where there has been a change of package, bear the distillery warehouse and tax-paid stamps.

When such spirits are drawn from the receiving cisterns they must be gauged, proved, and marked, and in addition to affixing the distillery warehouse stamp the gauger must cut upon the bung-stave, in a legible manner, the number of wine gallons, the proof, and number of proof gallons of spirits contained in each cask. At the same time the gauger will cut with a die, or burn upon the head of each cask, its serial number in figures not less than one inch in length, and the serial number of the distillery warehouse stamp in figures not less than half an inch in length, placing the same immediately under the serial number of the cask, as follows:

No. 121.
D. W. S. No. 6789.

When withdrawn from warehouse each cask must, in addition to the tax-paid stamp, have cut or burned upon it the name of the distiller, the district, the date of the payment of the tax, the number of proof gallons, and the number of the tax-paid stamp. This brand may be in accordance with the present regulations, be abridged in the following manner:

John Smith & Co.,
Distillers,
6th dist. O.
T. P. J. No. 1, Stamp P. G. 44,
Stamp 2007.

All of this, except the date, number of proof gallons, and number of the stamp, may be burned upon the cask prior to its being filled at the distillery, and the date and numbers cut with a die at the time the tax-paid stamp is attached. The letters and figures constituting any brand so burnt must be of such size as not less than half an inch in length. In addition to this, the cask must be conspicuously marked or branded with the particular name of the spirits as known to the trade, as "highwines," "rye," "Bourbon," or "pepper distilled" whisky, as the case may be.

When it becomes necessary to change a package in a distillery house, i. e., to draw off the contents of a cask bearing the distillery warehouse stamp and the accompanying marks and brands, and to place the same in a new cask, the spirits must be again gauged, proved, and the number of wine and proof gallons cut upon the bung-staves and upon the head of each cask; the gauger will cut with a die or burn with a branding-iron his name and office, the time and place of inspection, the proof of the spirits, the number of such spirits as known to the trade, the name of the distiller, the distillery where such spirits were produced, and the serial number of the original package, together with the serial number of the warehouse stamp. This brand may be in the following form:

Thomas R. Smith,
U. S. Gauger, 1st dist., Pa.
Insp. May 1, 1869, dist. warehouse No. 16.
Highwines, proof 140.
Richard Roe, distiller,
Distillery No. 16, 1st Pa.
From cask No. 128.
D. W. S. 4068.

Where such change of package is made after the spirits have been withdrawn from warehouse and the tax-paid stamp attached, the cask will be marked, and branded in the same manner, with the addition of the number of proof gallons, the date of the payment of the tax, and the serial number of the tax-paid stamp. This brand may be substantially as follows:

Thomas R. Smith,
U. S. gauger, 1st dist. Penna.
For Scott & Co., wholesale liquor dealers,
10 Water st., Philada., Pa.
Highwines, proof 140.
John Smith & Co., distillers,
Distillery No. 6, 6th dist. Ohio, P. G. 44.
T. P. May 1, 1869, stamp 2007.
From cask No. 98, D. W. S. 4012.

II.—RECTIFIED SPIRITS.

Under the name rectified spirits are included all spirits which, after leaving the hands of the distiller, are treated through cask, redistilled, rectified, compounded, or subjected to any process which shall constitute the person using it a rectifier as defined by law.

Spirits subjected to any of these processes must be put up in casks, inspected and gauged, and, in addition to attaching the stamp for rectified spirits, the gauger will cut upon the bung-stave the number of wine and proof gallons, and mark upon the head of each cask, with a stencil plate, in durable ink, his name and office, the date of inspection, the particular name of such spirits as known to the trade, the proof, the name and place of business of the rectifier, and the serial number of the stamp for rectified spirits affixed thereto. This mark or brand may be substantially as follows:

Thomas R. Smith,
U. S. gauger, 1st dist. Penna.
Insp. May 10, 1869.
Rye Whisky, proof 101.
Greenleaf & Co., rectifiers and wholesale liquor dealers,
16 & 18 South st.,
Philadelphia, Pa.
Stamp No. 4478.

To which the rectifier may add any known trade-mark adopted and used by him; or, where such trade-mark is the distinctive name of the spirits as known to the trade, it may be used as the name of the spirits.

This brand or mark will be understood to represent that the package is a rectifier's original package, and that the spirits contained therein were rectified, refined, purified, redistilled, or compounded, and put up by the party named as a rectifier, and at the place stated in such brand or mark.

When the contents of a cask of rectified spirits are drawn from the original cask or package, and placed in another cask or package containing not less than ten gallons, they must be again gauged and inspected, the number of wine and proof gallons cut upon the bung-stave, and upon the head of each cask must be marked and branded the name of the gauger, the time and place of inspection, the proof of the spirits, the particular name of the spirits as known to the trade, the name and place of business of the rectifier, with the date of the original inspection and the serial number of the stamp for rectified spirits upon the original package. This mark or brand may be substantially as follows:

Amos S. Wright,
U. S. Gauger, 23 District, Ohio.
Insp. May 20, 1869.
For Smith & Co., wholesale liquor dealers,
Cincinnati, Ohio.
Rye whisky, proof 101.
Redistilled by permission of Internal Revenue.
Greenleaf & Co., rectifiers and wholesale liquor dealers,
16 and 18 South street, Philadelphia, Pa.
Orig. Insp. May 15, 1869. Stamp No. 84,378.

III.—WHOLESALE LIQUOR DEALERS.

Wholesale liquor dealers purchase spirits regularly stamped and bearing the marks and brands required by these regulations and sell the same without change, no additional inspection or marking is required. Where, however, they draw from such stamped and branded packages, and all other packages for shipment, sale or delivery, the spirits must be again gauged and inspected, and the wholesale liquor dealer's stamp affixed, and such package must be marked, with the name of the dealer and the particular name of the spirits as known to the trade. Where the package so filled contains ten gallons or more, it must also be branded or marked as required by section 47, substantially as hereinbefore provided in other cases of change of package.

IV.—RETAIL LIQUOR DEALERS.

Retail liquor dealers are only authorized to sell in quantities less than five gallons, and no reinspection or stamping of the packages of spirits so sold by them is required.

The spirits which they purchase must be in packages properly stamped, marked, or branded, and remain in the original casks or packages, and drawn off for sale in such packages, except when it becomes necessary from leakage or other cause to change the package. Where such change is made, such spirits must be again inspected and gauged, and the new package marked in accordance with the provisions of section 47.

All spirits held by any wholesale or retail liquor dealer will be held and taken to be "intended for sale."

In all cases where spirits are inspected and gauged, the number of wine and proof gallons must be cut upon the bung-stave.

V.—REPUTED SPIRITS SOLD BY UNITED STATES MARSHALS.

Under the provisions of section 68 of the act of July 20, 1868, all distilled spirits forfeited to the United States, sold by order of court, whether condemned before or after the passage of the act, are to be sold subject to tax, and the purchaser must immediately and before he takes possession of such spirits pay the tax thereon. And if any tax-paid stamps are affixed to any cask or package so condemned, such stamp must be obliterated and destroyed by the Collector or Marshal after forfeiture and before such sale.

The spirits so sold are subject to this tax without regard to the question whether or not any tax has been previously paid thereon. The tax to be paid is fifty cents per wine gallon when below proof, and per proof gallon when above proof, a fraction of a gallon to be taken as a gallon. This is substantially a new tax accruing upon the sale of such

Commissioners of the Central Park, by a special committee, of the details of the programme for the celebration. It was also resolved to add the President of the Geographical and Historical Societies of this City, and the Director of the United States Assay Office in this City, to the list of invited guests. The meeting then adjourned to Tuesday next.

POLICE TRIALS.

The Calendar and Penalties—Alleged Outrage by a Policeman in Williamsburg.

Commissioner BRENNAN sat yesterday to hear complaints against policemen for violations of the rules, and they were so numerous that the session was protracted until after 11 o'clock. The charges examined were of the ordinary character, being principally for sitting down when on post, being off post, and being late at roll-call. The judgments entered were as follows: Fined one day's pay, 12; fined two days' pay, 9; fined three days' pay, 1; referred to the Board, 3; adjourned, 1; complaints dismissed, 16, and reprimanded 1.

The only case out of the usual routine was that of Patrolman FREDERICK J. POTTER, of the Thirteenth Precinct. It appeared from the testimony that Potter resides in Williamsburg, and has two sons, 18 and 16 years of age, who were engaged in selling tobacco, and established themselves in front of a cigar store kept by a woman. She was considerably annoyed by the presence of the boys, and at last seized their tobacco and took it to the United States Internal Revenue Agent, inviting the boys to go with her, which they refused to do. The boys informing their father of the affair, Potter went to the store and arrested the woman, and took her before Sergeant WRAYN, of the Forty-fifth Precinct, and made a charge of larceny against her. The Sergeant, after investigating the case, refused to entertain the charge, and discharged the woman; but she was again arrested by POTTER and taken before Sergeant HURT, of the same precinct, who also discharged her after examination. It was alleged against Potter, in addition that he had made these arrests, claimed to be entirely unwarranted, in an unnecessarily brutal manner, and Commissioner BRENNAN, in referring the case to the full Board for disposition, remarked that in his opinion Potter had been guilty of a high-handed outrage in making any arrest at all out of his precinct without the order of a superior officer, but especially in making a second arrest for an offence which he knew had been once investigated.

Central Park.

The near approach of the Fall season is gradually bringing back from watering places and sea-side resorts those who are wont to frequent the Park with a degree of regularity during the Spring and Autumn months; and many of the familiar fashionable turnouts, so long absent from their accustomed haunt, are to be seen whirling through the Park drives and thoroughfares. The gradual increase of wealthy population in the Park section of our City has introduced a new feature into this Summer-day's retreat, viz.: the presence of governesses in charge of children. These, in many instances, are French, and wear the peculiar costume which distinguishes them in the promenades of Paris. As usual on Saturdays, weather permitting, there will be music on the Mall at 4 P. M. to-day. The following is the programme:

March—"Concert Signal"..... Gaston
1. Overture, "Fra Diavolo"..... Auber
2. Waltz, "Walnut Grove"..... Dodworth
3. Selection, "Don Pasquale"..... Donizetti
PART II.
4. March, "Sturm"..... Fiehr
5. { A Romance, "Rose Waltz Well"..... Dodworth
{ B Sherry, "The Modena"..... Dodworth
6. Cavatina, "Ah! Fuggitiva Speranza"..... Verdi
7. Gallop, "Will you Dance with Me"..... Dodworth
PART III.
8. Overture to "William Tell"..... Rossini
9. Quadrille, "Compagnes"..... L. Coote
10. Mazurka, "The Bell"..... Dodworth
11. Polka, "Katy Did"..... Fulton
Home Thoughts.

The Twenty-Sixth-Street Sensation—The Accused Surrendered by his Mother.

CHRISTOPHER RAFFERTY, aged 16 years, who is charged with having caused the death of THOMAS DELANEY, another lad, at No. 425 West Twenty-sixth-street, by striking him on the head with a stone, was yesterday surrendered to the authorities by his mother. Since the death of DELANEY, which occurred on Tuesday evening, Officer BUTCHER, of the Sixteenth Precinct, has been in search of RAFFERTY, who managed, however, to elude his pursuers. On Thursday Officer BUTCHER called upon the mother of the lad, who resides at No. 436 West Twenty-fifth-street, and she promised to produce the lad the next morning, and in accordance with the promise she surrendered CHRISTOPHER to this officer at the West Twenty-fifth-street Police Station, yesterday morning. He was brought before Coroner KEENAN subsequently, and remanded to await the result of the inquisition. It is asserted that the two boys, with several other lads, were at the foot of Twenty-sixth-street, North River, when RAFFERTY stripped and went in bathing. While in the water, DELANEY picked up some small stones and threw them into the water and where the prisoner was standing. On leaving the water a quarrel occurred between the lads, which resulted in RAFFERTY throwing a stone at DELANEY, which struck him on the left temple, causing the fatal injury. The accused does not deny that he threw the stone at DELANEY, but disclaims any intention of causing the death of his comrade.

The Water-Street Mission.

This mission has occupied the building No. 278 Water-street, corner of Dover-street, for more than five years past. Captain E. RICHARDSON, of No. 79 Wall-street, is the Chairman of the Board of Management. A mission school, week-day and Sabbath, has been maintained for several years. A recent report says:

"During five years we have held 1,151 meetings, attendance sums up 75,497, of which 22,769 were seamen, 5,283 stood up to be prayed for, and 4,867 signed the pledge of total abstinence from all intoxicating drinks.

During the last three years were given to seamen about going to sea 411 bibles, 3,763 testaments, 2,410 packages of good reading, 75,000 pages of tracts, and a large number of Pilgrim's Progress, Cabin Boy's Locker and God Speaking by Facts."

Coroners' Cases.

An anonymous communication was received at the Coroners' Office yesterday, setting forth that MARY GORMLEY was lying dangerously ill in her apartments on the second floor of No. 128 Eighth-avenue, from the effects of a beating received at the hands of her husband. As the communication was anonymous, no attention was paid to its contents.

SAMUEL MCGORLEY, a homeless vagrant, went into the yard of premises No. 314 Mott-street to sleep, and was found dead there yesterday morning. Coroner KEENAN was notified.

LAW REPORTS.

DECISIONS.

SUPREME COURT—CHAMBERS—AUG. 27.
By Judge Barnard.

Charles Oberlaender et al. vs. Casper Spiera et al.; motion granted.

SUPERIOR COURT—SPECIAL TERM—AUG. 27.
By Judge Jones.

Sandker vs. The Central Gold Mining Company; motion to continue injunction denied and temporary stay vacated, with $10 costs.

Gelts vs. Aylesworth; motion granted so far as to strike out the fifth paragraph of the answer; in all other respects denied, with costs.

Carpenter vs. Brown; motion granted.

Jackson vs. Hamilton; motion granted.

UNITED STATES COMMISSIONERS' OFFICE.
Before Commissioner Shields.

AN IRATE FEMALE CIGAR MAKER.

Deputy Collector Joseph Archibald complained against a woman named Fanny Frankel, residing at No. 203 East Houston-street, yesterday, charging her with having manufactured cigars without a license. He visited her place in company with an "informer," and discovered 200 newly-made cigars in her possession. She refused to obey the revenue officer's orders, and subsequently threw an earthen vessel on the head of the informer as he was in the act of leaving the house. She was committed for examination.

ALLEGED DISHONESTY OF A POST OFFICE CLERK.

Adolphus Weidman, a clerk in the Post Office in this City, was charged by James Gayler, a Special Agent of the Post Office Department, with having used canceled postage stamps in prepayment of postage. He was held for examination.

BRANCH OPERATIONS IN WHISKY.

An examination was commenced yesterday in the case of Nathan Kingsley, prominent in local political circles, accused of having abetted in the removal of five barrels of distilled spirits, which were not properly stamped. James B. Ward, a Revenue clerk, testified that he saw a covered wagon cross the Jackson-street Ferry on the morning of the 3d inst., and subsequently proceed to the white wine and vinegar factory kept by defendant at No. 183 Franklin-street; the driver and another man unloaded five barrels on arriving there, rolling them into the factory. Mr. Kingsley stood on the sidewalk at the time, and made motions to the men. William Ballard, Deputy Collector, testified that he was called to examine the barrels, and that he found them to be improperly stamped; they were found to contain rum or molasses spirits.

The examination was adjourned until the 2d of September, at which time testimony for the defence will be introduced.

SUPREME COURT—CHAMBERS—AUG. 27.
Before Judge Barnard.

DIVORCE—OBJECTIONS TO THE CONFIRMATION OF THE REFEREE'S REPORT.

Helen F. Breese vs. Edward Breese.—This is an action brought by the wife against the husband for the purpose of obtaining a decree of divorce, on the ground of adultery. A large amount of testimony has been taken before the Referee, and to-day the case came before the Court on a motion made by the counsel for the plaintiff to have the report confirmed. Objection was made to the confirmation by Mr. Orlando Stewart, who appeared as counsel for the defendant. It appears from the evidence that the husband is over 60 years, the wife about 23 years; that some time in 1868 the defendant and a lady whom he represented as his sister, stopped at one of the principal hotels in Syracuse, this State. His name was entered on the hotel book as "E. Breese and sister." They occupied adjoining rooms and separate beds. This appears to be about all the evidence there is tending to show adultery. There is no pretence that the lady was a sister of the defendant's. The latter says they never occupied the same rooms, as contended by the other side.

The decision of the Court was reserved.

For plaintiff, Mr. Gleason; for defendant, Messrs. Stewart, Rice and Woodford.

AN INTERESTING QUESTION IN REGARD TO CERTIFIED CHECKS.

On the application of counselors Brideay and Crosby, Judge BARNARD issued an injunction against the Chatham National Bank, at the suit of the Corn Exchange Bank. It appears from the affidavits on which the order was granted, that the Corn Exchange Bank has been in the habit of certifying a limited number of checks for the firm of Hart & Hale, bankers and brokers in Wall-street, beyond the amount of their balance, the firm making sufficient deposits before 3 P. M. to meet all outstanding checks. On Thursday Mr. Julius L. Hart, one of the firm became ill and left the office before 3 o'clock, taking with him the check book and a number of blank checks, one of which he filled up for $10,000 in favor of George S. Hart & Co. After being certified by the Corn Exchange Bank, it was transferred to Geo. S. Hart & Co., who lodged it with the Chatham National Bank, and that institution in the usual course of business, sent the check through the Clearing-house to the Corn Exchange. The latter bank, on receiving it, in the absence of Julius L. Hart, repudiated all liability on account of their certificate. On this state of facts Judge BARNARD granted an ex parte order temporarily restraining the payment of the funds named, now in the hands of the Chatham National Bank.

FRIDAY, Aug. 27, P. M.

Wall-street was favored with two "sensations" to-day, one of which created profound regret, (and to some of them extreme disappointment,) among the friends of the Harvard boys, who were beaten on the Thames this Afternoon. The other made gold rise two per cent. on the lowest sales of the early forenoon. The rumored death of the French Emperor was not generally believed, but the sudden return from her Eastern trip of the Empress to the capital last evening, and the agitation on the Paris Bourse this morning, were sufficient to keep up the excitement in Gold, and to induce the belief that something serious is impending in France. The sales of Gold through the day were 132¾@132⅞@132⅝@132¾@132⅝@132¾ ⅌ cent. up to 3 o'clock. The later quotations are noted below. The London and Frankfort telegrams in regard to the United States Funds reflected no violent fluctuations, and the English Funds were only partially lower. The fall in the French Rente was reported ⅜ ⅌ cent. The rise in Gold here was in part in the nature of a sharp rally from the early morning decline, and heavy sales at the lowest points from yesterday's market, when Gold at one time marked 132¾@132⅞ ⅌ cent. The Foreign Exchanges were in free supply, and the rates, if anything, weaker than on Thursday, on the basis of 109⅝@109⅞ for standard 60 days Bills on London.

In money, on call, among the Brokers, the demand was partially active near the close of Bank hours, at 7 ⅌ cent, although balances were again left with the leading houses at 6 ⅌ cent. The impression is that the Bank return to-morrow Afternoon will be less unfavorable than the last statement, owing to the disbursements from the Treasury in payment of the purchases of Wednesday and Thursday of United States 5-20s for the Sinking Fund.

The Public Funds, although very quiet in the morning, were stronger after 12 o'clock on nearly all descriptions, and there was an advance of ⅛ ⅌ cent. on 5-20s of 1862 and on 10-40s, and ¼@¼ ⅌ cent. on the 1867 5-20s. There was a demand for the Currency 6s ⅌ cents up to 110¼@110⅜ ⅌ cent.; the amount of this Stock in first hands being much reduced, and one or two of the original holders have withdrawn from the market to await considerably higher figures. Among the Gold bearing Bonds the 10-40 years 5 ⅌ cents have the strongest hold on the market, partly from increased favor shown to them abroad and partly from their scarcity here.

There has been some stir in the dealings in Erie Stock, outside the Stock Exchange, on various rumors looking to a so-called "Third Rail" to connect with the traffic of the Lake Shore Road, and to replacing the Stock in the official dealings of the Stock Exchange, by a declaration of the amount outstanding, and its registration with some one of the responsible Trust Companies of this City. The time of such registration is not yet promised or indicated, and the time and cost of the "Third Rail, Narrow Gauge," are roundly stated at twelve months and $5,000,000, to be raised on the credit of the Erie Company. The rumor of the alliance of traffic with the Lake Shore Company was alluded to in our article on "Railway Consolidations" yesterday, but it transpires to-day that no money is promised by that Company to effect a change of gauge on the Erie, nor do we hear that the Lake Shore people are really committed to anything beyond a partial exchange of New-York business as far as the shifting of trains at Cleveland or Dunkirk, without expense, will permit, and a more substantial division, it may be, after the alteration of gauge from Buffalo to New-York *at the cost of the Erie*, will render it practicable. Nevertheless, under these rumors and the further report that the Erie managers, through Mr. MCHENRY, have made overtures to London to purchase the Atlantic and Great Western line, a flurry has been successfully created in Erie Stock on both sides of the Atlantic, one market reacting or sympathizing with the other. The bulk of the stock here is in the hands of the Erie party themselves. They are rumored to have sold 12,000 or 15,000 shares yesterday and to-day. The half-yearly Erie Interest due on Wednesday next, Sept. 1, is $250,000 in New-York, and $150,000 (Gold,) in London. Both sums will no doubt be paid.

In the general Railway market in the forenoon the fluctuations were in the main against the prices of last night, and the speculation in the New-York and Western Stocks was very tame for several hours in the middle of the day. The occasional and contradictory telegrams about the Oxford and Harvard boat race seemed to absorb the whole attention of the Street from 1:30 to 3 o'clock, but later in the day there was a fair demand for Stocks, and New-York Central, St. Paule, Northwests, &c., improved on the morning sales. The Southern State Bonds were steady.

Late in the day the following quotations were made as compared with Thursday night:

	Thursday.	Friday.
United States 10-40s	114⅞	115¼
United States 5-20s of 1862	122¼	122¾
United States 5-20s of 1867	121¾	121¾
American Gold Coin	132	132¾
Bills on London, 60 days	109¼	109¾
New Bonds of Tennessee	63¾	63¾
Virginia Bonds, old	55	55

UNITED STATES TREASURY OFFICE,
NEW-YORK, Aug. 27,

General balance yesterday	$81,229,257
Gold receipts	49,837
Gold payments	39,270
Gold balance	45,045,423
Currency receipts	120,659
Currency payments	1,797,299
Currency balance	5,700,000
General balance	81,161,910
Customs—Duties, &c., in gold, yesterday	450,000

A limited amount of the seven per cent. first mortgage bonds of the Long Island Railroad Company is offered for sale by Messrs. VERMILYE & Co., who speak of them as a very desirable form of investment.

The week's imports of dry goods have been to the specie value of $8,571,867; amount marketed, $6,148,265.

The Cincinnati Price Current of Aug. 25 says:

"The weather has been very hot, the temperature ranging from 80° to 90°, the minimum grade at night; and dead calms a great portion of the time have rendered the heat very oppressive. There have been showers at intervals, which have been of great advantage to the growing crops, so far as they can be benefited, but these showers have not been general, and from many sections complaints of drought of a serious nature are coming to hand daily. Corn, it is now admitted, will be short one-fourth in some places, one-third in others, one-half in many places, and on wold, flat lands, and on some river bottoms, it will be an entire failure. In the vicinity of this city the crop will be a fair one. The late crop of potatoes has been seriously injured. Tobacco in Kentucky, Virginia and Tennessee has suffered seriously from the drought, which has been more severe in those States than in those north of the Ohio River, and there can be no doubt that the crop will fall short of an average. The crops in the States east of the mountains have suffered from the drought to a considerable extent, and corn will be short in New-York, Eastern Pennsylvania, Maryland, and all the States along the Atlantic coast south of the Potomac. The gloomy prospects regarding the supply of new corn prevent farmers parting with old corn, and prices are high, owing to the short supply in the leading markets. Under continued favorable crop news from England and the Continent, and the consequent decline in the prices of breadstuffs in the leading markets in those countries, flour and wheat have been quite dull, and prices have declined decidedly during the week. The crop of wheat in this country, and in Canada is generally good, and the quantity larger made by far than in past years. Unless there is a large European demand, prices must, it is admitted on all hands, rule low, and in view of this the daily news from the English markets is looked for more anxiously than for many years. The receipts of new wheat have already become large, and farmers seem willing to accept a dollar a bushel for it. Corn is in light supply, and distillers being anxious buyers, owing to the large advance in whisky, prices are advancing, and it has been paid for it. The crop of oats is unusually large, and prices are declining, now that it has commenced to arrive more freely."

Messrs. EASTON & CO. have favored us with the annexed Cotton statistics, in advance of the publication of their circular for the current week:

Of the week's business in Hops, Mr. EZRA WELLS writes thus:

"Concerning the market, there is nothing new to report. Continued favorable advices from the growing districts, together with the expectation of early consignments of the new growth, render sales of 100⅝ difficult to make, at almost any sacrifice; our quotations, therefore, for the current week, may be considered nominal. We find a slackness on Monday, and fears of not knowledging receipt of the first bale of new State. This, from the yard of Mr. CHAS. D. PALMER, of Waterville, Oneida County, N. Y. These Hops were in condition to pick on Monday, the 16th inst., but, on account of rainy weather, it was necessary to postpone the picking three or four days. The quality of these Hops fully equal those grown in the same yard last season. We shipped this bale to our London correspondent, and if no misfortune intervenes, it will arrive in London on the 2d of September, and will be the first bale received in that market of this season's growth. We also have the honor of being the recipient of the first bale of new Ohio Hops, grown by the "Hocking Valley Hop Company," at Lancaster, Fairfield County, Ohio. This bale came in on Tuesday, 23d inst. It possesses all the qualities of a fine Hop, and no doubt will give satisfaction to the brewer who uses it. The Company own sixty-five acres of Hops, and represent they have only one-third of a crop. The receipts of new Hops, up to the present writing, amount to twenty bales, of which no sales are yet reported. We hear it intimated that some of the document growers in Wisconsin, who still have their old Hops on hand, design trying the plan of mixing old Hops with new. We earnestly advise all growers who contemplate so suicidal an act, to desist, and not do it. The poorest judge of Hops in this market could at once detect a single pound of old Hops mixed in with a bale of new. In England, the law is very severe upon this point, and growers are required to mark the date of growth on every bale. All frauds in this direction should be punishable by imprisonment or heavy fine. The weather during past week has been everything in favor of the new crop, which still promises to be very superior in quality. The following from the Schoharie (N. Y.) *Republican*, will apply to the whole State: 'Unless "circumstances over which Hop growers have no control" transpire to their detriment between now and picking time, (only a few days,) Schoharie County will be blessed with the largest and best crop of Hops that has been known for a number of years. We have samples in our office that are *se plus ultra*. The quality is excellent, and the yield large. The last number of the Kilbourn City (Wis.) *Mirror* says: 'The Hops have almost entirely disappeared, and there seems to be a growing confidence among the Hop growers that they will escape their depredations the year. Should that be the case, there is strong reason to believe the crop of Hops will be fair as to quantity, and excellent in quality.' Exports last week, 202 bales; receipts, 1,151 bales; total exports for the season from the port of New-York, 69,468 bales. Our London correspondent favors us with the following under date of Aug. 19: 'Since we last wrote, our market has continued very passive, at a decline of from 5s. @6s. ⅌ cwt. on home growths, and 2s. @3s. on American, buyers contenting themselves at present with supplying immediate wants only. Reports from our plantations have been less favorable during the past week, the recent cold nights having checked the fruit of the vine, and lessened the probable yield below half a crop, say 450,000 in old duty, or 300,000 cwts.' Accounts from France and Belgium confirm the improvement noticed in the principal grounds of these districts. Bavaria and Bohemia make but little progress, and, so far, the prospects cannot be said to extend beyond the probability of about one-third of an average crop."

BANKING AND FINANCIAL.

HOWES & MACY, BANKERS,

30 Wall Street, N. Y.

FOUR PER CENT. INTEREST ALLOWED ON DEPOSITS.

The business of this house is the same as an Incorporated Bank.

Persons keeping accounts may deposit and draw as they please, the same as with the City Banks, and will be allowed interest on their daily balances at 4 per cent.

Collections made on any part of the United States or Canada.

Orders for the purchase or sale or the various issues of Government and other Stocks, Bonds, and Gold, promptly executed for the usual commission.

THE KANSAS PACIFIC RAILWAY LOAN.—Secured by a Land Grant of Three Millions of Acres in Kansas and Colorado, a FIRST MORTGAGE upon the proposed extension of the great Kansas Pacific Railway from Sheridin, Kansas, to Denver, Colorado, and a mortgage upon the road now in successful operation for 457 miles, and *earning more than enough to pay the interest on this new loan*. This loan runs thirty years; pays seven per cent.; Principal and Interest PAYABLE IN GOLD. There is no better investment in the market. For Maps, Pamphlets and Circulars, address DABNEY, MORGAN & Co., No. 53 Exchange-place, and M. K. JESUP & Co., No. 12 Pine-st., New-York.

FIRST MORTGAGE SIX PER CENT. GOLD BONDS OF THE ST. LOUIS AND ST. JOSEPH RAILROAD—Principal and interest payable in Coin at the Farmers' Loan and Trust Company, New-York. Total issue, $1,000,000, less than $16,000 per mile, secured by a mortgage on the entire property of the Company. $700,000 have been sold; the balance we offer at 97½ and accrued interest in Currency, and recommend them as a safe and profitable investment.

We cannot return rejected communications, nor preserve manuscripts, unless specially requested so to do.

To Advertisers.

Advertisers in the TIMES are requested to bring in their notices as early as hour in the day as possible. If received after 5½ o'clock, it will be impossible to classify them under their proper heads.

NEWS OF THE DAY.

HARVARD AND OXFORD.

The great international boat race has taken place, and resulted in a victory for Oxford, although it was hoped, almost against hope, that, by some fortunate combination of circumstances, Harvard would come in the winner. The English crew were too strong for the American boys, and at 5 o'clock 36 minutes and 47 seconds, the Oxford boat reached the ship stationed at Mortlake, thus winning the race. The Harvard boat arrived six seconds afterward. The banks of the river for the entire course were lined with countless thousands, and the greatest enthusiasm prevailed. Many arrived on the ground early, and waited the whole day for the start, while the cars from London were almost unable to carry the crowds who desired to witness the contest. The Harvards won the toss, and selected the Middlesex side, (the outside of the circle,) and both boats started at 5 o'clock 14 minutes 6½ seconds—Mr. BLAKIE, the starter, when the boats were ready, giving the signal: "Off, gentlemen." Harvard wore its college colors, magenta, while Oxford donned the blue. The start was even, but in a short time Oxford showed a little ahead. The crews pulled very nearly together for a quarter of a mile, but at Craven Point the blue was half a length ahead. Here the Magentas made a spurt, and came up nearly even, but as they cleared the bridge Oxford took the lead. Harvard putting on 41 strokes to the minute came up to within a yard of her adversary. Oxford pulled a long, steady stroke, 36 to the minute, and was pressed hardly by Harvard all the way to Barnes' Bridge. Here the struggle was apparently over, for the distance between the two boats was nearly three lengths, Oxford leading, which lead she continued to hold, coming in at the finish fully twenty-five yards ahead. At the end of the race SIMMONS fainted nearly away. The whole race was splendidly contested throughout, but the victory from the first was with the English oarsmen. The time made in the race was 21 minutes 40½ seconds, and the distance rowed nearly five miles.

EUROPE.

The official journals of Paris deny the report of the failing health of the Emperor. General FAIRE has arrived in Paris, and the Empress EUGENIE has embarked at Toulon for the East.

The Cortes of Portugal closed its sessions on Thursday last with a speech from the King assuring the members that every effort would be made by the Government to restore the financial equilibrium and revive the public credit.

HENRY LEYS, the Belgian artist, died in Antwerp yesterday, aged 64 years.

GENERAL.

The steamer *Cambria*, which was reported as the third steamer getting ashore near Cape Race on the day of the loss of the *Germania* and *Oleopatra*, does not belong to the Hamburg line of steamers, as stated in an extract from a Montreal paper published in the TIMES of yesterday, but to the Glasgow and New-York Steamship Company.

A large firemen's muster took place yesterday at Great Barrington, Mass. A Hudson, N. Y., engine carried off the first prize, $200 in cash.

The Editors' and Publishers' Association of Vermont closed its annual session at Brattleboro yesterday. The old officers were reflected, and St. Albans named as the place of meeting for next year.

The dam at Fort Edward, Washington County, was washed away last Tuesday, and it will cost $20,000 to repair damages. The loss occasioned by the stoppage of work in the mills, foundries, machine shops, &c., it is said, will amount to $200,000. Two-thirds of the working classes of the village are thrown out of employment.

One span, the longest in the country, 375 feet in length, of the iron bridge over the channel of the Ohio River, was completed yesterday. The whole bridge will be finished in November.

A dispatch received from Washington says Secretary RAWLINS had sufficiently recovered to visit the War Department yesterday morning.

The noted trotting horses *Goldsmith Maid* and *American Girl* will arrive at Lancaster, Penn., next Monday. They are to trot for a $2,000 purse, Sept. 1, on the course of the Lancaster Park Association.

A daughter of Colonel HENRY W. GARDNER, of Providence, R. I., was severely burned on Wednesday evening, at the Bay House, Nayatt Point, a lamp in her dressing room setting her ball dress on fire. Her recovery is doubtful.

Two negroes were whipped nearly to death by a band of Ku-klux near Smyrna, Rutherford County, Tenn., on Wednesday night last. On Tuesday a negro was killed in Marshall County, Ala., because he voted the Conservative ticket.

The base ball match in Philadelphia yesterday, between the Keystones of that city and the Mutuals of New-York, resulted in a victory for the New-Yorkers.

The President is expected to be in Saratoga to-day.

It is now announced that Governor SENTER, of Tennessee, will convene the old Legislature early in September to ratify the Fifteenth Amendment. He takes this course at the earnest request of the Conservative Republicans of the State, who fear that the Legislature recently elected will be so manipulated as to prevent a ratification of the amendment.

The South Side oil works of Lawrence & Co., in Baltimore, were yesterday damaged by fire to the extent of $4,000; fully insured.

Chief Justice CHASE is reported to have written a letter to a gentleman of St. Louis, in which he says: "I am out of all future political contests, and no one need be jealous of me hereafter."

LEON HYDENBRIGHT, a wealthy chemist of Shortcicke, committed suicide, on Wednesday, by taking morphine.

DAVID HOGAN, foreman on the Hudson River Railroad, was killed at Poughkeepsie, yesterday, by a premature blast.

News from the seat of war in Paraguay, by way of London, represents that a battle was imminent.

A Miss TINNE, an English lady, while traveling in Africa, was murdered, together with her two attendants, by their own camel drivers.

Three adroit burglars at an early hour yesterday morning entered the store No. 207 Eighth-avenue, and abstracted silks worth $3,000, but being surprised immediately upon their exit by a policeman, the property was recovered and one of the burglars arrested.

HON. WILLIAM H. SEWARD, with his party, all well, arrived in Victoria, V. I., on Wednesday, from Alaska.

The Conference of the Methodist Episcopal Church, of California, met at Napa City, yesterday. The attendance was large.

The reported rejection, by the Chinese Government, of the treaty between China and the United States, is discredited at the Department of State, as official information was not long since received that it would be ratified, although there were some objectionable provisions in it.

WILLIAM LAKE, proprietor of a Circus at Grandy, Newton County, Mo., was shot and killed, on the 21st inst., by a man named KILLYON, for being refused admission to the Circus. The murderer escaped and $1,000 is offered for his arrest.

The crops in Arkansas are represented to be in a flourishing condition, the cotton crop especially being unusually large.

The Light-House Board announce a change in the light at Smith's Point, Chesapeake Bay, from a fixed to a revolving light the change to begin at sunset on the evening of September 1st.

The mother of CHRISTOPHER RAFFERTY, aged 15 years, who is charged with having caused the death of THOMAS DELANEY, another lad, by striking him on the head with a stone, yesterday surrendered him to the authorities. He does not deny that he threw the stone, but disclaims any intention of killing DELANEY.

The trial of PERCY B. SPRAG, charged with having prepared fraudulent pay-rolls while acting as United States Weigher, was concluded yesterday. The decision in the case is reserved.

Preparations for the Humboldt celebration are progressing finely. The Turnvereis of this City and vicinity have signified their intention of joining in the parade on the 14th of next month. The officers and sailors of German vessels at this port have been invited to participate.

The usual Saturday afternoon concert on the Mall in Central Park, is announced for 4 P. M. to-day.

In a fight yesterday between JAMES REED and JOHN PERRY, at the corner of Liberty-street and Broadway, the former was knocked down and his skull fractured. He was sent to Bellevue Hospital and the assailant was arrested and locked up.

A new Jewish synagogue, the "Gates of Hope," in Eighty-seventh-street, between Third and Fourth avenues, was yesterday dedicated to religious worship according to the Israelitish formula. The congregation has grown up within four years.

The examination in the Susquehanna Railroad case was continued yesterday in the Supreme Court at Albany. The day was consumed in the examination of a single witness.

The Fenian Congress met again yesterday, and discussed the question of admitting persons not delegates to take part in its proceedings.

The Boat Race.

The two greatest commercial nations of the world were engaged yesterday, not in the usual pursuit of gain, but in watching an extraordinary trial of strength between eight young men. There is no race but the Anglo-Saxon with whom such a competition would have been possible. We may, without boasting, add that only Americans would have traveled three thousand miles from home in order to challenge the strongest crew ever seen upon foreign waters, under circumstances unavoidably adverse to themselves. It was impossible from the first that the conditions could be made quite equal on both sides. The Oxonians are at home on the Thames, and every man in their boat had already taken part in one or more successful struggles with a crew only second to their own. They were animated with all the confidence and buoyancy which a recent victory naturally inspires. They had nothing to learn about the river, and no changes to make in regard to the construction of their boat. Moreover, they had the sympathy of nine-tenths of the spectators with them, and in a trial which imposes the severest strain on all the powers this is an advantage difficult to overestimate. If we reverse the conditions, and suppose the Oxonians to have rowed on the Charles River, there is no one who will not readily admit that the chances at the start would have been against them. When we add to these considerations the additional facts, that the American crew had little more than three weeks active training, that they have been obliged to change their boat twice or thrice, and to recast the crew more than once, and that on the all-important day of the struggle the most powerful man of their number was in ill-health, it becomes evident that defeat never went so near to victory as when the Harvard men came in only a few seconds behind the Oxonians.

There are, perhaps, a few aberrant philosophers in existence who will look down from their serene eminence on this memorable contest, and smile at what they regard as the folly and vanity of mankind. But philosophers never rule the world, and seldom comprehend even the motive-power by which it is governed. If we carefully weighed the conclusions to be drawn from history, we should find that it has been superiority of physical strength quite as much as any moral qualities which has given the Anglo-Saxon race a noble supremacy in the world. A people which looks upon an athlete as a useless incumbrance upon the face of the earth, or as a paradox in nature, is not likely to hold its own for centuries together. It is often alleged that in this country we are too apt to neglect a purely physical training—the systematic and careful development of strength and muscle—in the education of our youth. If that charge were well-founded, nothing could so quickly remove all occasion for repeating it as a contest like that of yesterday. We undertake to say that boat-racing will henceforth be more popular than ever among us. Young men now beginning their college studies will be stimulated to earn the distinction which the Harvard crew so brilliantly won for themselves yesterday in the old and the new world. Emulation of this kind is of the greatest value to a people in an age when the young are thrust into the battle of life before there has been time for a full expansion of their powers. A weak, sickly, flabby race may be a pleasing spectacle to theorists who live chiefly in the clouds, but for the destiny yet lying before us we cannot have too many of the attributes which are popularly included in the word "manliness." There are situations in which "mind" can do nothing, and we are forced to base our hopes upon "matter." An international boat race between nations like the American and the English cannot, therefore, be regarded as a trivial incident. We are unable, indeed, to regard a single trial of the kind as a decisive test of the superiority either of a race and breed, or of a system of rowing. But it challenges the world to admire physical pluck, endurance, hardiness, a sound constitution, and other gifts which we were intended to cultivate and rejoice in no less than in the pretentious intellectual forces. How many men are there on either side of the Atlantic whose nerves would have enabled them even to begin the task which these young men from Harvard nearly carried to a successful issue yesterday?

The first great contest for victory between representatives of an American and an English University will necessarily become memorable in history, and we are heartily proud of the record which the Harvard crew made for themselves. For a long distance they took the lead and kept it. When two miles and a half from the starting point they were still level with the Oxonians. It has always been a tradition with an Oxford crew to reserve themselves for the finish, and it is quite evident from the story related elsewhere, that these tactics were pursued yesterday. The Harvard steering had been, we are told, a little wild—nor is this any discredit to the coxswain, who could not possibly know the river so well as the coxswain in the Oxford boat. The Oxonians were at home, comparatively speaking—the Harvard men were on a strange river, among strangers, in a kind of boat to which they are not accustomed; and yet, with all these drawbacks, they made a far better race of it than Cambridge has often done. In 1849 Cambridge was beaten by 30 seconds; in 1849, Oxford was defeated by many lengths; in 1859, Cambridge again lost by 27 seconds; in 1857, by 36 seconds; in 1861, by 48 seconds; and so on for years together. In the very last race Cambridge was defeated by four lengths. We cannot doubt that the Harvard men would have beaten any crew Cambridge could have sent out to meet them. The present Oxford team is admitted on all hands to be incomparably the finest ever produced. It would have been an honor of the very highest kind to have beaten them, but to have clung to them so closely over a course four miles and a half in length was an achievement which covers the young Americans with glory. In common fairness we maintain that the Oxonians ought to give them the chance of a return match. Let the accidents which told in this race against the Americans be courageously faced by the Englishmen. Then the two systems of rowing will have been satisfactorily tested. The Oxonians have shown themselves a spirited foe—it is not too much to expect from them a chivalrous emulation of the course taken by our representatives. If they come over here they will be, during their stay, the most popular men in the country. The whole nation would take a pride in insuring for them generous treatment and fair play. Whether they won or lost the day, their reception would be a thing for them to remember all the rest of their lives. There is no civility or hospitality which has been extended to the Harvard crew which would not be repaid here to the Englishmen four-fold. Let us, then, have another race on the Charles River, or some other suitable water. Two such crews ought not to be broken up without one more trial of strength. We honor the Harvard men for persevering against all difficulties in one of the most gallant contests ever recorded, and we hope that we shall some day have the opportunity of congratulating the Oxonians on a similar exhibition of mettle. Let them return with their American competitors. We engage that they will never repent of the journey.

General Rosecrans Lecturing the Democracy.

General ROSECRANS has done more than decline the nomination for the Governorship of Ohio. He has availed himself of the opportunity which that circumstance afforded to lecture the Democracy upon their departure from the true faith, and indirectly upon the crimes, blunders and follies of the policy he was asked to sustain. He tells his correspondents, the Ohio Committee, that though a Democrat by conviction, he has no liking for many of the principles and tactics of the party as at present managed.

The General deems it necessary to recall attention to principles from which the party has strayed, and traditions on which it now casts dishonor. The secret of its decadence he traces to the influence acquired within the party by "office-seekers and political adventurers," by "fossils and fault-finders" who "ought to go on the retired list."

The hatred of the Democracy to the negro is the subject of another rebuke. All discrimination "based on class, creed, race, color or national origin," he condemns as at variance with the Democratic principle. The maxim he inculcates is "universal freedom, impartial justice, and equality before the law of all who live beneath the flag of our country."

It is on the bond question, however, that General ROSECRANS most decidedly and significantly condemns the policy of his party. He is emphatic in his repudiation of the repudiators. Above all things, the public credit must be preserved untarnished, he tells the men who nominated him. They propose, by a forced construction of the letter of the law, to compel the bondholders to accept greenbacks instead of gold; he insists that the equity, as well as the law of the contract, shall be respected. They have raised the question prematurely, and seek a partisan prejudgment of its merits to excuse an act of robbery; he declares that the duty of the party is to endeavor to "raise higher and higher the public credit," and that no pretence can justify its "whine," or the effort it is making to evade just obligations. In a word, while the Democrats advocate a violation of the contract, and so do their utmost to damage the credit of the country, General ROSECRANS denounces their policy as impolitic and dishonorable, and demands the payment of the bonds in gold.

On the currency, too, he takes issue with them. They uphold a plan which involves the further inflation of the currency, and, consequently, the indefinite postponement of resumption. General ROSECRANS, on the other hand, denounces a currency of this nature as a "gigantic fraud on the people."

Other points in General ROSECRANS' letter well deserve attention. They make manifest a decided want of sympathy with the position and purposes of the Democratic Party, and still further explain his aversion to the nomination he declined to accept. Between his idea of Democracy and the Democracy championed by Mr. PENDLETON there is a chasm which cannot be bridged by any apology or explanation.

Our Northern Neighbors.

The prevalence of an annexation fever in one or another of the British Provinces which skirt our northern frontier, is an incident of which we hear periodically. It is like the large strawberry in early Summer, or the yellow fever in Cuba—something we expect to meet in the newspapers with the regularity of the seasons. There is this difference, however; fevers and strawberries are verities, while an "annexation mania" in Canada usually is either an invention of some enterprising newspaper correspondent, or an accident resulting from exceptional causes and limited to narrow localities. Ordinarily, it is associated with hard times or with anticipated difficulties, warlike or peaceful. The fear of commercial embarrassment as a consequence of the stoppage of reciprocal trade developed a current of annexation sentiment about the time of the expiration of the treaty. The manifest desire of some of our politicians to make capital out of the event, and to force upon the Provinces a political alliance as the price of free commercial intercourse, led to a reaction which made impossible the advocacy of annexation in Canada. It has been a dead subject there from then till now, save in Nova Scotia, where hostility to the authority of the Dominion has familiarized an active and not unimportant party with the idea of alliance with the United States—not as a thing preferred, but as an alternative which the obstinacy of the Imperial authorities may render desirable.

Neither temporary commercial depression nor the excitement of a fierce partisan contest is, however, sufficient to justify a belief in the immediate likelihood of annexation. An event of such magnitude, involving the allegiance of some millions of people as self-reliant as ourselves, can scarcely be precipitated by an accident, whether political or commercial in its character. The alliance, we are persuaded, would be profitable to both parties. Its ultimate consummation we regard as more than probable. But the causes which may be relied upon to effect it are to be found less in transient exigencies than in the half-hidden and enduring influences which beset the infant confederation.

The new Dominion came into existence rich in great expectations. It was looked upon by two of the Provinces—now Ontario and Quebec—as an escape from almost intolerable trouble. It was hailed as the foundation of a new empire, and the source of peace and blessing to colonies previously divided. It was to give them dignity without extravagance, greater strength without a material addition to their burdens. There were drawbacks, even at that early stage, which no careful observer could have overlooked. With all its magnanimity, the British Government had encumbered the arrangement with sundry onerous conditions. It conceded to the colonists full control over their own concerns, but at the same time forced upon them a bargain they could ill afford to ratify. The construction of an Intercolonial Railroad was one of these conditions—the erection of fortifications another. In the case of Nova Scotia, too, there was an additional cause of discontent in the manner in which the new order of things was brought into existence. A change vitally affecting the interests of the Nova Scotians, and in a certain sense their allegiance, was carried into effect, without affording them or their representatives an opportunity of saying yea or nay to its terms. The latter circumstance may prove the foundation of chronic discontent.

The first glory of confederation having passed away, the people concerned are beginning to calculate its cost, and to balance its drawbacks and advantages. They discover that all is not gold that glitters. The old sectional quarrel between Upper and Lower Canada is indeed ended; and that is all. The condition in respect of fortifications is abrogated, but it is at the cost of the withdrawal of the British troops and the intimation that hereafter, in military matters, the colonists must care for themselves. Again, the Central Government, which has grown up at Ottawa, has cultivated dignity with a startling indifference to outlay. The scale of expenditure is more worthy of an European monarchy than of a cluster of imperfectly-developed colonies, whose capital is a backwoods village. It has chosen for the Intercolonial Railroad a route that traverses a region having the fewest possible commercial advantages, and the construction of which will be more costly than that of a line more favorably situated. And though Ontario, which possesses in abundance the elements of a magnificent State, has acquired a local government whose rigorous economy extorts testimony from partisan opponents, its former partner, the Province of Quebec, languishes under a feeble and expensive rule, with no abatement of the old conflict between the French and English-speaking portions of its population.

The confession is heard, therefore, that the experiment of the Dominion, as it is, is not a success. From East and West the same story comes. Leaving out of view Nova Scotia, where peculiar reasons for dissatisfaction exist, we trace a noticeable feeling in quiet Quebec. The *Chronicle* of that city, its leading English journal, declares—according to a telegram—that "there is general dissatisfaction with the present state of things."

"A general longing exists for some change that will brighten our prospects, and if at such a time the feeling of a portion of the Province should take the direction of annexation, it could hardly be surprised at it, though not able to give the movement its approval."

Passing to Ontario, we have the Toronto *Globe*, a journal as pronounced in its loyalty as it is wide in its influence, citing evidences of discontent from Conservative contemporaries. "Whither are we drifting?" is the inquiry propounded, and it is one which relates wholly to the functions and conduct of the Dominion Government.

The future of that Government is further complicated by the acquisition of the vast Northwest Territory. Remote, and for the present accessible only through Wisconsin and Minnesota, the administration of affairs in the territory will be attended with difficulty; the, maintenance of authority there in the event of trouble would be virtually impossible. The attempt to govern it will familiarize the Dominion with responsibilities more serious than any it has yet encountered.

We do not say that all these things make annexation inevitable. It is not for us to put on record prophecies. But enough is apparent to warrant the opinion that the people of the Dominion, in seeking to escape one set of difficulties by confederation, have plunged into other and yet more serious sources of danger and embarrassment.

The Great Need at Our Watering Places.

A correspondent asks for a more specific statement of the nature and uses of a Casino at watering places. We will try to oblige him.

The Casino is an edifice usually placed at the most eligible point, if at the sea-side, for looking upon the sea, and seeing the bathers without embarrassing them; if inland, where it will accommodate the largest proportion of the transient population. It is surrounded with sheltered piazzas large enough to seat all who are likely to visit it at any one time, and where in bad weather, guests can sit or walk in the air.

The interior is supplied with a ball-room of ample proportions, susceptible of being reduced if necessary to the proportions of a concert or lecture room; a reading room supplied with such journals and other periodical literature as are most popular with its habitués, conversation rooms, gambling rooms, if it is the fashion of the people who frequent it to gamble. Sometimes ices and refreshing drinks, curiosities of one sort and another are exhibited for sale. The edifice is usually surrounded by grounds laid out in pleasant walks with such shade trees, shrubbery and flowers as good taste and the resources of the place prescribe, and is, of course, supplied with a band of music which plays every afternoon and evening.

Now the advantages of such an institution are briefly these: It draws away from the hotels what most interferes with their habitability and comfort—all the dancing and music, which are the terror of our watering places to the great majority of guests who desire to sleep at night and not to sleep in the day time. Thousands of people can only command a holiday during Summer from Saturday to Monday. They run with their families to the sea-shore for a breath of pure air and a couple of nights of refreshing sleep. Who can blame their indignation and despair at being kept awake till morning with their families—some of them more than likely invalids—by the infernal carousings of people who have nothing better to do than to turn night into day.

Again, it concentrates the loungers who swarm on piazzas, in the corridors, at the entrances, and in the reception rooms of hotels to get what entertainment they can from staring at others, or what is worse, in propagating scandal about them. It rids the hotels, comparatively, of another large class who go to watering places to get into society. The Casino offers the natural rendezvous for all this class, for there they can see everybody, but under mitigating circumstances. At the hours for gathering at the Casino people are prepared to be seen. They go there to see and be seen; they are prepared, if need be, to be bored, and they can at any moment withdraw without rudeness. There they can meet people without visiting them or incurring the necessity of being visited by them. It is, withal, a pleasant place of rendezvous, where one may spend one or many hours hearing pleasant music, chatting with friends, or reading, with a prospect when he leaves of returning to a quiet home, with no unnatural noises and excitement to disturb its enjoyment.

The hotel proprietors as well as the public would find their account in such an establishment. It would give them each an acre more or less of parlor for private occupancy which has now to be reserved at great expense for these weekly disturbances.

It would spare them the expense of music and weekly festivities, which, for the want of suitable provision elsewhere, must be given at the hotels, and which, of course, by attracting guests from abroad and other hotels, completely derranges all the economies of the house, and makes two-thirds of its guests miserable.

It is precisely the want of the kind of relief we have attempted to describe that renders an American watering-place hotel one of the most vulgar, expensive, uncomfortable and demoralizing habitations that it is possible to conceive of. As a natural consequence, it is a most precarious kind of property. When people who can give character to a watering place discover a pleasant resort the public soon follows, and it becomes fashionable. Then those who came to it for its repose, if they can afford it, seek cottages or abandon the place; they cannot endure the publicity and state of hotel life. When such people quit the hotels, the hotels are no longer attractive to the large class who go to watering places to see the world, make acquaintances and learn the fashions and vices of "good society." The consequence is that the hotels deteriorate and fail. Several of our most fashionable resorts are at this moment in the last chapter of their career. The Casino would restore them at once to their proper uses and to a legitimate prosperity—make them what they should be, the "cottagers' retreat and travelers' home."

But the question may be asked, what is to prevent the Casino from becoming a demoralizing and unsafe resort? We answer that the Casino should be owned and directed by the municipality in which it stands; or better, it should be built and under the control of gentlemen whose names and interests would be a guarantee for its wise and popular management. Twenty men, putting in a thousand or fifteen hundred dollars apiece, could put such an establishment in operation. A small fee for admission, with prices reasonably graded for monthly and season subscribers, would yield a revenue sufficient not only to meet current expenses, but, if required, to pay a handsome revenue to the stockholders, who, however, would derive an abundant compensation from the increased attractiveness and new enjoyments which such an establishment would give to their Summer residence.

We trust another Summer may not pass without a Casino at Long Branch, Newport, Saratoga and Niagara Falls.

A functionary of the French Government (M. RICARD) has been engaged in a commercial exploration of the regions bordering on the Persian Gulf and the river Euphrates, with a view to their being opened up to French enterprise. His report on the subject, which has been published, is very rosy-hued. He speaks of the great desire of the inhabitants for more direct and extensive commercial relations with France, and claims to have secured most valuable concessions from the authorities at several of the principal points and ports he visited. He proposes the establishment of a new steamship company for the navigation of the Persian Gulf, after the completion of the Suez Canal, and he foresees a large amount of travel and of profitable trade. He proposes the formation of commercial posts all over the Persian Gulf, and the leasing of tracts of land, under the authority of the French Government, on the banks of the Euphrates. In these propositions the *Times of India* sees a scheme by which the French Government would attempt the establishment of a French territorial power in Asia; and it calls on the British authorities to watch closely these dangerous movements.

A Welsh member of the British Parliament has announced his purpose of introducing a measure, next session, for the disestablishment of the Episcopal Church in the Principality of Wales. More than three-fourths of the Welsh people are Methodists, who are opposed to the support by the State of the Episcopal Church. We observe, however, that the leading English journals, which favored disestablishment in Ireland, are utterly opposed to it in Wales.

Upon a recent occasion in which there was a rifle-match between the Scotch and English volunteers, the crack rifleman of the Scotch missed fire and lost the day, by the fact of a fly lighting inopportunely on his nose. It was probably some such incident that prevented the triumph of Harvard over Oxford.

THE THEATER.

Fifth-Avenue Theatre—The Comedy of "Play."

There will be a *matinée* at the Fifth-avenue Theatre to-day, when ROBERTSON'S delightful comedy of "Play" will be performed. Very fashionable audiences have filled this elegant dramatic parlor every evening of the present week, and the popularity of the piece will insure its repetition for a series of nights. It is gratifying to see a comedy of this sort obtain such an appreciative reception. For "Play" is not only free from any coarse and vulgar features, but it is also entirely free from any of those low sensational characteristics and accessories which so many playwrights and managers have, in these latter days, considered absolutely necessary for securing attraction and popularity. As a comedy of modern society, it is a genuine display of nature and life;—it is full of vivacity and variety and gaiety, and the audiences have certainly found it one of the most *enjoyable* of the plays of the most refined and delicate of modern dramatists. It would be impossible for a person of cultivation and taste to spend an evening at the theatre more agreeably than in witnessing "Play," at the Fifth-avenue; and, in appealing to people of this class, Mr. DALY deserves to be applauded and generously supported. The piece is better played now than it was at first, and a number of improvements have been introduced and errors corrected. The last act could be amended without difficulty, and it is not yet too late to attend to this point. Of the individual actors we have already spoken, and have nothing to add except to signalize once more the dainty and delightful display of Miss AGNES ETHEL.

The End of the Coal Miners' Strike.

From the Scranton (Penn.) Republican, Aug. 27.

We are satisfied that the arrangement between the Company and men has been made in good faith on both sides, and that mining will be partially resumed this morning, and fully on Monday morning. It is true the vote was participated in by but a part of the Hyde Park miners, but many of those who are away have pledged themselves to abide by the decisions of those remaining here, and those not so pledged will find work resumed before they get home, and will scarcely attempt to stop it. The strike is really and fully ended.

Mr. STORRS informed the Committee that it would take some days to get the mules in, shed, and grained up, but that no time would be lost, and the works should be started next Monday morning. We learn since, however, that all several of the coal openings, there are a few mules, cars, &c., in readiness, and at the request of foremen and miners, Mr. STORRS has given orders for mining to begin at these places this morning, and it is expected that a breaker or two will be started to-morrow. The following Miners' Union notice has been issued:

Notice to the Miners of the District of Hyde Park.

At a meeting to-day in the Cooperative Hall, Hyde Park, a final decision was reached by balloting, and the result is that the basis has been abandoned and Mr. STORRS' proposition accepted.

Work will therefore be resumed without further notice.

THOMAS T. MORGAN, President.
WILLIAM HENNESSEY, Secretary.
HYDE PARK, Aug. 26, 1869.

Everybody is jubilant and congratulatory. Business men smile again. Wives and friends of absent miners were actively telegraphing for them yesterday, and the prospect is that by Monday morning the Delaware, Lackawanna and Wabash Mines will be running with nearly full force, and shooting Schuylkill navies with some of the heaviest shipments on record.

INCIDENTALS.

The Cincinnati *Enquirer* publishes General ROSECRANS' letter, with the remark that it will be more heartily admired for its frankness than approved for its wisdom, and its effect, on the whole, will be to increase, if possible, the general joy of the Democrats that PENDLETON is their candidate.

A warehouseman in Macon, Ga., in packing his sample cotton recently, dropped a check for $160 in it. The bag was packed without discovering the check, and sold to a Philadelphia house. It was resold there to a factory, and when the bale was opened the check was found, and sent to the Philadelphia firm, who returned it to its owner in Macon.

The Board of Regents of the University of Alabama have elected Professor CYRUS NORTHROP, of Yale College, to the Presidency of that institution.

The Atlanta (Ga.) *New Era* tells us an astounding story of a gentleman in that city "who experienced the rare delight of standing within the colors of the rainbow. He could," it says, "move his hand about in them, and enjoyed a very close inspection of the beautiful iris." Had the *New Era* only added that he was enabled to walk around the rainbow and to view it from all sides, its story would have been complete.

President GRANT is to visit Utica during his stay at Saratoga, as the guest of Senator CONKLING.

Colonel J. MADISON CUTTS, brother-in-law of the late Senator DOUGLAS, has written a long letter, which is published in the Chicago *Journal*, in reply to Mr. FARRAR'S article on the Washington lobby in the September *Atlantic*. Colonel CUTTS denies the charge that Mr. DOUGLAS secured the passage of the Indianapolis and Cincinnati Railroad Land Grant bill through Congress by corrupt means, and presents a history of the facts of that grant.

Boston felt peculiarly interested in the international boat-race, and adopted a curious method of announcing the result. If the Harvards were victorious, 1-8 was to be struck by the fire alarm; but as they were defeated, 2-8 was struck. If the Harvards won, the American flag was to be displayed on the top of a pole on Telegraph Hill at Hull; but as the English boat, the flag was run up only half-way of the staff. The Harvard boys assembled in Boston to learn the result, and when it came they did not cheer.

The Richmond *Whig* is not at all pleased at the possibility of the election of ANDREW JOHNSON to the Senate. Conceding his honesty, it contends that it must be admitted that he is a most unfortunate champion for his friends; and it asserts that "the poor South has had enough of his support, and would gladly be delivered of it forever more." It further say that it has more faith in the ability and willingness of President GRANT to aid the South than it has in Mr. President JOHNSON.

The Montreal *Gazette* reports that four officers of the Fifty-third Regiment, who have recently devoted about thirty days to fishing in the Ristiquean, caught 716 salmon, weighing in the aggregate 7,141 pounds.

Hon. DAVID MCDONALD, Judge of the United States District of Indiana, who died in Indianapolis on the 20th inst., was in the 68th year of his age. He had been for fourteen years Judge of the Tenth Judicial District, and was Professor of Law in the Illinois State University. A dispatch to the Cincinnati *Commercial* says he was a strong spiritualist for the past few years of his life, but was "absolved" previous to his death.

The Providence *Journal* describes the meeting between President GRANT and General BURNSIDE as especially cordial on both sides. It also remarks the absence of one of the distinguished Senators of the State from the public reception of the President, and notes that the same gentleman did not hasten to welcome the Vice-President upon his recent visit.

The penalties of being rich and benevolent are not all past endurance. The Richmond *Enquirer* says that "The most noticeable topic at the White Sulphur this Summer is that of the young ladies, some ten days since, vieing with each other to obtain a kiss from Mr. PEABODY, who held a sort of levee for the occasion. It was the last bend of the knee of the South to the North." But why bend their knees to kiss Mr. PEABODY?

The New-York *Sun*, speaking of the drought, said very innocently, and doubtless very truthfully, the other day, that "A part of the bed of the Passaic River, above the falls, is dry, and children play upon it daily." Whereupon the Richmond *Enquirer* remarks: "That bed won't be dry long."

Mr. PACKER, the Democratic candidate for Governor of Pennsylvania, is a native of Connecticut. The Philadelphia *Press* thinks this an objection to him, but a Pittsburg paper, which opposes him on other grounds, says very justly: "The question of State nativity has no more to do with the choice of Governor this Fall, than the startling problem whether the candidate uses 'cavendish' or 'solace.'"

Ex-Governor HENRY A. WISE, of Virginia, has recovered from his recent illness, and is now in as good health as he has been for years.

The New-Bedford (Mass.) *Mercury*, with a slight touch of irony, defends Mr. GEORGE PEABODY against the assaults of WILLIAM LLOYD GARRISON, saying, that in his charities to the South, he bestows them where they are most needed,—that if his benevolence has provided for the whites, that is enough; the colored man need nothing but a fair chance to sustain themselves.

General CASEY recently distinctly declared to a brother of Governor WALKER, of Virginia, his intention and purpose to enforce the test oath upon the members of he Legislature, saying Virginia could not be regarded as a *State de facto* until after her Senators are elected and admitted to their seats. He declined to say whether he would inaugurate the Governor elect before Congress meets.

A Tennessee paper reports that circulars have been sent from Washington to leading Republicans throughout that State, requesting them to meet in council in Nashville on the 20th inst., for the purpose of reorganizing the Republican Party.

The reporter of the Philadelphia *Press* who wrote the account of an interview with Hon. WILLIAM D. KELLEY in reference to the trip of the House Committee of Ways and Means to the Pacific coast, gravely informs us that after accomplishing his purpose in seeking the interview, he "politely withdrew." The assurance of the fact is gratifying to us, as doubtless the act itself was gratifying to Mr. KELLEY.

Laying the Corner-Stone of the New Reservoir Tower.

The ceremony of laying the corner-stone of the High Tower connected with the new reservoir of the Croton Aqueduct at Carmansville, corner of One Hundred and Seventy-second-street and Tenth-avenue, took place yesterday afternoon, and was witnessed by a large number of the residents of Washington Heights, Carmansville, Kingsbridge and vicinity. At the appointed time, 4 o'clock P. M., Commissioner DARRAGH, General G. S. GREENE, Chief Engineer of the Croton Aqueduct; W. L. DEARBORN, Chief Engineer in charge; GEO. CUSHING, Assistant Engineer; JOHN D. BROWN and JOHN WETHERILL, contractors; Messrs. R. L. ROBERTSON, Esq., Clerk of the Croton Board, proceeded to the space, and, with the assistance of the huge derricks, safely deposited the stone in the north-east corner, almost directly over the High Bridge and nearly 100 feet above that celebrated structure. The proceedings were witnessed by a large number of the residents of the upper end of the island. In the copper box were deposited copies of the daily and weekly papers of the City, with the different magazines of the country, together with coins, specimens of currency, &c. After the ceremonies Messrs. DARRAGH, ROBERTSON, JOHN WRIGHT, superintendent of the masonry work, and Ex-Councilman ROSS delivered speeches in honor of the progress of this most important work.

PRINCE ARTHUR.

The Royal Guest at Halifax—His First Arrival and Official Disappearance—The Vice-Regal Reception—Address and Reply—After Dinner—General Impressions.

From Our Special Correspondent.

HALIFAX, N. S., Tuesday, Aug. 24, 1869.

The great day is past, and Halifax, after forty-eight hours of unusual excitement, has resumed its wonted aspect of tranquillity. It is true that a Prince Royal of England is within its walls, but the pomp and circumstance that attended his earliest appearance have vanished, and he now dwells under the Governor-General's roof with seemingly as little desire of self-manifestation as the humblest of his mother's subjects is entitled to. Happily the incidents of his arrival, outlined only by the telegraph, are fresh enough to bear such recapitulation as will keep the temporary importance of Halifax fresh in the mind of the newspaper reader. So these I will rehearse in a story likely to be more coherent at least than was flashed chapter by chapter over the wires.

ARRIVAL.

Some years ago, if I am not mistaken, the Cunard steamships touched regularly at Halifax, after departing from Liverpool on a Saturday about nine days previous. The most rapid trip ever effected was made when one of their vessels reached this port one Sunday afternoon. It was reserved for a steamship of the Inman line to outdo the older line. The *City of Paris* dashed into the harbor soon after 9 o'clock the day before yesterday morning. Aboard of her was Prince ARTHUR, who, contrary to popular belief, had crossed the ocean in quite a democratic manner, that is to say, in close companionship with a good many cabin passengers and a formidable array of inmates of the steerage. He came as an ordinary voyager, only enjoying over the common tourist the advantage of occupying an apartment formed by six staterooms made into one. He breakfasted with the every-day guest, lunched with him, and dined with him, save when prevented from coming forth by the sea sickness from which even Princes are not exempt. When the *City of Paris* neared the wharf on Sunday he was standing on deck with Colonel ELPHINSTONE, his Governor, and Lieutenant PACKARD, his Equerry. His Excellency the Governor-General and his Honor the Lieutenant-Governor were at hand to receive him with a guard from the Seventy-eighth Highlanders. The Sabbath stillness was broken by three cheers from the assembled people, given utterance to just as the Prince was being driven from the pier toward the Government House. Here he passed the remainder of the day.

OFFICIAL REAPPEARANCE.

The experience of that one comedy-character on that particular date ever afterward referred to as "the happiest day of my life," was unquestionably that of each prominent inhabitant of Halifax, yesterday. The town was astir from dawn, and was bright with bunting almost before the sun had dispersed the vestiges of the fog of the night. An American flag floated over the citadel, with a French flag beside it, and an Orange banner was thrown to the breeze in a very retired locality, but the Union Jack was visible at every turn, and made broad triumphal arches over most of the narrow streets. At 10 o'clock, when the sunshine was brightest and warmer than it had been, they tell me, throughout this whole Summer, the town was noisy with the conflict of brass bands attached to the civic and military organizations. Highlanders paced to and fro, scarlet-jacketed soldiers lined the sidewalks, and well-mounted officers trotted about to the imminent peril of the population afoot. The current, of course, flowed to the Dockyard, where the ceremonies of the reception were to take place. These commenced punctually at 12 o'clock. Eight bells were sounded on board the *Revenge* and the *Royal Alfred*, two superb ships of war lying in the stream, just off the shore, and twelve guns were fired, while a band stationed aboard the latter vessel took its theme from OFFENBACH and offered musical reasons for "loving the military." As the sound of the last cannon shot had died away, a boat was pushed off from the Admiral's barge, at anchor between the two vessels, and was propelled toward the shore by a score of sturdy arms. The music of the *maestros* at once modulated into "God Save the Queen," with surprising unanimity, the musicians repeating the national anthem until the Prince was ashore. The formal proceedings were then commenced.

RECEPTION, ADDRESS AND REPLY.

The Dockyard, quite liberally adorned with triumphal arches of evergreen, ended, at the water's edge, in a platform carpeted with scarlet cloth. One square of the tapestry had been removed, and beneath was seen a white marble tablet, with the inscription, "His Royal Highness, the Prince of WALES, landed here July 30, 1860." As Prince ARTHUR appeared he stood motionless on the slab for a few seconds, and then with uncovered head approached the assembled authorities. As he drew nearer, hat in hand, his resemblance to the Prince of WALES was very marked. The same light complexion, prominent nose, good and well displayed teeth, and rather agreeably bewildered expression were noticeable. He was simply and tastefully habited in a blue frock coat, double-breasted, and showing a long black cravat secured with a horseshoe pin of silver set diamonds, and in light trowsers, lilac gloves, and a high straight hat. Gathered to meet him were Governor-General Sir JOHN YOUNG, Lady YOUNG, attired in a blue satin robe with train, Admiral MUNDY, General Sir HASTINGS DOYLE, Vice-Admiral WELLESLEY, Lady WELLESLEY and daughter, Mr. ASHBY, C. B., the Admiral's Secretary, Lieutenant-Colonel BAYNES, Colonel BURNEY, R. E., Colonel GREVILLE, Captains WILSON and BLACK, Lieutenant HOOD, Archbishop CONNELLY, of Halifax, Mayor TOBIN, the City Corporation, and several officers from the French ship *Semiramide*, these including Rear-Admiral MEQUET, Captain FRANCLIEU, and Lieutenants MARCHEVAL, GUERIN and LAPIERRE. After three cheers had been given and a response to them had been made by the Prince in a *Sindbadesque* series of bows, the City Recorder read an address quite inaudibly. The substance of this document, which was superbly engrossed in parchment, and wrapped in purple velvet, has already been transmitted to you. It expressed the satisfaction of the citizens at the Prince's visit, and their gratitude to Providence for the preservation unto them of the Queen. Prince ARTHUR's reply was extremely brief, and was read from a manuscript with perfect clearness of enunciation and a slight emphasis on every other word. Directly the reading terminated, a hasty introduction of the persons present was had, the Prince, who seemed rather embarrassed at first, soon recovering, and exchanging a few remarks in excellent French with the officers of the *Semiramide*.

AFTER SCENES.

The reception ceremonies closed with the procession. First came the Marshal, then the Mayor and Corporation, then the Lieutenant-Governor's staff on horseback, then Prince ARTHUR, mounted, with Governor-General YOUNG at his side, and following their Excellencies, Admiral MUNDY, WELLESLEY and Baron Magnus, the Admiral's staff, officers of the Dominion Government, the Chief Justice and Judges, the Dominion Senators, the Dominion Commons, the Local Legislature, the General and Executive Committee of Management and numerous civic and military organizations. The line of march from the Dockyard to the Government House was through the leading thoroughfares of the town. All were thronged, and as the Prince and his escort advanced slowly from point to point, handkerchiefs were waved and occasional hurrahs, uttered principally by a Masonic body, rose in enthusiastic chorus. The Government House reached, the guard of honor from the Seventy-eighth Highlanders greeted the Prince, who entered the court-yard and reviewed the procession, which filed past him. A few minutes later His Royal Highness entered the Government House and ended the reception by his departure. He remained indoors throughout the evening, while the town, illuminated, was, to use the expression of a chronicler of old, *en grande liesse*, to the blaring of brass bands, the hissing of fireworks and the tumult of a noisy, if peaceable mob. To-night he attends a promenade concert, and to-morrow holds a levee. His after movements have not yet been shaped with any certainty, but it is understood that he visits Charlottetown on Saturday, and returns here on the Tuesday following.

GENERAL IMPRESSIONS.

If Prince ARTHUR's visit to the maritime Provinces of the Confederation was intended to test and strengthen the doubted loyalty of some of the inhabitants, its success or its failure can hardly be pronounced upon at present. His arrival, however, has once more rejuvenated the topics of annexation and confederation, that had lately been set aside. Though the tour has not yet called forth any of those boisterous demonstrations of loyalty which a foreigner would be likely to look for, it has certainly secured for the son of the English Queen a welcome so cordial as rather to weaken confidence in the strength of the annexationists. These, however, urge that the kindness of the welcome grew out of a desire of all parties to assert their allegiance to the Throne, and not in the least to express a willingness to abide, even under the rule of a Prince of the royal blood, by the hated confederation. But there is no need to dwell now on a subject that merits more lengthened treatment than can be accorded it in a simple news letter, and until incidents of greater significance occur than have been recorded since the Prince landed, all discussion can be postponed.

F. A. S.

THE LOSS OF THE GERMANIA.

Particulars of the Disaster—Sufferings of the Passengers—Their Happy Release.

From the Boston Post, Aug. 27.

The fine steamship *Germania*, Captain KIRK, from New-York Aug. 5 for Hamburg, before reported wrecked, had on board several well-known Boston parties as passengers. Letters from them received in this city yesterday, (Thursday, Aug. 26,) state that the steamer had a pleasant run from New-York until Saturday, 8:30 A. M., Aug. 7, when she ran ashore during a thick fog, in Fresh Water Cove, about six or seven miles distant from Cape Race. She went on at the foot of a bluff of rocks, supposed to be from 150 to 200 feet high, and apparently (as seen from the wrecked steamer) almost perpendicular. The rock-bound shore was seen a few seconds before the steamer struck, and the engines were immediately reversed, but headway could not be stopped in season to prevent the disaster.

She did not strike very heavily at first, however, which fact is proved by another, viz.: that many of the passengers (including ladies) were not aroused from their peaceful slumbers. Those who were up and dressed rushed below, and spread the unpleasant intelligence, so that all on board were soon on deck, quite a number in their night habiliments, but excellent order prevailed. The steamer was soon backed off, but while this was being accomplished, she caught to swing around to her port side, and upon a sharp rock, and when the sea lifted her, she came down with a heavy crash, terrifying, of course, all unaccustomed to such scenes. A large hole was stove in the steamer's bottom, when she commenced to sink quite rapidly. The officers remained perfectly cool, and fully realizing the situation, attempted to run her in shore again, but did not succeed in getting in so near the bluffs as when she first struck.

The boats were got out without delay—as the steamer struck about 5:30 o'clock, and about six o'clock the passengers were leaving in the boats, one of which, containing the Boston passengers and others, twenty-three in number, was steered for a time in a westerly direction, a compass having been saved, together with a bottle or two of water and a small quantity of bread. It was proposed to "lay to" to steer for New-York. The majority of this idea was apparent to the majority, who ruled. These sufferings were great for hours, as they were exposed, half clad, to heavy fogs and rain, from 6 A. M. until 2 P. M., when they succeeded in effecting a landing through the breakers, in which they had to wade, and remained all the time, and found themselves in Biscay Bay, some nine miles from where the steamer sunk. The lady passengers were very sea-sick on board the little lifeboat, and were naturally very weak on getting ashore. A fire was built upon the beach, all expecting to remain there through the tedious hours of the coming night; but fortune smiled upon them, and two small houses were soon discovered, whose inmates kindly rendered what assistance they could in getting the sufferers food and dry clothing.

On Tuesday morning the party walked over a very rough road or path, a distance of about four miles, to Trepassy Bay, where they were welcomed on board a French frigate, and arrived at St. Johns, Newfoundland, on the same evening at 6 o'clock. They lost all their baggage. Steerage *Cimbria* has since taken all hands to Europe, as before stated. The rescued passengers seem to think the terrors of a lee shore hard to describe, particularly when the fog is dense and the rocky cliffs are almost directly overhead. Those who are not gifted with fertile imaginations seldom if ever do justice to a situation like that alluded to.

Mr. Peabody's Gift to General Lee's College.

From the Richmond State Journal, Aug. 26.

If all the accounts be true, and we have no reason to doubt their reliability, the recent gift by Mr. PEABODY of $60,000 to General LEE's College at Lexington is likely to prove little more valuable than an undivided interest in an English chancery suit—upon so many doubtful contingencies does it rest. The history connected with it is rather interesting. Many years ago Salmon, Wormser & Co., of Washington City, were appointed agents for the sale of Virginia State bonds, which they disposed of, and then failed. The firm of PEABODY & CO., of London, were their creditors to the amount of $100,000, and also held bonds against the State of Virginia, purchased of them, to the amount of $65,000. In the year 1865 PEABODY & Co. sent over on the steamer *Arctic* all these bonds for collection. The steamer was lost at sea, with all on board, including, of course, the bonds. In 1866 Mr. PEABODY memorialized the Legislature of Virginia for the payment of the $65,000, which was refused. It is this doubtful claim, with the interest accrued thereon, that has been presented to Lee's College. As it has once been repudiated by the State, the difficulties in the way of its collection would seem to be insurmountable.

A Powerful Jump by a State Prison Convict.

From the Boston Journal, Aug. 27.

Wednesday afternoon Officer HALE started from Pittsburg with a fellow named FRANK FRANCIS in charge, who had just been sentenced to the State Prison for four years for pocket-picking. The convict was handcuffed and sat in the smoking car two seats from the door, the officer sitting in the seat opposite him and talking with the conductor. All of a sudden FRANCIS started from his seat, rushed to the door, opened it and jumped from the platform while the cars were going at the rate of forty miles an hour. The officer started and grabbed him by the coat just as he jumped, but his hold failed and the fellow got away. The cars were at once stopped and parties started in pursuit. They found the bushes, and a telegraph pole where he jumped off, covered with blood, but though they searched for hours they could not find the prisoner. The place where he jumped was near Lincoln, in the woods where there is a thick growth of underbrush, in which he probably secreted himself. The impression of those who searched for him, judging from the blood spilled, was that he was so badly injured that he would not live. Warden HAYNES offers $50 reward for his arrest.

TELEGRAMS.

GREAT BRITAIN.

The London Times on the Erie Railroad Scandals.

LONDON, Aug. 27.—The *Times*, in an article on the Erie Railroad scandals, says: "We need not point out the darkest side of the story—the prostitution of justice. The utter contempt for its administration it is plain would be impossible if the violators had not had good reason to believe from past experience that the Legislature is as amenable to corrupt influences as the judiciary. These facts are well known in the States. We are not without hope that consciousness of existing evils will lead to the only way of correcting them."

FRANCE.

Health of the Emperor—Movements of the Emperor—Arrival of General Prim in Paris.

PARIS, Aug. 27.—The official journals denounce as falsehoods the reports that the health of the Emperor is worse. On the contrary, it is much improved, though not completely restored.

The Empress embarked at Toulon to-day for the East.

General Prim has arrived in Paris.

PORTUGAL.

Close of the Session of the Cortes—Speech of the King.

LISBON, Aug. 27.—The session of the Portuguese Cortes closed yesterday. The King, in his speech from the throne, assured the members that the Government was making every effort to restore the financial equilibrium and revive the public credit. The Ministers would consider how to augment the revenues from imports and diminish the expenditures of the Administration. He concluded with the declaration that the independence of Portugal would be sedulously preserved.

BELGIUM.

Death of Leys, the Artist.

ANTWERP, Aug. 27.—HENRIY LEYS, the artist, died to-day, aged 84 years.

AFRICA.

Murder of English Travelers by their Camel Drivers.

LONDON, Aug. 27.—News has been received from Tripoli that Miss TINNE and two attendants were murdered by their own camel drivers while traveling on the Abergouah road, between Murzuk and Ghat.

SOUTH AMERICA.

News from the Seat of War in Paraguay—A Battle Imminent.

LONDON, Aug. 27.—The mail steamer from Rio Janeiro has arrived. She brought as passengers the Duke of SAXE and his wife and the Princess LEOPOLDINE and family.

The latest advices from the seat of war in Paraguay show that a battle was imminent. The land and naval forces of the Allies were in motion. Official dispatches received at the Brazilian War Department announce that General POTRINHO had commenced his march on Villa Rica, and the Brazilian iron-clad fleet was steaming up the Tebicuary to support the army and assist in the attack on Villa Rica.

LISBON, Aug. 27.—Advices from Paraguayan sources contradict the official reports received from Rio Janeiro. The Paraguayans assert that the Allied forces are not strong enough to attack the positions of LOPEZ in the Cordilleras, and that they have remained in a state of complete inaction since they appeared in front.

Rumors were current in Paraguay that a revolution was imminent in the Argentine Provinces against the policy of President SARMIENTO, who is accused of sacrificing the Republic to Brazil.

CUBA.

Landing of Arms by the Insurgents—The Schooner Bringing the Arms Captured by the Spanish Troops.

HAVANA, Aug. 27.—During the months of July and August no vessel-of-war of the United States has touched at the port of Havana.

Intelligence received here from Las Tunas is to the effect that Colonel BENEGAS, with his convoy, had reached that town in safety.

A schooner in the service of the insurgent Government recently landed a cargo of arms at Sevilla Bay, in the southern part of the Eastern Department. The Spanish troops soon after captured the schooner, and at last accounts were hunting for the arms, which had been taken into the Sevilla Mountains adjacent to the bay.

THE PACIFIC COAST.

Arrival and Reception of Mr. Seward at Victoria—Methodist Conference in California—Heavy Rain-storm in Oregon—Observations of the Eclipse at Sitka.

SAN FRANCISCO, Aug. 26.—Hon. WM. H. SEWARD and party arrived in Victoria, V. I., yesterday, from Alaska; all well. The municipal authorities of Victoria to-day entertained Mr. SEWARD at a public dinner, Mr. FORD, Chief Justice of the colony, presiding. Governor MUSGROVE had reached Victoria and assumed the government of British Columbia.

The California Conference of the Methodist Episcopal Church met in Napa City to-day, Bishop KINGSLY presided. The attendance is large.

Heavy rain-storms have prevailed in Oregon recently, and it is feared the wheat crop is seriously injured.

A special dispatch to the San Francisco *Alta California*, from Victoria, says: "The Eclipse Expedition of the United States Coast Survey left Sitka July 18 in an open boat for Chilkah River, and in consequence of bad weather it was eleven days in reaching a proper position on the river—in latitude 59° 22', longitude 135° 25'—only twenty miles from the central path of totality. It was found impracticable to carry instruments and provisions over the Iron Mountain range for the determination of the latitude and longitude and magnetic variation obtained before the date of the eclipse. The 7th of August was the cloudiest day experienced; but breaks in the clouds enabled the party to watch the different phases, and the beginning of the totality was accurately noted. Instantly after the obscuration the "rose-colored flames" were visible with the unassisted eye, and their extent, position, elevation and apparentness measured on the southeast and southwest parts of the sun's limb. The "corona" was visible over a part of the limb only. The whole picture was magnificent. The end of the eclipse was not seen. The phenomena of coming darkness and growing light were very marked along the course of the valley.

Mr. SEWARD and party visited Professor DAVIDSON's camp and watched the phases of the eclipse and saw all the phenomena of the rose-colored flames and the corona. The party on the steamer *Active*, at the mouth of the river, had the best view of the totality. The clouds broke and a large clear space enabled them to see the flames and corona; also the planet Mercury and stars of the fourth magnitude. At Sitka the eclipse was not quite total, and was watched through broken clouds. At Fort Wrangle the weather was densely clouded. At Fort Tongass the weather was favorable and the officer observed the time of the beginning and ending of the eclipse. The Indians were fearfully alarmed and hid themselves in their houses or took to the bushes.

Chief Justice Chase Out of Politics.

ST. LOUIS, Aug. 27.—A gentleman of this city recently received a letter from Chief Justice CHASE, in which he says: "I am out of all future political contests, and no one need be jealous of me hereafter."

Goldsmith Maid and American Girl to Trot at Lancaster, Penn.

LANCASTER, Penn., Aug. 27.—*Goldsmith Maid* and *American Girl* will arrive here next Monday and go into training for the race over the Lancaster County Park Association Course. Sept. 1, for $2,000. Stalls are secured for four thousand, and standing room for fifteen thousand persons.

Working Away of a Dam at Fort Edwards—Heavy Loss and Large Number Thrown Out of Employ.

ALBANY, N. Y., Aug. 27.—The dam at Fort Edwards, Washington County, was washed away last Tuesday, putting a stop to work in all the mills, furnaces, machine shops and potteries. A temporary bridge was also carried away, cutting off communication with the opposite shore, excepting by the railroad bridge. It will take $10,000 to repair the damage to the dam, and the loss of time to the mills will, it is said, amount to ten times as much. At least two-thirds of the working people of the village are deprived of their Summer's work, which was just to commence.

The Indians in Arkansas—Abundant Crops.

WASHINGTON, D. C., Aug. 27.—Parties who have reached here direct from Fort Smith, Ark., report the Indian tribes in that vicinity as very quiet, and industriously engaged in farming operations generally. The crops in that section of the State are in the most flourishing condition, the cotton promising an unusually large yield. The Indians on the Fort Smith Reservation are said to be well pleased with the substitution of the military for civil officials to conduct the business of the Government with them.

Homicide in Missouri—Murder of a Circus Proprietor.

ST. LOUIS, Mo., Aug. 27.—WM. LAKE, proprietor of the Lake Circus, at Granby, Newton County, Mo., was shot, on the 21st inst., by a man named KILLYON, and expired in a few minutes. KILLYON refused to pay for admission to the circus and was ejected by LAKE. Soon afterward KILLYON returned, and, seeing LAKE near the entrance way, drew a revolver and shot him through the body near the heart. In the excitement KILLYON escaped. A reward of $1,000 is offered for his arrest.

The New Bridge over the Ohio.

LOUISVILLE, Ky., Aug. 27.—One of the channel spans of the bridge over the Ohio River, 375 feet long, was completed yesterday. This is the longest span of a truss bridge in the country. The whole bridge will be finished early in November.

A Young Lady Seriously Burned at Nayatt Point, R. I.

PROVIDENCE, R. I., Aug. 27.—Miss EMMA GARDNER, daughter of Colonel HENRY W. GARDNER, of this city, was horribly burned last night at the Bay House, Nayatt Point, by her ball dress taking fire from a lamp on the floor in her dressing-room. Her recovery is doubtful.

Movements of the President.

SARATOGA, N. Y., Aug. 27.—A letter received from General FORTER, the President's Secretary, says that the President will reach here on Saturday and remain several days.

WASHINGTON.

Health of Secretary Rawlins—Revenue Matters—Grounds for Seizures—Circular to Collectors—Miscellaneous.

WASHINGTON, Aug. 27.—About $1,000 in fractional currency was received at the Printing Bureau from the bank-note companies yesterday, and $20,000 to-day.

MORE APPOINTMENTS—RECOVERY OF SECRETARY RAWLINS.

R. W. WILSON has been confirmed as Deputy Collector and Inspector; LLOYD G. THOMPSON as Deputy Collector, and WM. BUTCHER as Inspector, at Rochester, N. Y.

Secretary RAWLINS had recovered sufficiently this morning to visit the War Department for a short time.

MONTHLY DEBT STATEMENT.

From present appearances the forthcoming monthly debt statement will make a very favorable showing, notwithstanding the heavy payments of the Government during the current month. It is now thought the reductions will reach at least $9,000,000.

GROUNDS FOR REVENUE SEIZURES.

The following letter from Commissioner DELANO to Supervisor PERRY, of South Carolina, shows what the Department consider proper grounds for the seizure and detention of goods for alleged neglect or failure to comply with the revenue laws:

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
WASHINGTON, Aug. 27.

SIR: I have received your letter, inclosing a copy of a letter received by you from Collector DONALDSON, of the First District, South Carolina, relative to the detention by him of forty boxes of tobacco, for some informality in the marks required to be printed or branded upon the boxes; also a copy of your letter of instruction to him. You express the hope that your instructions to Mr. DONALDSON, or as you term it, your "suggestions may be approved." In reply, I have to say that while I deem it important that every box of tobacco, in addition to stamps indicating the payment of the tax, should have all the brands and marks which the law requires, and in the precise manner prescribed in the law, printed, marked or posted thereon; that all the facts and information deemed by Congress requisite for complete identification should be upon every box of tobacco, I do not regard it as a good ground for seizure where only slight irregularities are discovered. If a genuine stamp is fixed and canceled, as prescribed by the regulations of this office; if the box or package is such as the law prescribes; and if all the material facts required by sections 52 and 53, printed or posted upon the box or package, the goods should be detained no longer than is necessary to obtain satisfactory explanation for any informality, and to satisfy the officers that no fraud has been committed or intended. I should, however, advise the detention of all goods for explanation which are not packed, stamped, canceled, marked, branded and labeled in strict conformity with the laws and the regulations of this office, made in pursuance of the laws.

C. DELANO, Commissioner.

CIRCULAR TO REVENUE COLLECTORS.

The following is a circular to all Collectors of Internal Revenue in the United States by Commissioner DELANO:

SIR: You will immediately notify any gauger in any district until otherwise instructed, that he will secure every stamp attached to any cask or package of spirits by nailing the same with not less than five tacks, one in the centre and one on each corner of the stamp. The tacks to be used must not be less than six ounce in size, with a large head, and must be securely driven. If practicable to procure them, gaugers should use eight-ounce galvanized copper tacks. The use of tacks will in no manner dispense with any other requirement by prior regulations.

BANK LOCKS.

It is learned that Treasurer SPINNER is not disposed toward making any change in the locks now in use to secure the gold and currency in the Treasury vaults. Those in use at present are considered amply safe to risk any burglarious operations that might be attempted.

CIRCULARS TO NATIONAL BANKS.

The Comptroller of the Currency has prepared a circular to Cashiers of national banks, requesting a detailed statement of the items of which their coin or specie account is composed. The information is desired for general or statistical purposes, and not with any reference to the condition of the banks in this respect. The statement is required from the morning of Sept. 9, next.

LIGHT-HOUSE NOTICE.

Notice is given by the Light-house Board that the present fixed light at Smith's Point, in Chesapeake Bay, near the mouth of the Potomac River, will be changed at sunset on the evening of the 1st of September next, to a revolving white light, with intervals of twenty-five seconds.

The Reported Rejection of the Burlingame Treaty.

To the Evening Post.

WASHINGTON, Friday, Aug. 27.

The dispatch announcing the rejection by the Chinese Government of the treaty negotiated by Minister BURLINGAME with the United States is discredited at the State Department. Official information received here a short time ago was to the effect that the Chinese authorities would undoubtedly ratify the treaty, although there were objectionable provisions in it.

If the treaty has been rejected, Mr. BURLINGAME's friends here say that he will undoubtedly decline to remain longer in the service of the Chinese Government.

Printers' Picnic.

To-day the members of New-York Typographical Union No. 6 will have a picnic festival at Jones' Wood. We hope the day will be auspicious, and that the fraternity will come out in strong force, to have at least a few hours of relaxation from toil and care. We hear that ample arrangements have been made for a really enjoyable and enjoyable festival, and we sincerely hope that the boys and their wives and children, and sweethearts, and all kindly disposed friends may have a thoroughly good time; for, of all craftsmen in the land, they deserve it most.

THE SHAKER SUICIDE.

Interesting Testimony on the Last Day of the Inquest—Complete Exculpation of the Shaker Society.

From Our Own Correspondent.

HUDSON, Friday, Aug. 27, 1869.

You have already received the verdict of the Jury in the case of ELLEN CALVER, the Shaker girl who committed suicide by drowning herself. On the last day of the inquest the following interesting testimony was brought out:

Phebe Rock, affirmed: Saw Ellen Calver last afternoon she was drowned; saw her in the basement of the laundry; I happened to step in and ask her; she took down a pair of tongs and poked in the fire-place, but there was no fire there; she did nothing else and said nothing else; she saw me; she saw no while she was putting the tongs in the fire-place; did not see her do anything else, but I knew she looked very wild; she did not act as usual; she looked very funny in her eyes; she seemed to have gotten into a wild; I was kind of scared at her when I looked at her; she walked across the floor and she did not act as she commonly did; she acted unnaturally; when she walked she beat over to get a stick of wood but she did not get any; I went away and left her in the lower basement of the laundry; then I came back again and she had her bonnet in her hand, and she looked very wild; she was resting her hand on the iron kettle; she was looking all around the room; I had not been gone over five minutes when I came back; I left her there that time; did not see her again; when I went out the first time I did not tell anybody what I saw then; nor when I went out the second time; I told no one till after dinner; after she was drowned I thought of it; it was about half past eleven when I saw her in the laundry; the first time I was there about ten minutes; I went out and staid about five minutes; the last time just long enough to see her standing up—about three minutes.

James Mason, affirmed: Have resided at the North Family of Shakers the last two months; came here last October; left there last Saturday; am 23 years of age; have been instructed how to manage and conduct among the Shakers; you are brought in the Elder's room, and anything they think wrong they tell you of; there are no published orders that I know of; about kneeling; we are told; cannot repeat any of the orders; I understood it was contrary to orders to open my mind out of line of order; contrary to orders to take book without liberty; to have money privately; to shake hands with worldly women without confessing it; to play with cats and dogs; for brother or sister to pass on stairs; to go out of door-yard without liberty unless in case of necessity; to read newspapers; if you make up your mind to go they will try to detain you; they will try to get you to insist upon it; Frederic Evans tried to get out to stay away from here; nothing was offered me not to come here; I was a member of the Society of Shakers at Pleasant Hill, Ky.; went there to see what they were; remained there for two months; have become acquainted generally with their principles; they will hand you the first and second appearing of Christ and other Shaker books; they make great pretensions to chastity; it is preached from morning to night; I know the law of Shakers was violated when I was in the Society in Kentucky; I had been there but a few days when Mollie Slaughter wrote me that she loved me and she hoped I would meet her in the garden; can't say anything of Society at Lebanon in that respect; have seen the Elders and Elderesses going into each other's rooms almost every time of day.

Two Jurors: I could not repeat the rules became I never saw them in print; I met that girl in the garden; they always profess to have revelations; have learned to be a Spiritualist; have been told by Frederic Evans to keep out of the shop of Wm. Carpenter and Augustus Bell, for he thought they could do us good; that we confess sins before they enter, and then once a year; you are expected never to enter meeting without confessing; we make this confession to the Elders; I have known of confessions being disclosed to the Elders; every one in fact is afraid of each other; Elders do not inflict any particular punishment; they do what they call laboring; I have known the boys to be made to eat bread and water, one meal for an offence.

Henry Coren affirmed: Have been with the Shakers five years; was 18 last February; can repeat some of the orders; one order is that no member of the family is to leave the premises without permission of an Elder; no brother or sister shall pass each other on the stairs; no brother to walk past a sister; no member to tell any other member, except the elders, of any trouble they might have; I can say all I recollect; if orders were not complied with I was bound with; I was apprenticed to them; not to any particular trade; have seen boys whipped; in one instance, a boy for laughing; he was struck several times with the hand by Francis Reg, who is dead now; the way he was whipped was to leave the open hand, in the palm; it did not break the skin; the Society are expected to conform to these rules; the leader, Frederic Evans, spends a great deal of the time speaking about chastity; have seen some circumstances that induced me to think chastity was violated; when I left the family I requested me to leave the town; I told him I was subpenaed, and he told me that was no reason why I should remain; he did not want me to leave the Shakers, but I told him I was going; I was bound to Frederic Evans; he told me when I went he would rather give me $20 to go out of town; I told him that to give me $5 to go with; from attending as a witness as I understood it; was subpenaed while I was a Shaker; once before I left the Shakers; (a juror shows a letter to witness;) that is my writing; (The letter is quite affectionate; the writer speaks in terms of warmest praise of Elder Frederic, and expresses a desire to return to the Shakers, if consent will be given by Evans, and otherwise states how wretched he has felt since becoming a worldly man.) I wrote that under the influence of Frederic Evans; I was thinking to me; he wanted me to come back; and I went back; I felt then when I wrote it just as I wrote; that letter was written the 30th of May; when I wrote this I had been away two weeks; I think I received three letters before that was written; Frederic Evans; I was afraid; he used to convert me from getting away; only by operating upon the religious feelings; said it was all withdrawn outside, and all good then; when I first went there it was understood I was to learn a trade; they never have fulfilled it.

The verdict of the jury, that she committed suicide by drowning fully vindicated the action of the Justice of the Peace who held the first inquest, the verdict being the same. The people generally are satisfied, and the Shaker Society is completely exonerated from all unjust charges in relation to the death of ELLEN CALVER.

Be Beautiful.—If you desire beauty you should use HAGAN'S MAGNOLIA BALM.

It gives a soft, refined, satin-like texture to the Complexion, removes Roughness, Redness, Blotches, Sunburn, Tan, &c., and adds a tinge of Pearly Bloom to the plainest features. It brings the Bloom of Youth to the fading cheek, and changes the rustic Country Girl into a Fashionable City Belle.

In the use of the Magnolia Balm lies the true secret of Beauty. No Lady need complain of her Complexion who will invest 50 cents in this delightful article.

Depot No. 21 Park-row, New-York.

Dress your hair with Lyon's Kathairon.—*Advertisement.*

Beware of the Itch

which vermin lay for next year's crop. Cleanse your premises thoroughly with LYON'S INSECT POWDER, and thus prevent the cockroaches, fleas, moth, bugs and other vermin from overrunning you with their broods next year. Lyon's Powder will do it. Nothing else will. Depot, 21 Park-row, New-York.—*Advertisement.*

A Delightful Dream.

A personal trial of the effectual this anæsthetic (nitrous oxide) justifies us in expressing the most hearty commendation of it. An agent which can thus transform an ocean of terrible pain into a delightful dream, or cover a vapor bank of sensation, is truly a priceless boon for suffering humanity. With such a safe and pleasurable relief at hand, and with such experienced and skillful operators as Dr. COLTON and his associates at the Cooper Institute, patients have no longer the slightest excuse for dreading the cold grips of the forceps.—*N. Y. Home Journal.*—*Advertisement.*

REAL ESTATE AT AUCTION.

ROBT. A. HAGGERTY, Auctioneer.

IMPORTANT AUCTION SALE OF COAL LANDS IN PENNSYLVANIA.

ROBT. A. HAGGERTY & CO. No. 21 Pine-st., New-York, will sell on
TUESDAY, Sept. 14, 1869,
at the
EXCHANGE SALESROOM, No. 111 BROADWAY, (Trinity Building), New-York, at 12 o'clock M., the following described valuable coal property, viz.:

This estate, known as "Branchdale," is situated in Schuylkill County, about four miles from Pottsville, and contains 1,000 acres and 100 perches.

There are excellent railroad outlets to market—the Reading and Philadelphia by rail, 103 miles; by canal, 111 miles; and by the new road now in process of completion, the "Union Central"—being connected by the Lehigh Valley, Morris and Essex, and New-Jersey Central Railroads—will have direct communication with New-York City, 137 miles.

A part of this property is valued for farming purposes, and the eastern portion well timbered, (heavy,) suitable for mining purposes.

The whole extent of the property is underlaid throughout by all the anthracite coal veins of the region, both red and white ash, and twenty and a half billions (20,500,000) tons can be made available. Only a small portion of the coal has been mined out, and the best veins are left unexhausted.

There is an opening on the celebrated "Diamond" vein, with the slope sunk fifty yards in good coal.

This colliery has two steam-engines and boilers, pumps, railroad lines, cars and all appurtenances necessary to complete it.

There is a breaker, with engine, boiler, rollers, shaking screens, &c., in perfect working order, awaiting the completion of the slope.

There is a large and substantial mansion-house, thirty miners' houses, two good breakers for breaking and thrashing coal, making in all thirty-six buildings, exclusive of breaker, engine and fan houses.

For an examination of a carefully-prepared brief of title to this property, with all original surveys and patent from the State, map, and for further particulars, in detail, also, for TERMS OF SALE, apply to the auctioneer,
ROBERT A. HAGGERTY & CO.,
No. 21 Pine-st., New-York.

O. H. PIERSON, Auctioneer.

BY A. D. SELLICK, JR., & BRO., Auctioneers and Dealers in New-Jersey Real Estate, No. 22 Pine-st., New-York.

POSITIVE SALE BY ORDER OF S. CAHILL, ESQ., OF 90 VILLA PLOTS,

AT CRANFORD, N. J.,

On THURSDAY, Sept. 2, at 12 M.

These lots are well situated, five minutes' walk north of the station, and in the vicinity of improvements. Payments unusually easy; 10 per cent. and the auction fees on the day of sale, and $10 a month thereafter.

Special train will leave the foot of Liberty-st. at 11 A. M. Collation on the arrival of the train.

Refreshments will be provided; will check all boys and suspicious characters, sure.

For railroad passes, maps and full particulars, apply at the office of the auctioneers.

Free passes can also be obtained at W. D. Bigelow's store, corner of Bond-st. and Bowery, and at Isaac E. Tiers, corner of Broadway and 36th-st., (shoe store,) and at Lovejoy's Hotel, corner of Park-row and Beekman-st.

CORPORATION NOTICE.

SALE OF PROPERTY FOR UNPAID TAXES AND CROTON WATER RENTS.

Public notice is hereby given that a sale of property for unpaid taxes for the years 1864 and 1868, and for regular rents for Croton Water for the years 1868 and 1869, will take place at auction at the City Hall, in the City of New-York, on THURSDAY, the 4th day of November next, at 12 o'clock, noon, and continue from day to day until the whole of said property shall be sold, and that the detailed statement of the property to be sold for unpaid taxes and Croton water rents is published in pamphlet form, and can be seen at the Clerk of Arrears, in the Comptroller's office, also in the office of the Receiver of Taxes of the City of New-York, where the said pamphlets will be delivered to persons applying therefor.

By order of R. B. CONNOLLY,
Comptroller.
A. S. CADY, Clerk of Arrears.
CITY OF NEW-YORK, July 31, 1869. 1y31-1w2mSa

JOSEPH MCGUIRE, Auctioneer.

A MAGNIFICENT SALE OF VALUABLE BUSINESS PROPERTIES FOURTEENTH WARD.

JOSEPH MCGUIRE, auctioneer, will sell on TUESDAY, Aug. 31, at 12 o'clock noon, at the Exchange Salesroom, No. 111 Broadway, by order of the Bondholders, under the direction of Greig Nelson, Esq., referee, the valuable plot of ground, with the buildings thereon, situated on the northeasterly corner of William and New-Chambers-sts., and known as Nos. 1, 3 and 5 Ackerman-place, and No. 240 William-st. Maps at the auctioneer's office, No. 37 Cedar-st., corner Broadway.

BUY AND SELL ON COMMISSION
RAILWAY STOCKS, BONDS AND GOLD,
MAKING LIBERAL ADVANCES.
INTEREST ON DEPOSITS.

GOLD LOAN
OF
The Rochester, N. Y., Water Works Company,
SIX PER CENT. BONDS
DUE 1889,
OF $1,000 EACH.

INTEREST MAY AND NOVEMBER. Principal and interest payable in Gold, at Union Trust Company, New-York.
We offer for sale

$400,000

of this loan at EIGHTY-TWO AND A HALF, and accrued interest in currency.

The entire property is mortgaged to the Union Trust Company for the benefit of the bondholders, and the bonds are issued by them only upon the certificate of John C. Trautwine, C. E., appointed by the bondholders, approved by the Board of Directors, and the Mayor of the City of Rochester, upon the works. Trautwine concludes his report of the Engineers, W. Milnor Roberts and J. C. Trautwine, upon the property, in part, thus: "The value of the entire property, when completed, will be $250,000, and the Company's charter is the only Rochester with water, furnished upon application. Upon the most moderate estimate the rental from the works, when completed, will be

$150,000

annually, double the amount required for interest upon the bonds. Having personally examined the works we can confidently recommend this loan to the public as a safe and profitable investment.

T. L. MOUET, Treasurer.

FINANCIAL.

SEVEN PER CENT. GOLD
FIRST MORTGAGE
CONVERTIBLE BONDS
OF THE
Danville, Urbana, Bloomington and Pekin Railroad Company,
OF ILLINOIS,
PRINCIPAL AND INTEREST PAYABLE IN GOLD AT THE FARMERS' LOAN AND TRUST COMPANY, NEW-YORK. COUPONS PAYABLE APRIL AND OCTOBER.
FREE OF GOVERNMENT TAX.

The Danville, Urbana, Bloomington and Pekin Railroad, upon whose property these bonds are issued, is now in process of completion, its terminal being the Cities of Danville and Pekin, both in Illinois. The length of the road is 117 1-10 miles, its authorized stock $6,000,000. The grading, bridging, and all the work necessary to perfect a complete Railway has been already done, and the whole line is ready for the rails. The road is now in successful operation. The whole road will be completed early the coming Autumn.

These bonds are convertible into stock at par at the option of the holder, and are issued in sums to suit, in the name of the owner at any time if desired. The total amount of bonds is limited to $2,000,000. The security offered is, as we shall show, the very best. Already some nearly equal to one-half the amount of the bonds to be issued have been expended on the road. The bonds, averaging less than $13,000 per mile, are secured by a first mortgage on the whole road and entire property of the Company. The road runs east and west, on the line of the principal and oldest emigrant wagon road in the State, passing through several populous towns and cities, and the richest agricultural district in Illinois—in a word, through the garden of the Garden State. Its local business alone will suffice to make it a first-class paying road, while, with its connections with many important lines, its through business will add to its make it one of the most profitable in the country.

The road will be consolidated with the line from Danville to Indianapolis, making a line of 210 miles. At Indianapolis connections will be made with all the through lines to New-York and Baltimore; at Danville with the Toledo, Wabash and Western. In fact, the road will form a main link in the direct connection between the Atlantic States and the West, in Illinois, with Keokuk and Burlington, Iowa, and thence with Omaha and the Pacific.

It will complete a direct line from Keokuk to Pacific, Keokuk, Burlington, Iowa, and thence by way of Albany, Buffalo, Cleveland, and the Bellefontaine Railroad to Indianapolis and Danville, or via Toledo and Wabash and Western Railroad.

It will form an important line from New-York to the same points West via the New-York Central, Lake Shore and Bellefontaine Roads, to Indianapolis and Danville; or via the First Albany and Great Western, to Dayton, Ohio, and via Indiana Central, to Indianapolis, Danville, Bloomington, &c., as well as from Philadelphia, via the Pennsylvania Central to Harrisburg, Pittsburg, Columbus and Dayton, Ohio.

It will form an important link in the communication of Baltimore and the South with the Great West, the Northwest and the Pacific via Baltimore and Ohio Railroad, to Parkersburg, Cincinnati, Indianapolis, Danville and Peoria.

Thus, with the combined advantages of a certainty of a remunerative local business and a through business, which, as a connecting link to so many diverging and principal lines, it must necessarily have, it is reasonable to presume that the earnings of the road must exceed, in proportion to its length, those of any other railroad in Illinois. The following table shows the earnings of some of the principal railroads in Illinois:

Railroads.	Miles road.	Earnings per mile.
Chicago, Alton and St. Louis....	290	$11,900
Chicago and Northwestern.....	1,192	11,670
Chicago, Rock Island and Pacific	410	10,013
Chicago, Wabash and Western...	188	9,681
Illinois Central.....	705	10,115

It is safe to estimate the receipts of the Danville, Urbana, Bloomington and Pekin Railroad for the first year at $12,000 per mile, or for 117 miles, $1,404,000.

FIRST YEAR.

Receipts, as estimated.....	$1,404,000
Estimated expenses as follows:	
Operating expenses, 50 per cent.....	$702,000
Interest on $2,000,000 gold bonds, 7 per cent.....	140,000
Premium, 40 per cent, on $140,000 gold.	56,000
Sinking Fund.....	56,000
	$954,000
Leaving a net profit over interest and expenses	$450,000

Or over 16 per cent. for dividends on the capital stock the first year of its operation. Without doubt, a progressive increase thereafter; each year would be the result. The peculiarly favorable location of the road is alone sufficient to convince all of its great value and usefulness.

The stock of the Rock Island and the Illinois Central, the Chicago, Alton, Burlington and Quincy Bonds, are all selling at from above par to nearly 200, while none of them are more favorably located, and the competition with either is much greater than the one here. There is no reason why the interest of the road shall not sell as high as either of the above. Hence the privilege of converting these bonds into stock of this Company at par any time desired greatly increases their value.

After having personally and thoroughly examined this road, we accepted the agency for negotiating its bonds. We now offer them to our friends and accounts in currency. With the utmost confidence we recommend them as a reliable and safe security and profitable investment.

At the present price they pay 10 per cent. currency—over 14 per cent. in gold—more than the same amount invested in Five-Twenty Bonds—besides the advantages of being free from tax, and the prospect of a speedy advance in the stock of the road on completion, into which they may be converted.

Government Bonds and Gold received at their market value in exchange without commission. Bonds forwarded free of charge, on receipt of the money.

Full particulars furnished by the undersigned, financial agents of the Company.

SUSQUEHANNA RAILROAD WAR.

The Proceedings in the Supreme Court at Albany Continued—Evidence of W. S. M. Pierson.

Bush vs. *The Albany and Susquehanna Railroad Company.*—The examination in this case was resumed in the Supreme Court at Albany yesterday.

Mr. Pierson stated that he was Secretary and Treasurer of the Albany and Susquehanna Railroad, and had been such since March, 1863; was not a stockholder; as Secretary had had the custody of the books and papers of the Company; did not know where the stock ledgers, transfer books, scrip book and cash book of the Company were; saw them at Mr. Henry Smith's office on the 6th instant; made entries at that time transferring the town of Deanter; saw the books at Mr. Henry Smith's house yesterday afternoon; the cash book was given to Mr. Ramsay some time in the week succeeding Aug. 1; I gave it to him; and saw it on Tuesday of this week in Mr. Smith's library; don't know who took the books from the office of the Company; to the best of my recollection, when I left the Company, in the autumn of 1866, there were taken from the office. I entered the proceedings of the two last meetings of the directors; entries were made in the transfer books and stock ledgers; I caused an entry in the cash book to be made by my assistant, Mr. Van Alstyne, on the 6th of August, crediting the town of Deanter for money paid into the office, in the neighborhood of $1,000; in the transfer books and stock ledgers, since they were removed, entries have been made relative to transfers from different stockholders, to different stockholders of Susquehanna stock; stock has been transferred on the books since they were removed from the office of the Company; I don't remember any person who transferred or any person to whom it was transferred; the subscription books of the Company are in the vault in the office here; I don't think all of them are there; there are quite a number the directors have never returned; no subscriptions have been reported to me on any of those books that have not been returned; in the last annual report the capital stock outstanding is stated at $2,861,266 18; there is more now; there are 9,600 shares issued on the contract of Groesbeck and others; there are between 9,000 and 10,000 shares; I can't give you all the names; Mr. Ramsay has some I think; I don't remember how many; he got them by subscribing in the subscription book; I don't know where the book is; I saw it at Mr. Ramsay's house on the 6th of August I think; there were several subscriptions in it; can't give the amounts; don't remember the names either; Mr. Ramsay was one of them; Mr. Robert H. Pruyn's name was there; can't remember any other names; the total amount of stock subscribed in that book was 9,600 shares; can't tell what was subscribed then; money was paid on the subscription; Mr. Pruyn gave me the money for it on the 8th of August I think; Mr. Pruyn didn't give it, but Mr. Hendricks did, in the form of a draft; it was Mr. Ramsay's sight draft on D. Groesbeck & Co., I think for $100,000; haven't heard from it since; deposited it on 8th of August in Mechanics' and Farmers' Bank; I don't know whether it was signed officially or not; I think it was payable to the order of James Hendricks, and by him indorsed; I deposited it myself; it was not indorsed in the pass book at the time; I didn't have the pass book with me; I don't remember what hour I received the draft from Mr. Hendricks at his bank; Mr. Pruyn was present; Mr. Hendricks said nothing that I remember; Mr. Pruyn said this check was to pay for the subscriptions; on the subscription book that I had seen at Mr. Ramsey's house that evening; I know that another subscription of 5,500 shares was made by Mr. Ramsey in the name of Groesbeck; Ramsey showed me the book; it was not the same book in which the subscriptions were entered; I gave it to Mr. Ramsey, don't remember when or where; the only thing I recollect his telling me was there was nothing paid on that subscription; that is the pass book of the company with the Mechanics' and Farmers' Bank, of Albany; the draft referred to in the entry in the pass book of the company with the Mechanics' and Farmers' Bank, of Albany, under the date of August 8, for the $100,000 was credited at $98,000 by my direction; the balance was to be credited to Mr. Ramsey.

Cross Examination.—Q.—You state that entries have been made in the transfer book, and have mentioned to some extent what they were; was there anything more than the writing up of the book as to the transfer of the stock? A. No, Sir, it was not; I can say that the entries that have been made in the books have been confined to writing up transactions that transpired on or before Aug. 7; it was what I believe was a legitimate discharge of my duty as Secretary and Treasurer of the Company; I understand the purpose and motive for which the books were removed from the office of the Company; there was violence and force shown by one of the directors on the 6th of August, he attempting to take the scrip book from my possession; Jacob Leonard was his name; there was an attempt at mutilation of the books by Mr. Herrick, then Vice-President, writing in the scrip book and filling up certificates of stock to persons that Messrs. Wilber and Leonard claimed to have transfers from certain towns; he insisted upon his right to do so, and to do that while the President himself was in the room; Colonel North said to Mr. Ramsey that he was no longer Director or President, and that he had no business there; Mr. Leonard spoke to the same effect; I also think David Wilbur, too; there was an apprehension that gentlemen who had taken that course, which I have named here to-day, would remove the books; so far as I know, the books removed were for no other purpose than to guard against such a contingency.

Re-direct.—At the time I speak of I have no knowledge that the President, Ramsey, was restrained from acting either as President or Director, except as those men remarked to me; I do not remember their words; I did during this time issue certificates signed by Herrick as Vice-President; not during that morning; I did myself issue certificates signed by Herrick as Vice-President after I was informed by those gentlemen that Mr. Ramsey was suspended or enjoined from acting; since the books were removed I have repeatedly refused to give any information to the Directors of the Company respecting the entries in the books made since they were removed; when I refused I couldn't tell anything about the contents; I have been asked whether new stock had been issued, and did not refuse to answer, but I declined to answer; I have not followed the Directors and acted in the interest of the Ramsey party; Mr. Leonard said he wanted to look at the scrip book; said he would hand it to me after he looked at it; instead of that he handed it to Mr. Herrick, Vice-President; the shares issued on the Groesbeck stock were in place of forfeited stock; since the removal of the books from the Company's office I caused to be made entries relating to the new subscription for ninety-five hundred shares, but before the books were removed entries were made in the cash book relating to the new subscription; they were made on the 8th of August, some time after dinner; my impression is it was done in the evening sometime, here in the office; the office was not then locked; I can't remember the hour; it was not near midnight; I have issued on the contract with Groesbeck & Co. the whole 9,600 shares.

Q.—Have certificates been issued for the 9,600 shares, and, if not, to whom are they still to be issued? A.—To O. D. Ashley 150 shares; on the evening of the 6th there was an entry made in the books at Mr. Smith's office relating to Mr. Ashley's account; on entering, while the books have been away from the office, transfers of stocks, I have entered a transfer of all the stock of which certificates have been surrendered previous to the removal; caused entries to be made; transfers were made and entered of stock surrendered on the 7th of August—not of all.

Q.—Which have you entered, and which have you omitted to enter? A.—I can't tell without seeing the books.

Q.—Have you entered the transfers for the Ramsey party and omitted to make them for the anti-Ramsey party? A.—I have omitted nothing with reference to keeping stock away from either side; my impression is, that the transfers of the Oneonta, Unionville and Davenport stock are not entered; I have given no directions on the subject; I was served with an order of the Court commanding me to deliver the Oneonta stock; I was served with a paper restraining me from refusing to transfer it; I have not discharged it; there is time enough to do it yet; my impression is it has not been done; I have not directed it to be done; I have given no direction about it; my impression is that transfers of the Richmondville and Seward stock are entered, no objection having been made on the other side.

Re-cross by Mr. Smith.—When the injunction was served on me commanding me to desist from transferring or refusing to transfer the Oneonta stock, I had already been served with an injunction restraining me from transferring it; this last injunction was vacated, and an order served upon me vacating it several days ago; when I got down here that morning, the order vacating the injunction was put in my hands; I commenced reading it, and before I got through reading it an injunction was served upon Wilbur, Leonard and Merrick, restraining them from acting as Directors—restraining me from carrying out any of their resolutions; the stock was to be transferred to Wilbur individually, of course.

HEAVY ROBBERIES.

The Confidence Game Successful—An Adroit Street Robbery.

About the 12th inst., THOMAS DAVIS, a resident of California, then stopping at Lovejoy's Hotel, sauntering in City Hall Park, met the plausible stranger, formed an acquaintance that, seemingly, ripened rapidly into intimacy, when, also as usual, the plausible stranger, by the adroit representations common to his race, succeeded in extracting $2,800 in gold from the pockets of DAVIS, and left him to discover at his leisure that he had been fleeced by a sharper. The case was reported to the Central Police Office, and yesterday Detective MCCORD arrested one SAMUEL KING, who is alleged to have been the plausible stranger. The complainant being then inquired for, could not be found, and the presumption was raised that he has returned to California, in which case KING must be released from the cell he now occupies at No. 300 Mulberry-street. The lawyers, however, have already scented the game, and a *habeas corpus* is expected early this morning.

Last evening RICHARD WISNER and wife, returning to their rooms at No. 89 Amity-street, from which they had been absent all day, found that their apartments had been entered with false keys and a trunk containing clothing and jewelry worth $1,000 taken away. Inquiries made by Mr. WISNER proved that about noon a man and woman having rooms in the same house had gone away in a hack with the trunk, and had been driven to a house in West Twenty-seventh-street. These facts being reported to Sergeant FERRIS, of the Fifteenth Precinct, Officer O'REILLY was put upon the case, and discovered that the man had hired rooms in the Twenty-seventh-street house about a week ago, and left a trunk there, but had not been seen again until he came yesterday with the woman and a second trunk. About 5 o'clock in the afternoon he had hired a carriage to go to the Hudson River Railroad train, and as he left the house in it with the woman and the two trunks, it is presumed that he went north on the 3:30 P. M. Express train. Direct trace, however, of the fugitives has been lost, and little hope is entertained that the property will be recovered. The case was reported to Inspector DILKS at the Central Police Office, but he could do nothing more than advise the loser to go at once to Albany, with the hope of intercepting the thieves at that place.

PROBABLE HOMICIDE.

A Boyish Quarrel Results in a Fractured Skull.

About noon yesterday JAS. REED, aged 15, who is reported as belonging to the Newsboys' Lodging House, and JOHN PERRY, aged 17, who resides at No. 69 Greenwich-street, and is a messenger for the Western Union Telegraph Company, met in the hall of the telegraph building corner of Liberty-street and Broadway. A dispute arising between the two boys, it was agreed that they should "have it out" upon the sidewalk, and upon reaching the street a fight immediately ensued. After a few blows had been exchanged, PERRY gave REED a powerful blow, which knocked him down, and his head striking the curb stone with great force resulted in a fracture of the skull. The boy was picked up in an insensible condition and was taken to the Central Police Office, where, upon surgical examination, it was found that the wound was of a very serious if not fatal character, and he was removed to Bellevue Hospital. The boy PERRY having been arrested by Officer LEWIS, of the Twenty-fifth Precinct, was arraigned before Justice HOGAN at the Tombs Police Court, and was committed to await the result of his thoughtless act.

LOCAL POLITICS.

Twentieth District Republican Association.

An enthusiastic and encouraging meeting of the new Union Republican Association of the Twentieth Assembly District was held at No. 1,000 Third-avenue last evening. Mr. CHARLES WATERS presided. About thirty new members were proposed, some of whom were elected.

An address was subsequently made by Hon. S. D. MOULTON, calling attention to the large number of Democrats who hold office under the Federal Government in this City, to the extinction of honest and capable Republicans. He made a motion that the delegates to the Central Committee be requested to inquire into the number and names of the persons holding Government positions in New-York, and to ascertain their *status* as citizens and Union Republicans. The resolution was unanimously adopted.

Dr. THOMAS announced that the Central Committee had already discussed the matter.

Mr. BOGART called attention to the fact that out of the 5,000 men employed at the Navy-yard all were Democrats, with the exception of about 1,400.

The meeting then adjourned until the 10th of September.

Fifth Assembly District Union Republican Association New Central Committee.

A meeting of this Association was held at their headquarters, No. 242 Spring-street, on Thursday evening. The Committee on Reorganization reported the following as the officers of the Association, which report was adopted by acclamation:

President, William F. T. Chapman; Vice-Presidents, John J. Shaw, Daniel Syrrell; Treasurer, John A. Duncan; Secretaries, A. D. Brink, Geo. W. Betts. Delegates to Central Committee—William F. T. Chapman, A. D. Brink, Thomas J. Allison, James Hardy, Edwin J. Love, David J. Oakley, Michael Moran, Robert A. McCready.

After receiving many new members and the proposition of others, the Association adjourned to the first Thursday in September, at the same place.

The Democratic Movement Against Belmont.

The Twentieth Ward Jackson Club, presided over by Mr. THOMAS CORRIGAN, adopted the following resolution, on motion of Mr. JOHN DUFLANY, at their meeting last evening:

Resolved, That the further continuance of Mr. AUGUST BELMONT in the chair of the National Democratic Executive Committee is fraught with great peril to the existence and salutary influence of the party; that inasmuch as he is lethargic in the performance of his official duties, wavering in his political faith, and distasteful to the Irish section of the Democracy, that he be forthwith requested to vacate his position; that WM. M. TWEED is our choice as his successor; and that we heartily approve of the progressive Democratic ideas enunciated by JOHN QUINCY ADAMS, the Democratic nominee for Governor of Massachusetts.

Lock-picking for $1,000.

Mr. JAMES SARGENT, of Rochester, who has succeeded in picking the best combination locks in the Treasury Department, Washington, has offered $1,000 to any one who will pick his newly-patented safe lock within twenty-four hours. And now comes Mr. WILLIAM T. ESSON, of this City, who accepts Mr. SARGENT's offer, and proposes, on certain conditions mentioned in our advertising columns, to operate on the Sargent lock, covering best he can pick it. This matter of lock-picking by experts is becoming decidedly interesting. It is now discussed out discussed between them. Meanwhile the public want to know is any bank lock really safe?

FIRE IN BROOKLYN.

Conflagration in a Coal-Yard and Carriage Factory—Losses About $37,000.

At 5:30 o'clock last evening a fire occurred in the coal and wood yard of TAYLOR, JONES & Co., at the rear of No. 362 Atlantic-avenue, Brooklyn. It appears that the front premises are occupied by HENRY G. POWERS & Co., carriage manufacturers, and that, for purposes appertaining to the business of POWERS & Co., a pot of varnish was being boiled in the coal-yard. This boiled over, and at once set fire to the stock of wood immediately around it. The flames soon communicated with the carriage factory, and, owing to the difficulty encountered by the firemen in getting at the fire, before they could control the flames they extended to three frame tenement houses occupied by a number of colored families, some sheds at the marble works of THOMAS FOLEY, and to the house of ALEXANDER MCLEAN, painter, No. 366 Atlantic-avenue. The tenement-houses and the sheds were destroyed. The colored people lost most of their furniture. HENRY G. POWERS & Co. lost on stock and building $18,000; TAYLOR, JONES & Co. lost $9,000; THOMAS FOLEY lost $600, and ALEX. MCLEAN lost on stock $300. The insurance could not be ascertained last night.

THE PLATE PRINTERS.

Present Aspect of the Strike—What the Company Says—The Men Resolved on Obtaining Better Pay.

On Thursday the plate printers met as usual at No. 18 Seventh-street, and the following was approved of and forwarded:

To the Officers of the National Bank Note Company:

GENTLEMEN: We, the printers lately in your employ, on the suggestion of the Committee that waited on you yesterday, acknowledge the error in the resolution of the 25th inst., and at the meeting held this morning passed the following resolution:

Resolved, That we respectfully ask of the Company an increase of 10 cents per 100 impressions of the fractional currency, which we consider in keeping with the rates formerly paid by them, and that we sincerely regret that any misunderstanding has existed between the Company and its late employes. We trust that the above will show you that we are willing to correct any error and that we are always willing to meet the Company in a friendly spirit.

In reply the following communication was received yesterday afternoon by the Strike Committee:

NATIONAL BANK NOTE COMPANY, No. 1 WALL-STREET, NEW-YORK, Aug. 27, 1869.

Messrs. Glassell, Hewitt and Corr, Committee, &c.:

GENTLEMEN: In acknowledging your communication of the 26th inst. the Executive Committee of this Company beg to assure you that the good feeling therein manifested is thoroughly reciprocated.

We have always all along been satisfied that the withdrawal of so many of our printers would never have taken place but from misapprehension of motives which would never have had existence had the parties have come nearer together and exchanged views in a friendly way, with mutual respect and confidence.

We are slow to believe that gentlemen who have been with us for so long a time can on sober second thought, place such a construction on the disposition of the Company to accord to them equal rights and to do them entire justice.

Although this Company has been greatly inconvenienced and damaged by the untoward and unadvised course recently pursued by so many of its employes, it is far from indulging in any spirit of retaliation, and although we are now meeting the requirements of the Government, we should be glad to see the printers all again at work.

The Company, under existing circumstances, cannot at present change the prices paid for the printing of the fractional currency, though the currency is but a small matter in comparison with other work, in regard to which there is no difference of opinion as to price, nor can the Company make promises in regard thereto to persons not now in our employ further than may be inferred from the acknowledged fairness and justness of the Company in dealing with its employes in the past, which, we trust, may be sufficient guarantee for the future and an inducement for the present for you and others to return to work. It can hardly be necessary to remind our other printers that in "war times" the price of living was not its highest pitch, their appeal for a commensurate increase of price was readily accorded by this Company, and which it has never proposed to modify even in the most stagnant time, when plenty of help might have been substituted at greatly reduced rates. Very respectfully, F. SHEPARD, President Executive Committee N. B. N. Co.

On receipt of the above a motion was made by Mr. SLOCUM to lay the letter on the table, which was adopted, and a reply sent to the Company rejecting all offers of a compromise and stating that the men can hold out a long while yet, and are resolved on obtaining the advance asked. Under these circumstances it is to be doubted if the Treasury Department at Washington will receive the $200,000 per day as stated.

GENERAL ROSECRANS' LETTER.

A Full Exposition of his Position—His Outline of a Platform for a New Departure for the Democracy.

Special dispatches from Columbus, Ohio, to the Cincinnati *Commercial* give the subjoined as a full and correct copy of General ROSECRANS' letter declining the Democratic nomination for Governor of Ohio:

SAN FRANCISCO, Aug. 5, 1869.

GENTLEMEN: On my return to this city, returning from Mexico, Mayor MCCOPPIN, Hon. SAMUEL BUTTERWORTH and Judge MCCLANDES presented me your letter, and very friendly notes from Senators THURMAN and CASSERLY, announcing my unanimous nomination by the Democracy of Ohio as their candidate for Governor in the pending electoral canvass for State officers, and I have carefully read and considered them.

I have likewise conversed with Governor HAYES, who takes great interest in the consolidation of the Democratic organization in Ohio, on the basis of constitutional freedom and progress, which in the past gave unity to a party that has governed the country for more than two-thirds of the period of our national existence, and originated or carried into execution nearly all the great measures which form epochs in our history.

Grateful for the honor of this nomination by the Democracy of my native State, I much regret that imperious duties compel me to decline the canvass, as I telegraphed you yesterday.

Yielding to none in sincere devotion to the democratic representative government, of which I consider our own the best model the world has yet seen, and nearly fifty years with some knowledge of men and some experience in government, I am still a Democrat, from study, conviction and a sentiment of brotherhood with my fellow-men. I therefore deem it a duty, under the circumstances of this nomination, to make a few suggestions as to the fundamental principles which I think ought to underlie every local Democratic platform.

What of old gave the Democratic Party in the United States its prestige and spirit, was its profound faith in the capacity of man for self-government and progress, under institutions based on the great principles of liberty, fraternity and equality before the law, and its courage in carrying the logic of its faith into action. Thence arose that discipline, order and progressive originality which have marked its history, and made its victories many and its defeats only hope to lovers of freedom at home and abroad, while in the nature of things it became the rallying point of office-seekers and political adventurers, whose timid and time-serving counsels sometimes impaired the energy of its action, and paved the vigorous development of its principles. But after a great civil war which has changed the face of politics, the instinctive democracy of the American people remains, and the events of the war have increased its confidence in free institutions and in the capacity of the people to adapt them to the exigencies of a national life. In spite of dreams are after imperialism or consolidation; in spite of those whose only political principles are the apparent expediences of the law, who, knowing that civilized man must have government, are always conniving tricks and schemes to make themselves the favored few ordained to govern, and be paid for it; in spite of those who consider it a weak and failing experiment, the heart of the great body of our people beats warmly, and its judgment moves instinct with its old Democratic feelings and convictions. Appeals should therefore be made to these instincts and convictions by asserting the fundamental principles which ought to govern the future development of this great and free country, and at the proper times and places announcing such measures of policy, based on them, as the exigencies of the nation's life and action may require. The country requires, and the Democratic Party ought to be a party of principle, a party of life, of action, and of progress. Fossils and fault-finders do not properly belong to the party, and if found in it ought to go on the retired list, leaving to its enemies, of all shades and grades, all narrow and sectional grounds, all monopolies and favoritism, based on class, creed, race, color or national origin. The Democratic Party of the United States ought to hold high the banner of universal freedom, impartial justice and equality before the law of all who live beneath the flag of our country.

A fact of our history, expressed on our coat of arms by the words "*E Pluribus Unum*"—many in one—is, that we have grown many distinct substantially self-governing commonwealths, under one country or general sovereignty. To come to my mark, it is the wise, wholesome law that governs the people by states, and the ability of the states to exercise all the powers of their growth and life, of which our written Constitution is but the formal expression, must be preserved. The Union must be broad enough and wise enough to maintain its one without weakening the other. It is the dominant notion of the free principles which give our Democratic representative system its power of expansion, and it must be well to the front of political admiration of European statesmen and philosophers. Leaving the right of self-government to the people, and removing from the states all the burdens of armies, navies, lines of fortifications, diplomatic representatives, consuls, post-office system and the host of offices which follows from protective industry and derive its products in the States of Europe, the revenues, commerce and travel from varying standards of weights, measures and values from state tariffs, passports and spying officialism, and provides that the citizens of one State may obtain redress in the courts of another, and thus, as Calhoun, "Secure by the sanctions of courts of law."

Based on these laws of our law and growth, and repudiating the doctrine that "might makes right," American democracy holds that liberty consists in the obedience of all to just law; that these laws should be the fewest and simplest possible, leaving the utmost individual freedom of thought and action, consistent with equal rights and impartial justice; and where individual action must be regulated by law, seeking always "the greatest good to the greatest number."

This is the Democracy I believe in, and to which I am prepared to bring, if I can, in these few, to indicate, among the measures called for by the present exigencies, the following in reference to the public debt, currency, revenue and protection, class legislation, offices and tenures of executive patronage, suffrage and the caucus system.

The enormous interest on our public debt is producing the most fearful inequalities in the distribution of capital, bringing the Government into the money market as a borrower, at an average of 11½ per cent. per annum, to compete with the private borrower, and moreover giving to bankers holding its bonds, not only the interest, but the right to issue notes on their credit, and use them as money, under the National Banking law. This is forming the very life-blood of capital from the West and South; in fact, from all the extremities where its circulation is especially needed, to the great eastern centuries of capital and speculation, and by putting an arbitrary price on capital in a country where industrial and mineral developments require a great deal of cheap capital, is gnawing at the very vitals of the people. To arrest these devouring evils demands the most prompt redemption of our bonds, according to the law and equity of their issue, and that National Bank notes should be made payable in coin on demand. To effect this we must diminish our expenses at home, establish confidence in our political and administrative ability and increase our credit abroad, and until our bonds in foreign markets are worth what our ability and certainty to pay warrant; and then, from the proceeds and sales of a new issue, bearing a reasonable interest, and subject to reasonable taxation, promptly redeem every existing bond the moment it becomes due. No local declarations inviting a popular prejudgment of any legal questions about the terms of payments of the national bonds should impair the priceless value of the public credit, at a time when it is all-important to create the speediest means of ridding the country of those enormous oppressions; but every Democratic platform should tend to raise higher and higher the public credit, and to satisfy the people of Europe that the Democratic Party is the last party in the United States that proposes to whine or set reluctantly about the payment of the public debt, even though its present holders should have brought it below its fair value.

Second—An irredeemable paper currency, or one perpetually fluctuating in value, is a scourge to the people, a concentration of the profits of fluctuations, false measures, and most injurious to all classes, but especially to those who live by labor.

The Democracy should assert with renewed vigor and determination its old declaration in favor of a specie basis, and a paper currency, convertible at par into coin, at the will of the holder, and should take prompt and effectious measures to raise our bonds to where the security they offer, and the interest they bear, ought to place them so as to draw greenbacks after them to par with the least possible delay. This will relieve all classes, and especially the laboring, and augmenting the value of our circulation twenty-five per cent., give a healthy and vigorous impulse to every department of business and industry.

Third—The fundamental principles of free trade, and that all taxation should fall as directly as possible on all members of society, in proportion to their ability to pay, have always been held by the Democracy. The aim of its legislation must, therefore, be as much as possible to reduce the amount and diminish the number of indirect taxes, and to levy such as are necessary for revenue, having due regard to the principle that the wealth of a nation consisting in its productive industry, whatever lessens the aggregate amount of this in the masses is to be favored, and whatever fosters special kinds and classes, to its detriment, is to be opposed by the Democracy.

Fourth—Democracy opposes all kinds of class legislation, refusing to rob the rich for the benefit of the poor, or the poor for the benefit of the rich; and views with equal abhorrence the partisan of unjust claims and the advocate of the repudiation of just ones. But, knowing that legal provision for the security of private property generally suffices for the protection of the rich, Democracy, without violating individual rights, will always aim to educate and elevate the masses of the people.

Fifth—Offices should be created only when clearly demanded by necessary public business, and such salaries be paid as the nature and importance of the business requires, leaving no just grounds of complaint or excuse for peculation. A policy that leads to or requires the multiplication of offices is anti-Democratic, unjust and dangerous to freedom. A policy which changes men in office for individual profit instead of public good, is a perversion of the principles of business, anti-Democratic, corrupting and perilous to the liberties of the people. Official power is a trust for the common good, which no public officer has a right to use for his private benefit, and whoever does so is a greater scoundrel than he who misapplies funds in his trust, because the official trust is more sacred, and the wrong done more difficult to detect and measure. Whoever obtains the office under false pretences is a baser knave than he who obtains goods under false pretences, and, on account of the greater difficulty of detecting and measuring the evil done, deserves severer punishment and reprobation. Regarding all officers as servants of the people and trustees of power for the country, the Democracy of Ohio will favor such modes of appointments and tenure of office as reason and experience show best calculated to secure good conduct and efficiency in the public service, without regard to private interests, public customs or individual pretensions. Rotation and experience tells conclusively against and needless changes of public officers, and the generally prevailing practice of making them for private benefit, instead of the public good, is acting in great matters of the State and nation on a principle which would ruin any private business, and, unless corrected, will bring the administration of free government into deserved contempt. It is essentially opposed to the principles of democratic government, and it behooves the Democracy of the United States to make war on the practice without truce or delay, returning to the Jeffersonian standard of official qualifications—"To be honest, capable and faithful."

Sixth—The immense increase of national Executive patronage, placing upward of 100,000 offices, besides numerous minor positions of emolument, at his disposal, and the habit of changing the incumbents to secure or reward Executive partisanship, have become dangerous to the liberties of the country, and demand a prompt and efficacious remedy. That remedy, at least in part, and numerous important national advantages may be found by providing that no President shall be eligible for more than one term, without a joint resolution of Congress passed by a two-thirds vote in each House previous to the election declaring the same, and a further provision that the Presidential term shall be extended to six years.

Seventh—The Democratic doctrine of suffrage requires a distinct reaffirmation. Democracy has always held that suffrage is not a natural right of every human being, nor of a particular sex or race, but a political privilege, and who should exercise it, a question to be decided by what will produce the greatest good to the greatest number, and, therefore, as far as possible to be determined locally, where lies the great body of the interest of the people. But in these local discussions the Democratic idea favors a broad rather than a narrow basis of suffrage. It is not unmindful or regardless of the rights of women, of minors, of property and inferior races; but seeing other effective and advantageous ways in which these can have their influence in all legislation affecting their interest, at present it prefers giving the right of voting to manhood and qualifications which will tend to create bonds of political brotherhood between the rich and poor, based on mutual interests, and to avert conflicts between capital and labor. The caucus system, invented by the Democrats, is a practical way of finding out who is a proper person to be voted for, where a constituency is too large to know each other personally, and, in spite of its glaring imperfections and corruptions, now adopted by all parties, should be improved by the Democracy and carefully regulated by wise provisions of law.

These views I believe to be explicitly or inexplicitly held by three-fourths of our voting population, and only require distinct Democratic enunciation to elicit a substantial response from the people, who well know that neither a public policy based on passions nor Radicalism, per se, can long rule without ruining the country, and would be glad to combine for the public good, on grounds that would restore our State and National Administrations to the spirit and practice of democratic, republican simplicity. Should there be Democrats whose mental organization or temper does not permit them to recognize existing facts or conform their action to great popular changes, let them, for the public good, abdicate the leadership, and leave the charge of the people free to act in the line of life and progress. The exceptional political condition of parties, and my desire to recall well-known fundamental principles, and indicate some of the logical consequences and applications in my judgment vitally important to the future of our government, is the sole apology for the length of this letter.

Thanking you for your cordiality and kindness in communicating my nomination, and begging, through you, to thank your constituency for it, I remain, gentlemen, very truly your friend,

W. S. ROSECRANS.

To General G. W. Morgan, General Durbin Ward, Hon. J. H. Heaton, Hon. J. H. Putnam, Hon. Lovelyn Baber, Committee, Columbus, Ohio.

FOREIGN MARKETS.

LONDON, Aug. 27—Noon.—Consols, 93¾ for both money and the account. United States Five-twenties, 1862, 81¾; United States Five-twenties, 1867, 80; United States Ten-forties, 76¼; Erie Railway Shares, 20¾; Illinois Centrals, 96.

LIVERPOOL, Aug. 27—11 A. M.—COTTON—The market opens heavy.

BREADSTUFFS—Corn, 35s. 3d. quarter for European. No. 2 Red Western Wheat, 9s. 6d. 9 cental.

PARIS, Aug. 27.—The Bourse closed firmer; Rentes, 69. 35c.

ANTWERP, Aug. 27—Noon.—Petroleum firm at 54½f. on the spot and afloat.

LONDON, Aug. 27—1:15 A. M.—Consols, 93¾ for money, and 93¾ only for the account. American Securities—United States Five-twenties, 1862, 81¾.

LIVERPOOL, Aug. 27—11:45 A. M.—COTTON—The market is heavy; Middling Uplands, 12¼d.@12½d.; Middling Orleans, 12¼d. The sales of the week have been 32,000 bales, of which 2,000 were taken for Spinners and 1,000 on speculation. The stock in port and on shipboard is estimated at 340,000 bales, of which 65,000 are American.

LONDON, Aug. 27—Noon.—Consols, 93¾ for both money and the account. Erie Railway Shares, 20¾.

LIVERPOOL, Aug. 27—Noon.—BREADSTUFFS—The demand for Wheat continues quiet, but prices show no decline in this market. Corn, 35s. 3d. 9 quarter for Western. Flour, 30s. 6d. 9 bbl. for Western. Canal Wheat, 10s. 3d. 9 cental. California Wheat, 10s. 2d. for No. 2 Red Western.

PARIS, Aug. 27.—The Bourse opened excited; Rentes, 72f. 80c.

HAVRE, Aug. 27.—Cotton opens quiet both on the spot and afloat.

LIVERPOOL, Aug. 27—1 P. M.—COTTON—The stock of cotton found to this port is estimated at 421,000 bales, of which 20,000 were American.

BREADSTUFFS—The receipts of Wheat at this port for the past three days have been 6,600 quarters, of which 5,000 are from America. The Breadstuffs Market is dull.

LONDON, Aug. 27—6 P. M.—Consols, 93¾ for both money and the account. American Securities are quiet: United States Five-twenties, 1862, 81¾; 1865, old, 80¾; 1867, 80¾; United States Ten-forties, 76. The Stock market is dull. Illinois Centrals, 94¾.

PARIS, Aug. 27.—The Bourse is excited. Rentes, 72f. 75c.

LIVERPOOL, Aug. 27—6 P. M.—COTTON—The market has a downward tendency. Middling Uplands, 12¼d.; Middling Orleans, 12¼@12½d. The sales of the day, it is now thought, will foot up 7,000 bales.

BREADSTUFFS—Manchester advices are less favorable and Yarns are lower. Corn is in better demand. Yarns and Fabrics have declined ¼d.

BREADSTUFFS—The market is nominal.

FRANKFORT, Aug. 27—6 P. M.—United States Five-twenty Bonds are firm at 79½ for the issue of 1862.

ANTWERP, Aug. 27—5 P. M.—Petroleum firm at 54½f. for Standard White.

LONDON, Aug. 27—4:30 P. M.—Consols closed at 93¾ for both money and the account. American Securities closed quiet at the following quotations: United States Five-twenties, 1862, 81¼; United States Five-twenties, 1865, old, 80¼; United States Five-twenties, 1867, 80¾; United States Ten-forties, 76¼; Erie railway Shares, 20; Illinois Centrals, 96¼; Atlantic and Great Western, 26¾.

LIVERPOOL, Aug. 27—4:30 P. M.—COTTON—The market closed with a downward tendency; Middling Uplands, 12¼d.; Middling Orleans, 12¼@12½d.; the sales of the day have footed up 7,000 bales, 1,000 of which were taken for export and speculation. BREADSTUFFS—The market is nominal.

LONDON, Aug. 27.—Sugar, Improved at 28s. 3d. 9 cwt. for No. 12 Dutch Standard afloat. Linseed Oil, 28l 10s. 9 ton. Fine Rosin, 10s. 6d. 9 cwt.

DOMESTIC MARKETS.

BUFFALO, Aug. 27.—BREADSTUFFS—Flour, 2,800 bbls. Wheat, 131,000 bushels; Corn, 14,000 bushels; Oats, 12,000 bushels; Barley, 1,000 bushels. Freights—Corn, 3,000 bushels, 2c. Corn, 27,000 bushels, Petroleum quiet at 24½c. on Wheat; 12½c. on Corn, and 8½c. on Oats. Flour inactive and nominally unchanged. Wheat—Receipts and sales of Spring, 1,000 bushels; there are no purchases and it is impossible to give quotations. Corn dull; car lots are selling at 80c. 9bu. delivered, and canal at 78c. Oats dull and heavy; sales, 2,000 bushels, Ohio, new, at 38c. Rye unsaleable. Barley—Receipts and sales are very dull. Pork steady at $24 50 for Heavy Mess. Lard steady at 16½c. Hops—Western easier with sales of 150 bales at 50@55c. Cattle firm and active, with good demand for Beeves. Receipts to-day, 1,600; five days, 4,600 head; shipments, 1,700 head; sales, 1,000 head at $4@5 for Ordinary to Good; at $5@6 for Fair; $6@7 for Extra. Hogs entirely nominal.

ST. LOUIS, Aug. 27.—TOBACCO less buoyant but in good demand for manufacturing grades. COTTON—Middling, 21c. FLOUR—Receipts, 2,000 bbls.; Shipments, 2,000 bbls.; Superfine, $3@3 25; Extra, $3 50@4; Double Extra, $4@4 50; Family, $5@7 50. WHEAT dull; No. 2 declined 2c. @3c.; higher grades declined 3c.@6c.; No. 2 Red, $1 14@$1 15; No. 3 Red, $1 08@$1 10; Rejected Red, $1@$1 05.
